REVENUE COMMISSIONER'S OFFICE,
Bangalore, 4th January 1911.

A. RANGASWAMI IYENGAR,
Revenue Commissioner.

No. R. 4005—*L. S.* 70-06-7, *dated* 22*nd December* 1910.

The accompanying Proceedings of the Government of His Highness the Maharaja of Mysore are hereby published for general information.

By Order,
C. S. BALASUNDARAM IYER,
Officiating Secretary to Government, General and Revenue Departments.

READ—

1. Government Order No. R. 5447-56—L. S. 9-06-4, dated the 28th November 1906, directing that applications from inamdars for the extension of the provisions of Chapters VIII to X of the Land Revenue Code into their inam villages be submitted to Government through the Revenue Commissioner:—

"Read letter No. 3794 of the 15th October 1906, from the Revenue Commissioner in Mysore, stating that at present proposals for the introduction of survey settlement into alienated villages are being submitted to Government direct by the Survey and Settlement Commissioner without reference to the Revenue Commissioner, and requesting orders as to whether such cases are not Revenue matters in which he (the Revenue Commissioner) should be consulted before orders of Government are passed thereon.

ORDER THEREON.—Government agree that cases of the kind referred to should come up to Government through the Revenue Commissioner. They accordingly direct that, in future, all applications from the holders of alienated villages for the extension to such villages of the provisions of Chapters VIII to X of the Land Revenue Code, be presented in the first instance to the Deputy Commissioner of the District, who will, if no objection exists to the application being sanctioned, take the necessary mutchalikas or agreements, and forward them with his report to the Revenue Commissioner. The latter will submit them with his opinion to Government for orders. When orders are passed by Government sanctioning the application, the Survey and Settlement Commissioner will take the necessary action in the matter."

2. *Letter No. 7, dated the 27th May 1907, from Col. J. P. Grant, Survey and Settlement Commissioner in Mysore, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Departments.*

I have the honor to submit for the orders of Government letter No. 287, dated 20th November 1906, from the Deputy Superintendent, Revenue Survey and Settlement, on the subject of the procedure when inamdars apply for the introduction of the survey and settlement into their villages.

2. The procedure to be adopted in submitting applications from the holders of alienated villages for the extension to such villages of the provisions of Chapters VIII to X of the Land Revenue Code, was laid down in Government Proceedings No. R. 5447-56—L. S. 9-06-4, dated 28th November 1906. The present reference is with regard to the action to be taken by the Survey Department after orders have been passed by Government sanctioning the application.

3. There are two phases of difficulty:—(i) the taking up for detail survey of the villages concerned precisely at the time the holders of the same choose to apply, thereby entailing inconvenience and loss to Government who bear all the cost, and to the inamdar himself because the rates must be assimilated to those *sanctioned* by Governmenttin neighbouring Sirkar villages and (ii) the want of co-operation, sometimes unavoidable, sometimes deliberate, on the part of the inamdars.

4. As regards the first point, it is clear that the detailed survey and settlement of inam villages must be expensive in proportion to their scattered and isolated position and their remoteness from the *locale* of survey operations generally. The last-mentioned is the most serious factor, for if the work lies out of the regular sequence of operations the travelling of both men and officers and, in the matter of announcing the rates, of some Revenue officer also, is greatly increased, to the detriment of more important work. Carried out *pari passu* with the ordinary survey, now entirely resurvey, operations, the detailed survey and settlement of inam villages is both cheap and effective. It is of course also evident that it is to the Inamdar's advantage that the rates in his village should be assimilated to those most recently sanctioned by Government in neighbouring Sirkar villages.

5. As regards the second point, namely, want of co-operation, Mr. Shama Rao who, if any one, is entitled to be credited with a knowledge of the subject, explains, at para 3 of his letter, why survey operations do not proceed smoothly in inam villages, especially in those out of the regular sphere of survey operations and it is needless for me to go over the same ground again.

6. The promulgation of the Order of Government quoted at para 2 above, laying down that the Revenue Commissioner should forward applications, for the extension of the provisions of Chapters VIII to X of the Land Revenue Code, for the final orders of Government, necessitates some modification of the Rules suggested by Mr. Shama Rao which I think might now read as follows:—

(i) When Government have published their sanction to the application of the holder of an inam village for the extension to such village of the provisions of Chapters VIII to X of the Land Revenue Code, the Superintendent of Survey will give the work (to follow), its proper place in the Survey programme, with due regard to economy and urgency. In the event of the taluk in which the inam village is situated being nearly ready for revision, the Superintendent of Survey will be responsible for timing operations in the latter, in the manner most advantageous to Government as well as to the inamdar.

(ii) The holders of the alienated village concerned shall be called upon to deposit such sum as may be fixed by the Superintendent of Survey to cover the cost of paid labour that may have to be put on for measurement and erection of boundary marks, in case the inamdar or his raiyats fail to render timely help. If such help be rendered, the amount deposited will be refunded to the inamdar, on completion of the work, either wholly or such balance of it as may remain after defraying the cost of labour rendered necessary. Any sum thus expended on labour will be refunded to the inamdar after it is recovered from the raiyats concerned through the Revenue authorities under the provisions of the Land Revenue Code.

(iii) The inamdar or his agent and the village servants shall be bound to remain in the village during the progress of measuring and classing operations and render every reasonable help towards the speedy completion of the work.

7. The Survey Department will, of course, take no action until Government have notified the extension to the villages concerned of the necessary provisions of the Land Revenue Code but the nearness or otherwise of the revision settlement may perhaps be considered by the Revenue Commissioner in the recommendation to be made to Government in the case of any village as required by the Proceedings of 28th November 1906 quoted at para 2 above.

(ENCLOSURE TO THE ABOVE.)

Letter No. 287, dated 20th November 1906, from D. Shama Rao, Esq., Deputy Superintendent, Mysore Revenue Survey, to the Survey and Settlement Commissioner in Mysore.

With reference to para 6 of the Mysore Government Proceedings No. R. 2656-67—L. S. 53-05-3, dated 30th August 1906, reviewing the Annual Progress Report of the Mysore Revenue Survey Department for the year ending 31st October 1905, *in re* alteration in the present practice relating to the detail survey of inam villages when the inamdars are desirous of introducing survey and settlement into their inam villages, I beg to submit the following for your consideration and orders.

2. When inamdars apply in writing for the introduction of survey and settlement, the Government, on the recommendation of the Survey and Settlement Commissioner, extend the provisions of Chapters VIII to X of the Land Revenue Code to such villages. The introduction of a survey settlement confers on their raiyats all the rights with their attendant responsibilities, enjoyed by holders of land in unalienated or Government villages. In view more of these benefits conferred on raiyats of inam villages, the Government, I think, bear the cost of establishment charges connected with the introduction of survey and settlement. It is only when inamdars object to the introduction of rates fixed, they are called upon to bear the charges of these operations.

3. Most of the inam villages for which applications have been hitherto received are scattered over several taluks and far away from taluks, the resurvey operations of which are shortly to be taken up. Measurers sent to such villages will therefore be far away from the camps of measuring assistants and be beyond their personal supervision. Inamdars generally apply for introduction of survey settlement when they find that the relationship between them and their raiyats is strained and difficulties for collection of their land revenue are increasing. When measurers are sent to these villages for carrying out survey, they are looked upon by raiyats with no friendly eye. The raiyats, at the start, decline to co-operate,

shifting the burden on inamdars, or if they consent to co-operate, they show apathy and greatly retard progress. The inamdars are, very often, unable to give any assistance, as they have no hold on their raiyats. The taluk authorities can do nothing in the matter as they have no direct concern with the raiyats of inam villages. In several cases, the measurers lose their valuable time in seeing preliminary arrangements completed; and thus the measurement of inam villages scattered over several taluks will seriously affect the outturn of resurvey work by Measuring and Classing Establishments, causing unnecessary loss to Government.

4. The suggestion contained in para 13 of the Annual Progress Report referred to above will solve our Departmental difficulties to a great extent. But, there may be instances in which the postponement of survey and settlement until the taluk is taken up for resurvey, may cause hardship to inamdars or their raiyats or to both.

5. As a remedial measure, I beg to submit the following draft rules for your consideration:—

"I. Inamdars who apply for the introduction of survey and settlement into their inam villages, shall be called upon to deposit such sum as may be fixed by the Survey and Settlement Commissioner to cover the cost of paid labor that may be put on, for measurement and erection of boundary marks, in case the inamdar or his raiyats do not render timely help. If the inamdar or his raiyats render ready and prompt help to survey operations, the amount deposited will be refunded to him on completion of work. If, on the contrary, paid labor has to be put on, the amount spent on this account will be refunded to him, after it is recovered from the raiyats concerned through the Revenue authorities under the provisions of the Land Revenue Code.

"II. The inamdars or their agents and the village servants shall be bound to remain in their villages, during the progress of measuring and classing operations and render every reasonable help in speedy completion of the work of their villages.

"III. The detail survey of inam villages will not be taken up if there be a near prospect of resurvey operations of the taluks in which the inam villages are situated, being commenced. The decision of the Survey and Settlement Commissioner shall be final on this point."

3. Letter No. 9014, dated the 14th March 1910, from Rajakaryapravina A. Rangaswami Iyengar, Esq., B.A., B.L., *Revenue Commissioner in Mysore, to the Secretary to Government, General and Revenue Departments.*

Adverting to your letter No. R. 10432—L. S. 70-06-2, dated 5th June 1907, forwarding for my opinion Survey and Settlement Commissioner's letter No. 7, dated 27th May 1907, suggesting certain rules of procedure to be adopted when inamdars apply for the introduction of survey and settlement into their inam villages, I have the honor to state that the difficulties represented by the Survey Department are quite real and the rules proposed by Colonel Grant may, with advantage, be adopted with slight modification as indicated below.

2. The general tendency of inamdars is to postpone applying for introduction of survey and settlement into their villages indefinitely and to lose opportunities, even when they present themselves, of having the same carried out with ease. It is therefore doubtful whether any progress can be achieved in this direction by following the procedure indicated in para 1 of the rules proposed by Colonel Grant. There is of course no difficulty if the inamdar is agreeable to wait till the resurvey operations take place in the taluk to which his village belongs. But if he wants it to be carried out earlier, it does not appear proper to ask him to wait till the resurvey, which, in the case of taluks recently settled, means a long period. I would therefore modify the rule so as to give the inamdar the option of waiting till resurvey or of bearing the excess cost (to be estimated by the Survey Superintendent) likely to be incurred on account of the survey operations having to be carried out at other than the time fixed for resurvey.

3. As regards the form of mutchalika to be executed by the inamdars when applying for the introduction of survey and settlement to their villages, received with your letter No. R. 8969—L. S. 62-06-1, dated 3rd April 1907, I have the honor to state that para 2 of the conditions prescribed in the mutchalika appears to be superfluous, as there is provision in the Land Revenue Code for the same (*vide* Sec. 16). This para may therefore be conveniently omitted and a fresh para added making the inamdar liable for extra cost in cases of the kind referred to in para 2 above.

4. The enclosures to your letter under reference are returned herewith.

No. R. 3762-72—L. S. 70-06-6, DATED BANGALORE, 12TH DECEMBER 1910.

ORDER THEREON.—The existing procedure regarding the introduction of survey and settlement into inam villages has been explained by Colonel Grant in his letter No. 1842, dated the 10th June 1902, which is printed in the preamble to Government Order No. R. 2123-4, dated the 13th November 1902. By Government Order No. R. 5447-56—L. S. 9-06-4, dated the 28th November 1906, the responsibility of deciding whether the application for the introduction of survey and settlement should be granted has been transferred to the Revenue Department and the Survey Department is now concerned only with the execution of the operations connected with the introduction of the survey and settlement. The form of mutchalika then prescribed has also to be amplified. Government are therefore pleased to issue the following rules indicating the procedure to be adopted for the introduction of survey and settlement into inam villages :—

I. On receipt of an application from the holder of an alienated or kayamgutta village, the Deputy Commissioner will cause the necessary enquiries to be made ; if no objection exists to the application being sanctioned, he will take an agreement from the inamdar in the form appended to this order and forward the records of enquiry together with his report to the Revenue Commissioner who will submit the same with his opinion for the orders of Government.

II. When Government have authorised the extension, under Section 236 of the Land Revenue Code, of the provisions of Chapters VIII to X of the said Code to any such village, the Superintendent of Survey shall include the work in the Survey programme and intimate to the holder the earliest date on which it will be possible for him to take it up with due regard to economy and urgency. If the taluk in which the inam village is situated is nearly ready for revision the operations will be made to synchronize, as far as possible, with the revision of settlement in the manner most advantageous to Government and to the inamdar. If the revision of the survey of the taluk is not due for a long time more and the survey and settlement of the inam village by itself is likely to entail undue cost and inconvenience on account of its remoteness from the tracts where the survey establishments are at work, the Superintendent of Survey will inform the inamdar of the fact. Should the inamdar be unwilling to have the operations postponed to suit the general programme of survey work, the Superintendent at his discretion may arrange to have the work taken up as soon as it may be convenient on the inamdar paying such cost, as may be fixed by the Superintendent, to meet the expenses of the special establishment that may have to be deputed for introducing survey and settlement into the inam village. Such payment will ordinarily be excused when the revision settlement of the taluk in which the village is situated has taken place within the previous decade.

III. The holder of the alienated or kayamgutta village and the raiyats concerned shall furnish the usual help in the shape of flag-holders, erection of boundary marks, etc. And before the operations are commenced he shall be required to deposit such sum as may be fixed by the Superintendent of Survey to cover the cost of paid labour that may have to be employed for measurement and the erection of boundary marks in case the inamdar or his raiyats fail to render timely help. If such help be rendered, the amount deposited will be refunded to the inamdar on the completion of the work either wholly, or if it had been necessary to engage any labour, such balance of it as may remain after defraying the cost thereof. Any sum thus expended on labour will be refunded to the inamdar after it is recovered from the raiyats concerned through the Revenue authorities under the provisions of the Land Revenue Code.

IV. The inamdar or his agent and the village servants shall be bound to remain in the village during the progress of the measuring and classing operations and render every reasonable help towards the speedy completion of the work. The inamdar will be liable for any extra expenditure that may be caused by his failure to do so or by any other neglect, delay or default on his part and the same will be recoverable as an arrear of land revenue and as a first charge on the village.

V. As soon as the Survey Department is in a position to estimate the probable effect of the settlement, it will intimate the same to the inamdar, who will then have the option of deciding whether the operations should be continued

and the survey rates adopted or further proceedings stopped. In the latter case, the inamdar shall be liable for the cost of the measurement, classification and other preliminary operations that may have been carried out till then and in default of payment, the amount will be recovered from him as an arrear of land revenue. Should the inamdar agree to the introduction of the survey rates, the cost of the operations will be borne by Government (unless as provided in Rule II the work has not been carried on in the usual course of the Survey programme) and any amount that may have been deposited by the inamdar will be refunded to him subject to such deductions as it may be liable on account of paid labour or other charges which have been specially incurred.

VI. When the application is for the introduction merely of detailed survey into the village and not of settlement also in addition, the cost thereof shall be paid by the inamdar. In case the inamdar should apply subsequently for the introduction of settlement into the village only such part of the cost that has been recovered from him as may remain after deducting any extraordinary expenditure that may have been caused by the delay in applying for settlement will be refunded to him.

2. A Kanarese translation of the revised form of agreement as shown in the Appendix will be sent to the Superintendent, Government Press, who is requested to print the same and furnish copies to Deputy Commissioners, as they require.

APPENDIX.

Agreement made by
Inamdar of the village of
Taluk District

Whereas I have applied to Government that, under Section 236 of the Mysore Land Revenue Code, 1888, the provisions of Chapters VIII to X of that Code may be extended to my aforesaid village of
I do hereby for myself, my heirs, executors and administrators agree in the event of my application being granted to the following conditions.

1. That after my application is sanctioned, I myself or my agent will be present at the village together with the village officers during the progress of the survey and measuring operations and render every reasonable help towards the speedy and satisfactory completion of the work in accordance with the directions of the Superintendent of Survey.

2. That in case the survey work is in any way impeded either by my failure to render the aforesaid help or through my negligence or delay otherwise and any extra expenditure is thereby caused, such cost as may be fixed by the Superintendent of Survey may be recovered from me as a primary charge on my revenues and my holdings.

3. That in order to meet the cost of any paid labour to be entertained in the event of my or my raiyats' failing to render timely help during the course of survey operations or erection of boundary marks, I will deposit in the Taluk Treasury such amount as may be fixed by the Superintendent of Survey and produce the treasury receipt for the same within fifteen days from the service of notice requiring me to deposit the sum. The balance of the deposit, if any, after meeting the

above charges should be refunded to me. But if it falls short of the cost that may be incurred by any amount the same may be recovered from me according to law.

4. That after my application is sanctioned, it shall be within the discretion of the Superintendent of Survey to fix the time for the commencement of survey operations in my village and he may, if necessary, require any extra expenditure that may have to be incurred in carrying them on otherwise than in connection with the ordinary Survey programme, to be paid in advance.

5. That in the event of my not agreeing on the estimate of the probable effect of the survey and settlement being intimated to me by the Survey Superintendent to the extension of the survey and settlement to my said village, I will pay the cost of measurement, classification and preliminary operations which have been incurred as fixed by the Superintendent of Survey. In case of my failure to pay the costs, the same may be recovered from me as a first charge on my village.

6. That in case of my agreeing to the introduction of the rates fixed by the Survey Department on the conclusion of the survey operations, Government should bear the costs of the survey and settlement excepting, however, the charges referred in the foregoing paragraphs as well on the first occasion of the same being effected after the date of this agreement as also hereafter whenever any revision survey or settlement is introduced into my village by order of Government according to law.

7. That I will pay the salaries and perquisites of the village officers of the said village according to the scale and in the manner prescribed from time to time for the payment of the village officers of unalienated villages.

8. That I will from time to time at my own expense cause to be prepared and furnished with punctuality such periodical or other agricultural and vital statistics concerning the said village as may be required by the Deputy Commissioner and that in the event of my failure at any time to discharge this obligation the Deputy Commissioner may make such arrangements as he deems fit for obtaining such statistics as aforesaid and the costs which he incurs in so doing shall be a first charge on my revenues recoverable in such manner as the Deputy Commissioner may direct.

CLASS VIII.—FLORAL PARADE.

		Rs.	Rs.	Rs.
Ladies' Decorated Bicycles	...	15	10	5
Grand Total	...	Rs. 1,068		

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, over-crowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words kinds and varieties may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct *kinds* of flowers. Marechal Niel, Crimson Rambler, La France, etc., are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition and any exhibitor acting contrary after being asked to retire will have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding medals at the Horticultural Shows are hereby notified to the public :—

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half-yearly Horticultural Shows, subject to the following conditions :—

(1) The medals will consist of a gold medal for classes I, II and III, a silver medal for class V and a bronze medal for class VI.

(2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.

(3) The following exhibitors will be qualified for the award of a medal :—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes, taking the two shows of the calendar year together ;

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group ;

(*c*) The exhibitor of any specially meritorious novelty.

(4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.

(5) No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetables exhibited will be eligible.

(6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits. It is also left to the discretion of the Judges to award the medal to the exhibitor who has obtained the most prizes during the year in the respective classes.

The Flower Show opens on Saturday the 4th February 1911 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 5th, 9-30 A.M., after which they may be sold.

REVENUE COMMISSIONER'S OFFICE,
Bangalore, 18th January 1911.

A. RANGASWAMI IYENGAR,
Revenue Commissioner.

No. 1902.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

SANITARY.

Simla, the 14th October, 1910.

NOTIFICATION.

In exercise of the powers conferred by section 58 of the Pilgrim Ships Act, 1895 (XIV of 1895), the Governor General in Council is pleased to make the following rules in supersession of the rules published with the notification of the Government of India in the Home Department No. 262, dated the 5th October 1896, as amended by subsequent notifications :—

1. In these rules "the Inspector" means the officer appointed by the local Government under section 8, or the person authorized by such officer as aforesaid under section 9 of the Pilgrim Ships Act (XIV of 1895), hereinafter referred to as "the Act," and "section" means a section of the said Act.

2. The Inspector shall, on receiving the notice required by section 8, himself proceed or give written authority to some competent person on his behalf, to inspect the ship, her provisions, medical stores, equipments, ventilation, fittings, etc., and shall satisfy himself by such inspection that they meet all prescribed requirements.

3. The certificates A and B required under sections 11 and 12 shall be given in Forms Nos. I and II appended to these rules and that required under section 24 in Form III.

4. No certificate under section 12 shall be granted between May 20th and September 20th in any year in respect of a ship of a tonnage of less than 500 registered tons, or which is not capable of steaming at least eight knots an hour in ordinary monsoon weather; nor shall such a certificate be given unless all the arrangements required by these rules have been made to the entire satisfaction of the Inspector.

5. The Inspector shall see that in all cases where the number of pilgrims exceeds 100, the medical officer of the ship is present at the official inspection and that such medical officer has had on opportunity of satisfying himself as to the completeness of the arrangements made for the accommodation and care of the pilgrims under these rules; and shall require such medical officer to furnish a certificate to that effect in form IX and to sign the second of the certificates prescribed by rule 58.

Boats, anchors and cables.

6. (1) Every pilgrim ship shall be provided with boats (to be placed under davits) at least two of which shall be lifeboats, according to the following scale :—

1	2	3

Proviso.—Provided that, where in ships already fitted the minimum cubic contents of boats placed under davits are provided, as required by column 3 of the said scale, this rule shall be deemed to have been sufficiently complied with, although the actual number of boats so carried falls below the minimum prescribed in column 2 of the said scale.

(2) Every boat shall be supplied with two fresh-water breakers, two small tin-lined lockers fitted under the side seats in the stern and each capable of holding about 50 lbs. of biscuit, and a tightly spread canvas cover.

(3) Every boat shall be provided, to the satisfaction of the Inspector, with masts, sails, painters, oars, rowlocks or tholes, rudder and tiller, boat hooks, plugs and breakers, all properly secured.

(4) A hatchet or tomahawk shall be kept in each end of every life-boat, in good order and secured by a lanyard; a life-jacket or belt for each oarsman, and one for the cockswain, shall also be provided: and a life-line in loops shall run round the outside of the boat and be securely made fast.

7. Every pilgrim ship shall carry an accident boat swung outboard in the most convenient part of the ship and properly secured with belly bands, which shall be made fast with a strop and toggle on the davit or other convenient place. A mallet shall be secured beside the toggle ready for immediate use. The boat's falls shall be coiled down in the most convenient place (*not* in the boat) clear of the pilgrims. The following gear only shall be in the accident boat:—

(1) One oar for each man of the crew and two spare ones.
(2) A life-belt for each man in the boat to be kept on each man's thwart.
(3) Two boat hooks.
(4) One rowlock for each thwart and two spare ones.
(5) One life-buoy.
(6) One painter of reasonable length.
(7) Two plugs.
(8) One tiller, or one yoke and yoke lines.

(9) One white globe lamp.
(10) One good flare.
(11) One rope for each man in the boat securely made fast to the guy between the davit heads and of sufficient length to reach the water when the ship is light. Each rope to be made fast exactly above each thwart so that the man can hold on to it as the boat is lowered.

8. Boat drill shall be practised at least once a week.

9. Every pilgrim ship shall be provided with three bower anchors of such weight, and with cables of such length, size and material as are, in the judgment of the Inspector, sufficient.

Instruments for purposes of navigation.

10. Every pilgrim ship shall be provided with—
(*a*) not less than three good ship's compasses and two boat's compasses and with a record of the deviation of her compasses on every point, entered in the log-book;
(*b*) Admiralty or Indian Government charts and sailing directions suitable for the voyage she is about to undertake;
(*c*) not less than two chronometers and not less than two sextants or quadrants and barometers, one of the latter being a mercurial barometer;
(*d*) a deep-sea leadline and lead.

Apparatus for extinguishing fires and precautions against fire.

11. (1) Every pilgrim ship shall be provided with—
(*a*) hose capable of being connected with the engines of the ship, and adapted for extinguishing fire in any part thereof; and
(*b*) fire-buckets in the proportion of three for every 100 tons of tonnage up to 600, and two for every 100 tons above 600: Provided that not more than 50 fire-buckets need under any circumstances be carried.

(2) If fire-annihilators or fire-engines are carried, they shall be placed by the master in charge of one of the principal officers of the ship and the ship's carpenter, who shall be held responsible that they, with the buckets and other fire apparatus, are kept in a state fit for immediate use.*

12. As soon as possible after leaving port, the officers and crew shall be divided into parties and assigned to stations in case of fire; and fire-drill shall be practised at convenient times and at least once a week.

13. Immediately before leaving port, the passengers shall be called on to deliver up whatever Lucifer matches, gunpowder or other inflammable articles they may have with them.

14. No naked lights shall on any account be used in the hold or store-rooms or in the between-decks, except under trustworthy superintendence. No person shall be allowed to read in bed with a naked light. Smoking between decks is strictly prohibited.

15. Cases containing spirits shall never be opened in the hold, but may be hoisted on deck for the purpose.

Appliances for saving life and making signals of distress.

16. Every pilgrim ship shall be provided, to the satisfaction of the Inspector, with a supply of life-buoys, with lines attached, of which not less than six shall be kept readily available on deck, and with inextinguishable lights fitted for attachment to the life-buoys. Every pilgrim ship shall also be supplied with an approved life-belt or other similar approved article of equal buoyancy suitable for being worn on the person, for each person, on board, and such life-belts or other articles as aforesaid shall be so placed, to the satisfaction of the Inspector, as to be readily accessible.

EXPLANATION.—An "approved life-belt" means a belt which does not require to be inflated before use and which is capable of floating in water for 24 hours with at least 15 lbs. of iron suspended from it.†

* Fire engines should be worked once a week to keep them in proper order.

† Life-belts should be cut 2 inches under the armpits, and so fitted as to remain securely in place when put on.

17. Life-buoys shall be secured by toggle and becket or any similar method allowing of ready release, but shall not be lashed or seized to the vessel.

18. Every pilgrim ship shall carry such quantity of rockets and blue lights or other signals as the Inspector may deem adequate.

Fittings and other appliances to be provided in the upper and between-decks.

19. The Inspector shall see that sufficient ventilators are provided for the between-decks to give each pilgrim (*a*) in the first or upper between-deck 5 square inches, and (*b*) in the second or lower between-deck 10 square inches of ventilation area exclusive of hatches and side scuttles, and so placed as to afford an equable diffusion of air through all parts. The ventilators of the second between-deck must act separately from those of the first between-deck and, if pilgrims are carried on a second or lower between-deck, such lower between-deck shall be ventilated by artificial ventilation, such as Blackman's ventilator or a thermantidote approved of by the Inspector. The Inspector shall also see (*i*) that all airholes affording a means of communication between the hold and the between-decks are closed so as to shut off, as completely as possible, the escape of foul air from the bilge, or steam from the cargo, into the between-decks; (*ii*) that the foul air from the hold and the between-decks respectively, is carried in separate shafts above the uppermost deck; and (*iii*) that all ventilating shafts and tubes for the hold are so arranged as to act quite independently of those for the between-decks.

20. In the absence of hollow iron masts or other means of ventilating the hold, there shall be fitted at least four cowl-headed tubes (of a size to be approved by the Inspector) leading from the lower hold to the open air on the upper deck.

21. Every cowl-headed tube shall be provided with a strong plug for use, if necessary, in bad weather.

22. Such provision shall be made for affording light to the between-decks by means of side ports as the circumstances of the case may, in the judgment of the Inspector, require. The pilgrims shall, moreover, have the free and unimpeded use of the whole of every hatchway situated over the space appropriated to their use, and over each hatchway there shall be erected such a body hatch or other substantial covering as shall, in the opinion of such Inspector, afford the greatest amount of light and air and of protection from sun and wet as the case will admit of.

23. The upper deck of every pilgrim ship shall be either of wood, or of iron or steel sheathed with wood and caulked.

24. Each hatchway shall be provided with a large tarpaulin tent which can in bad weather be spread well over it and securely fastened so as to keep out rain and let in fresh air, and in fine weather be rolled up and put out of the way; and shall, except where arragements exist for lowering the derrick boom in a way which will serve the purpose, also be fitted with a strong iron or wooden A-shaped frame for the support of such tent.

25. Every pilgrim ship shall have poop, quarter deck, waist and forecastle awnings complete and in good order, and six windsails distributed as the Inspector may direct. The awning and windsails shall be kept up so long as the weather does not render this impossible.

26. Strong ladders 2½ feet wide with hand rails of a convenient height shall be provided for every hatchway used as such and not merely as a ventilator; and, as additional means for women and children to hold on by, knotted handropes shall be fastened, conveniently near the ladders.

27. Hooks for hanging the required number of lanterns shall be fixed at convenient distances apart.

28. The space to be occupied by pilgrims must be kept clear from obstruction of any kind whatever, thoroughly clean and dry; and nothing except life-belts with the consent of the Inspector given under rule 16, shall be slung up or stowed away between the beams. Every day while the pilgrims are on deck the between-decks shall be carefully cleaned and scrubbed with dry sand mixed with suitable disinfectants.*

* Calvert's powder in the proportion of ten per cent should be used.

29. Bamboos, ropes or strong rails shall be securely fastened fore and aft to the midship stanchions on the between-deck.

30. No timber or cargo of any kind, and only the necessary fittings properly secured and live-stock for consumption on the voyage, shall be allowed on the upper deck, which shall, save as aforesaid, be exclusively reserved for the pilgrims.*

31. A set of water-vessels, such as buckets and tin mugs required by topases or others for use in the latrines, shall be exclusively set apart for such purpose; and they shall be marked or printed so as to be clearly distinguishable from those used for cooking or drinking purposes.

Food, fuel and water-supply.

32. Every pilgrim ship shall be supplied in accordance with the following scale with food, fuel and water, of good quality, conveniently stored and in quantity sufficient to supply the pilgrims on board during the intended voyage (including such detention in quarantine as may be probable):

For each pilgrim daily—

Rice	1 lb.	Tamarind ...	1 oz.
Flour or ship's biscuit ...	4 oz.	Condiments, chillies, garlic coriander seed or turmeric ...	½ „
Pulse, dall ...	4 „	Salt ...	½ „
Ghee or oil ...	1 „	Firewood, dry ...	2 lbs.
Onions ...	2 „	Drinking-water from iron tanks ...	1 gal.
Pumpkins, yams or other vegetables ...	2 „		

Provided that, in the case of drinking-water, the allowance hereby prescribed shall be provided for each pilgrim irrespective of his age.

A signboard written in bold letters in the Persian, Urdu and Guzarati characters shall be displayed at the place, to be approved by the Inspector, at which stores are dispensed, announcing that food can be procured there. At the same place shall be posted a table of the rations of food and water in Persian, Urdu and Guzarati, and a price list in the same languages of the articles of food offered for sale.

33. Excepting fuel and water, which shall always be found by the ship, the articles in the foregoing scale need not be provided for those pilgrims who have satisfied the officer appointed in this behalf under Section 18 that they have on board food sufficient for their own use.

34. Every pilgrim ship shall, in addition to the requirements of the two last foregoing rules, have on board, either as cargo or stores, food sufficient, in the opinion of the Inspector, to provide for the pilgrims in the event of an accident to the ship's machinery.

35. (*1*) Every pilgrim ship shall be provided with caboose accommodation sufficient to cook for the total number of pilgrims on board, and such accommodation shall in no case consist of less than two cabooses or cooking ranges placed on deck, properly housed and covered, to which the pilgrims shall have free access between the hours of 6 A.M., and 9 P.M.

(*2*) All cooking ranges shall be made of substantial plate-iron lined inside with bricks and raised at least four inches from the deck, with an outlet or chimney at top for the escape of smoke. Each range shall contain five or six cooking places, and the master shall see that fires adequate for cooking are kept lighted at them from 6 A.M. to 9 P.M. An additional range shall be provided for every 200 pilgrims carried in excess of 100. Cooking on board in pilgrims' private stoves is prohibited.

(*3*) The Inspector may require the master to provide such number as such Inspector may think necessary of Mahomaden cooks, not exceeding three per hundred pilgrims (exclusive of pilgrims who have on board their own supplies and desire to cook for themselves).

36. The crew of the ship shall not be allowed to use the cooking ranges or latrines set apart for pilgrims while pilgrims are on board, but shall be provided with a separate cooking range and latrine.

* Pilgrims should be encouraged to use the upper deck as much as possible.

37. Each ship shall be fitted with a condenser or distilling apparatus of sufficient capacity to produce at least one gallon of drinking-water a day for every person on board of whatever age, including the crew.

38. No certificate under Section 13 shall be granted unless the condenser cannot only supply the minimum quantity of water prescribed under rule 37 for each person on board, but also yield every 24 hours 500 gallons of pure, cold water fit to drink.

39. The tanks for storing drinking-water on board shall not be placed near the latrines. They shall be protected from all filth, and shall be so closed that the distribution of the water can be effected only by means of pumps or from taps with lock and key fitted to the tanks.

40. The water of any tank pronounced bad by the medical officer of the ship shall be immediately rejected and pumped out and the tank cleaned out before being re-filled.

41. If there is any doubt as to the quality of the drinking-water stored, or as to the possibility of its pollution, either at its source or in the course of the voyage, it shall be well boiled; and it shall be thrown into the sea as soon as it is possible to obtain a purer supply.

42. Every condenser or distilling apparatus shall have a separate engine for working the circulating cold-water pump, and under no circumstances shall this engine be used for any other purpose than that of feeding the boiler of the condenser.

43. The arrangements for discharging the circulating water from the condenser shall be such that it can be delivered into buckets or connected with a hose for the purpose of washing decks, or extinguishing fire, as well as discharging over the ship's side. A suitable hose and connection shall also be provided.

44. Either upright or horizontal boilers may be used for condensers. Each boiler shall be furnished with a steam-gauge indexed to double the working pressure, a glass water-gauge and two separate gauge cocks, one safety-valve and two mud-hole doors for the purposes of cleaning.

45. The boilers and all machinery connected with condensers shall be properly covered in, and every wooden bulkhead in the vicinity of the boilers of condensers shall be covered with sheet lead weighing 4½ lbs. per square foot and securely fastened to such bulkhead.

46. All the piping in connection with the condenser, especially the main suction and the condensed water discharge-pipe, shall be laid in position safe from accident or otherwise securely encased.

47. The Inspector shall satisfy himself by actual experiment that the condenser is capable of performing the work required of it.

48. The Chief Engineer or some other competent person, to be approved by the Inspector, shall be appointed to have charge of the distilling apparatus and machinery connected therewith during the voyage.

49. No ship shall put to sea before the decks have been cleared of any loose straw, hay or other inflammable material, and all the cargo has been properly stowed away.

Cargo.

50. No petroleum as defined in the Petroleum Act, 1899 (VIII of 1899), or explosive as described in the Indian Explosives Act (IV of 1884), nor any inflammable oils, spirits, jute or coal (except such coal as is required for the voyage and the return voyage to India), nor any commodity likely, by reason of its quantity, quality or mode of stowage, to be prejudicial to the safety of the pilgrims, shall be taken as cargo or part of the cargo.

Allotment of upper deck space.

51. No cabin shall be provided for any pilgrim on the upper deck unless space remains unallotted on that deck after providing the accommodation required for the permanent and temporary hospitals, latrines, and six superficial feet for every pilgrim carried in the between-decks. Such space as remains unallotted after making provision for these requirements may be reserved for the accommodation of pilgrims in cabins containing not less than 12 superficial and 72 cubic feet of space. No pilgrim shall be furnished with reserved accommodation on the upper deck except in a cabin.

52. The deck space may be distributed between the first and second class pilgrims as the master or owner may desire: Provided that each pilgrim of the lowest class has six feet of deck space provided for him, and provided that no part of a pilgrim ship shall carry more pilgrims than the number which that part of the ship is capable of accommodating in accordance with Notification No. 2145, dated the 17th September 1897.

Amount and distribution of baggage.

53. Pilgrims' heavy baggage shall be deposited in the hold before the ship leaves her moorings. Pilgrims shall be allowed to keep with them only such articles as are absolutely necessary: Provided that the articles so kept do not exceed one maund (82 lbs.) in weight for each adult pilgrim or in the case of pilgrims who, in accordance with the provisions of Section 18, are allowed to provide their own food for the entire voyage, one maund and a half.

Hospital accommodation, medical stores, and arrangements for maintaining health, cleanliness and decency.

54. (1) The hospital accommodation required under Section 21 shall be provided where convenient. A permanent hospital shall be provided for 5 per cent of the pilgrims on board and containing not less than six bunks, and having a deck area of at least 32 superficial feet and dimensions of not less than 192 cubic feet per head. On every pilgrim ship on which there are 50 or more female pilgrims, there shall be a separate permanent hospital, containing not less than two bunks with a deck area of at least 72 superficial feet and dimensions of not less than 432 cubic feet, which shall be reserved for the use of women and of children under 12 years of age. The hospitals shall be lighted and ventilated to the satisfaction of the Inspector and shall be provided with raised floors or platforms at least 4 inches off the deck when situated on an iron deck. If on deck they shall be made as secure as any other deck-house, and the roof shall be well caulked and covered with painted canvas.* No case of small-pox, cholera, yellow fever or plague shall on any account be treated in a permanent hospital. Permanent hospitals shall be used solely for the accommodation of sick pilgrims, and in so far as they are not required for the accommodation of such pilgrims, shall remain unoccupied.

(2) Materials shall be carried for the construction on the upper deck of a separate temporary hospital for the treatment of such cases of sickness as it may be considered desirable specially to segregate (such as small-pox, cholera, yellow fever or plague) and for any general outbreak of sickness in the event of the permanent hospital accommodation becoming insufficient. The part of the upper deck upon which such hospital shall, if required, be erected, shall be pointed out and measured off by the Inspector. The framework of the hospital shall be either of iron (in pieces that can be easily fitted together) or of wooden spars or bamboos. The roof shall be tented, and both that and the side walls shall be made of stout canvas and be perfectly water-tight, due provision being at the same time made for ventilation. The superficial area of the floor † shall be not less than 144 square feet, and the floor shall be raised at least 4 inches from the deck. In cases of sickness of the kind referred to in this rule, only the medical officer and the person or persons charged with the duty of looking after the patients shall have access to them, and, except the medical officer and medical attendants referred to in rule 70, none of those who have had access to such patients shall be permitted to come into contact with the other persons on board.

55. A suitable dispensary to be approved by the Inspector shall be provided.

Medical Stores, etc.

56. The following articles shall be provided according to the following scale and supplied gratuitously to the pilgrims on board at the discretion and by the direction of the medical officer, namely:—

For any number or pilgrims not exceeding 100 (proportionate quantities to be provided for pilgrims in excess of that number)—

Sago	5 lbs.
Arrowroot in tin cases	10 „
Preserved milk ‡ (1-lb. tins)	1 dozen.
Liebig's extract of meat in 2-oz. tins or jars	1 lb.
Sugar	5 lbs.
Rum	1 quarter bottle.

* The fittings used in constructing permanent hospitals should be of iron in preference to wood.

† For flooring sheet iron is the best material.

‡ The contents of a pound tin of preserved milk mixed with half a gallon of water make good milk.

57. The following medicines and medical appliances shall be provided on the scale indicated below:—

58. The following certificates showing that medicines, etc., have been duly supplied and received according to the above scale shall be produced before the Inspector at the time of the inspection :—

(1) Certified that we have supplied medicines, etc., for——pilgrims proceeding to———in the S.S.————according to the above scale, [or we have supplied medicines, etc., in making up deficiencies in existing stock up to the above scale.]

Dated *Chemists.*

(2) Certified that I have carefully compared the above list with the medicines, etc., examined by me on board the pilgrim ship————and am satisfied that they are all correct.

Medical Officer.

Dated *Ship* *Health Officer.*

59. (1) Every pilgrim ship shall carry a disinfecting stove approved by the Health Officer of the port in British India at which the voyage is to commence.

(2) Articles of bedding, carpets and clothes used by patients who have been affected with cholera, as well as by persons who have had access to such patients, shall be immediately disinfected. Such of these articles as have little or no value shall be thrown into the sea, or, if the ship is in a port or canal, be destroyed by fire. All such articles as are not destroyed shall be carried to the disinfecting stove in impermeable bags sprinkled with a solution of corrosive sublimate.

(3) The excreta of the sick shall be collected in vessels containing a disinfecting solution and the latrines in which these vessels are emptied shall be thoroughly disinfected after each operation.

(4) Articles which have come into contact with persons suffering from cholera shall be thoroughly disinfected in the following manner :—

(*a*) Articles so contaminated or suspected of being so contaminated shall, unless they are liable to be destroyed by exposure to heat, be disinfected in the disinfecting stove under pressure, the stove being maintained at a temperature (to be tested during each operation) of 220° Fahr. and the articles exposed to this temperature for 15 minutes.

(*b*) Articles liable to be destroyed by exposure to the heat of a disinfecting stove, such as metals, leather, tables, lockers, etc., shall be disinfected by being washed with disinfecting solution.*

(5) Ships on which cases of cholera have occurred shall be disinfected in the following manner :—

(*a*) The cabins† and all parts of the ship occupied by cholera patients or those suspected to be suffering from cholera shall be emptied, and all articles removed disinfected as above.

(*b*) The interior sides, bulkheads, floors and decks of the ship shall be washed with the corrosive sublimate solution with the addition of 10 per cent of alcohol (*i.e.*, one gallon of methylated alcohol to every 10 gallons of the corrosive sublimate solution),‡ and, two hours after washing, scrubbed, and then thoroughly washed down with plenty of water.

(*c*) The hold of the ship shall be strewn from time to time with a sufficient quantity of iron sulphate to neutralize the sulphuretted hydrogen, and the water in the hold shall then, unless the ship is in dock, be pumped out and the hold washed with sea-water and sprinkled with the corrosive sublimate solution.

60. Pilgrims shall air their clothing, blankets, etc., as often as required to do so by the medical officer.

61. The following articles and appliances shall be supplied on the scale shown below :—

Iron boilers with covers—	
For rice (large)	According to the number of pilgrims to be fed by the ship.
„ dall or curry (small) ...	

* One of the following disinfecting solutions should be used—

(*a*) Corrosive sublimate in the following proportion :—
Corrosive sublimate, ½ oz.
Hydrochloric acid, 1 oz.
Water, 3 gallons.
Fuchsin or losin, 5 grains.

(*b*) Pure phenic acid, five parts in 100 parts of water.

(*c*) Fresh slaked lime.

The different disinfecting solutions are usefull for the following purposes :—

(*a*) Linen, clothes and articls soiled by the evacuations of cholera patients should be put into the corrosive sublimate solution.

(*b*) Persons in attendance on the sick should use the corrosive sublimate solution, when washing themselves in the proportion of one part of the solution to 2,000 parts of water.

(*c*) Phenic acid should be used to disinfect articles which cannot be exposed to a temperature of 220° Fahr. or to contact with sublimate solutions, such as metals, instruments, etc.

(*d*) Slaked lime is specially useful to disinfect the evacuations of cholera patients ; in the absence of slaked lime phenic acid will answer the same purpose. When slaked lime is used for disinfecting liquids, it should be used in the proportion of three lbs. of lime to ten gallons of the liquid to be disinfected.

† For the purpose of fumigating cabins and confined space, one ounce of sulphur should be burnt for very 30 cubic feet of the space to be fumigated, the cabin or other space being completly closed during the operation and kept so for twelve hours.

‡ The washing should commence from the top, horizontally and downwards, so that the whole surface become covered with a coating of the solution in fine drops.

Deck scrapers	12
Sand	1 ton
Holystones or hard bricks	50
Swabs or squeegees	18
Brooms (country)	50

* All these should be specially marked for privy use.

62. (1) Every pilgrim ship shall be fitted with not less than two latrines, apart from those for the use of the crew, sufficiently screened from public view and readily accessible. If there be any females among the pilgrims, one latrine shall be screened off and set apart for the exclusive use of females. There shall be an additional latrine for every 100 pilgrims, or fraction of that number in excess of 100, and if there be more than 100 female pilgrims on board, the number of latrines reserved for their use shall be increased in the proportion they bear to the total number of pilgrims. The latrines shall be provided with seats at the rate of not less than three for the first 100 pilgrims and at the rate of three for every additional 100 pilgrims. No latrine shall be allowed either between-decks or in the hold.

(2) The latrines shall be in a convenient and accessible place on the upper deck, and close up to the bulwarks or rails. They shall be made of iron and securely bolted down to the deck beams below the deck. They shall not project over the ship's side. They shall be so placed, that the soil shoot of the latrine floor may lead directly out of a port or other opening and well clear of the ship's side. Every latrine shall be divided into separate and private compartments. Each compartment shall not be less than 3 feet and 2 feet in size and shall have a separate entrance with door and be fitted with a seat or pair of foot-boards having a free opening or hole in the centre. Each such opening shall communicate directly with the floor beneath common to all openings. The floor shall be continued into the shoots and have a good fall from each end towards the shoot in the centre. The floor of the latrine shall be at least 1 foot above the deck to enable the deck beneath to be freely flushed. Every compartment shall be well ventilated by means of such openings as will not interfere with privacy.

(3) All latrines shall be kept in good order and disinfected three times a day. They shall be continuously flushed by pipes laid on to them. These pipes shall be of not less than 2 inches internal diameter and fitted at each end of each set of latrines so that the latrines may be flushed from the ends towards the centre. The deck immediately about the latrines shall be enclosed with a ridge of wood 2 inches high to prevent the flushing water finding its way to other parts of the deck and the deck from this 2 inch ridge to the scuppers shall be covered with tin, lead or other metal.

(4) Not less than two sweepers shall be employed on every pilgrim ship, and one additional sweeper shall be employed for every 100 pilgrims in excess of 100 up to a maximum of five sweepers when the total number of pilgrims does not exceed 1,000. For every 100 or fraction of 100 pilgrims in excess of 1,000 one additonal sweeper shall be employed up to a maximum of eight sweepers.

(5) Every pilgrim vessel shall be provided with at least two urinals.

63. Every ship shall be provided with not less than one place for washing on each side of the deck, sufficiently screened from public view, whereof a full proportion, as prescribed in the case of latrine accommodation, shall be set apart exclusively for females, with a water pipe and tap in each for supplying sea-water for ablution.

Medical Inspection:

64. The medical inspection of female pilgrims shall be carried out either by lady doctors or, under the supervision of the medical officer appointed by the local Government under section 32, by women appointed by the local Government in this behalf.

65. No articles found by the medical officer referred to in the last foregoing rule to have been contaminated by persons suffering from cholera or choleraic indisposition, or from a disease which in his opinion is dangerously infectious or contagious, or suspected by him to have been so contaminated, shall be taken on board a pilgrim ship until they have been disinfected under his order in the manner prescribed by rule 59.

66. No pilgrim otherwise entitled shall be prevented from embarking save for any of the causes specified in section 32, sub-section (2).

Issue of tickets and refunds of passage-money.

67. (1) The ticket which every pilgrim is, under section 35, entitled to receive:

(*a*) shall be sold from a book with counterfoils,

(*b*) shall be denoted by a serial number which shall also be stamped on the counterfoil, and

(*c*) shall be of canvas, paper or parchment, and not less than 4½ inches long by 3 inches wide.

(2) On the ticket and its counterfoil shall be inscribed :—

(*a*) the name of the holder, or, if the holder be a female, the name of the pilgrim whom such female is accompanying.

(*b*) the cost in words in Urdu, or in some other vernacular language approved by the local Government, and

(*c*) the words *food is procurable on board the ships.*

The cost of a ticket shall not include any taxes other than the fixed dues leviable at Camaran and Jeddah.

68. (1) Every intending pilgrim who, having purchased a ticket, has not been permitted to embark under the provisions of section 32, sub-section (2), or who, having been received on board a pilgrim ship, has been removed from it in accordance with the provisions of section 33, sub-section (2), or who is from other unavoidable cause, such as the detention of any member of his family under either of the provisions aforesaid, prevented from proceeding to the Hedjaz shall be entitled to receive back from the owner or agent of the ship the amount paid by him as passage-money.

When a pilgrim dies on board ship before landing at the Camaran Lazaretto, the Master shall make over to his legal heirs if any on board or, if no such legal heirs are on board, shall add to his effects listed in accordance with rule 78 of these rules a sum equivalent to the fixed quarantine and sanitary dues leviable at Camaran and Jeddah in all cases in which such dues have been paid by the pilgrim in addition to the passage-money or have been included in the passage-money under rule 67.

(2) It shall be the duty, in the case of pilgrims at Bombay, of the Protector of Pilgrims appointed under the Protection of Pilgrims Act, 1887, and in the case of pilgrims at any other port, of such officer as the local Government may appoint in this behalf, to see that refunds of passage money are promptly made to intending pilgrims entitled to them under this rule.

Bombay Act II of 1887.

(3) The officer making an inspection under Section 32 or Section 33 shall, in case of such refund becoming due, impress on the pilgrims ticket the words "Not permitted to proceed on voyage"; and such pilgrim shall thereupon be entitled, on presentation of the ticket so cancelled at the office of the owner or agent, to a refund of the passage-money paid by him.

(4) If the owner or agent neglects or refuses, on presentation, as provided by clause (3), of the cancelled ticket, to refund to the pilgrim the passage-money paid by him, such owner or agent shall be punishable with fine which may extend to two hundred rupees, and with a further fine which may extend to twenty rupees for each day after the day on which the ticket was presented, during which the refund remains unpaid.

The Master, Owner, etc.

69. Besides complying with the foregoing rules so far as they concern him, the master shall give the notice required under Section 8 in Form No. IV appended to these rules, and shall produce, before the Inspector at the time of his inspection, a certificate in the following form :—

"Certified that it is proposed to issue tickets to pilgrims and to provide accommodation as follows :

"On the voyage of the pilgrim ship proceeding to—

70. In the event of a ship being engaged to carry more than 100 pilgrims, the owner, agent or master shall appoint to it a medical officer licensed under rule 80. A second medical officer licensed under rule 80 shall be similarly appointed if the number of pilgrims exceeds one thousand. The owner, agent or master shall also in the case of a ship engaged to carry more than 100 pilgrims appoint at least one male and, if there are any female pilgrims to be embarked, also one female attendant to assist the medical officer. In addition to the above attendants a compounder shall be engaged by the owner, agent or master, if the ship is to carry more than 400 pilgrims. Such compounder and attendants must be approved of by the Health Officer

at the port of departure and arrangements shall be made to the satisfaction of the Inspector for providing them with adequate accommodation on board ship.

71. The master shall afford the medical officer every facility for examining the provisions, water and medical stores, and for making himself generally familiar with the arrangements made for the accommodation of the pilgrims about to be carried.

72. The master shall cause the statements required by Sections 22 and 25 to be prepared in Form No. V appended to these rules.

73. The bond required by Section 31 when a ship clears from any port in British India other than Aden for any port in the Red Sea shall be executed in Form No. VI appended to these rules.

74. Before sailing the master shall obtain from the Port Health Officer a bill of health as prescribed in Form No. VII appended to these rules.

75. The master shall post up in the between-decks and in such other places accessible to the pilgrims as may be convenient copies of the Act and of these rules and of articles 92 and 151 to 161 of the Paris Sanitary Convention of 1903, and all notices which he may be required so to post by the Commissioner of Police or other authorized officer at the port of first departure. All such copies shall be in English, French or German, and in Persian, Urdu and Guzarati. The master shall afford every facility to the Port Officer, or other duly authorized officer or person, for making the official inspection of the ship, her equipment, ventilation, fittings, provisions and medical stores, and shall himself be present at such inspection.

76. The master shall be jointly responsible with the medical officer for the care of the pilgrims on the voyage. He shall see that the special accommodation and privileges, if any, to which the pilgrims are entitled, are reserved to them without hindrance or diminution throughout the voyage: that the space in the upper and between-decks is not encroached upon; that all rules and regulations for securing cleanliness and order are carried out, and, as far as possible, that all reasonable requisitions of the medical officer are complied with.

77. The master shall appoint one of the officers of the ship to the charge of the provisions and stores, to see to the punctual issue according to scale of the day's rations and water, and to assist the medical officer generally.

78. (1) When any pilgrim who is unaccompanied by any of his legal heirs dies on the voyage, the master shall call a panch composed wherever possible, of four literate pilgrims and the medical officer on board the ship and shall make an inventory of the effects of the deceased, adding such particulars as to the name and residence of the deceased and the names and addresses of the legal heirs and nearest relations in India as he may be able to gather.

(2) The inventory and particulars prescribed by sub-rule (1) shall be signed by the master and attested by the members of the said panch and the master shall then take charge of the effects of the deceased.

(3) If the ship returns direct from the Hedjaz to any British Indian port, the master shall immediately on the ship arriving in such port, make over the effects of the deceased with the said inventory and particulars to the Commissioner of Police in Bombay, Madras or Calcutta, and elsewhere to the Magistrate of the District, or, in his absence, the Magistrate in charge.

(4) If the death occurs on the voyage to the Hedjaz, and the ship does not return direct to British India, the master shall make over the effects, with the said inventory and particulars as above, to the Britsh Consul at Jeddah.

79. The master shall cause the supplementary statement, required by section 24 when additional pilgrims are taken on board at an intermediate port, to be prepared in Form No. V appended to these rules, the heading being altered to "Suplementary Statement required by section 24 of the Pilgrims Act, 1895."

The Medical Officer.

80. (1) Besides complying with the foregoing rules so far as they concern him, the medical officer of every pilgrim ship required by the Act to carry a medical officer shall be licensed by the local Government and appointed by or on behalf of the owner of the pilgrim ship. Every person desiring to obtain a license to act as such medical officer shall apply for a license to the Civil Administrative Medical

officer of the province in which the port of first departure lies. At Jeddah such license may be granted, for the return voyage only, by the British Consul at that port.

(2) The license shall be renewable yearly, and shall be in Form No. VIII appended to these rules.

(3) No person shall be eligible for appointment as medical officer who is unable to write either English or French or German or Italian or, who does not possess either a medical qualification registered in a Medical Register in the United Kingdom or a degree or license of one of the following Universities, *viz.*, Calcutta, Bombay, Madras, Punjab and Allahabad, or the qualification of a Military Assistant Surgeon.

81. The medical officer shall, if not already attached to the ship, immediately on his being appointed to it, proceed on board, report himself to the master, examine and check the medicines and medical stores, and inform himself generally as to the arrangements made for the accommodation of the pilgrims.

82. The medical officer shall also report himself personally to the Inspector with a view to receiving any instructions which that officer may have to give him in connection with his duties and the official inspection of the ship.

83. The medical officer shall be present at the final inspection and, after it has been held and the ship and her arrangements approved, he shall, if statisfied, regarding arrangements for the care and comfort of the pilgrims made in accordance with the rules, furnish a certificate to that effect in Form No. IX, appended to these rules.

84. The medical officer shall provide himself with all the necessary instructions and forms required for the voyage.

85. The medical officer shall attend any medical officer appointed to inspect the pilgrims before embarkation under section 32, or after embarkation under section 33, and shall, with a view to special care or precautions on the voyage, watch those who may appear to be in an infirm or sickly state, and make a note regarding them in his diary.

86. The medical officer shall not leave the ship after the medical inspection has been completed. He shall see that the place set apart for the accommodation of the pilgrims is not encroached upon; that all the pilgrims have access to the upper deck; that good drinking water is readily accessible and duly supplied; that the latrines are attended to by the ship's topases; that a supply of water is at hand for use in the latrines; that suitable hours have been fixed, in communication with the officer in charge of the stores, for the regular issue of daily rations to such of the pilgrims as have to be fed by the ship; and generally that every proper care is taken to secure cleanliness and good sanitary arrangements on board.

87. The medical officer shall satisfy himself that any additional passenger waiting to be taken on board at an intermediate port is not suffering from, or shows no signs or symptoms of, choleraic indisposition or any disease which is, in his opinion, dangerously infectious or contagious.

88. The medical officer shall be jointly responsible with the master for the care of the pilgrims on the voyage, and shall co-operate with the master and officers of the ship for the welfare of the pilgrims.

89. During the voyage from any port in British India (except Aden) the medical officer shall for the first five days daily inspect the pilgrims and observe them individually to assure himself that none of them is affected with cholera, small-pox, yellow fever or plague.

90. The medical officer shall, if he has any doubt as to the quality of the drinking water, draw the attention of the master, in writing, to the provisions of rule 41.

91. The medical officer shall, should any case of infectious or contagious disease occur, satisfy himself that disinfection is performed in the manner prescribed by rule 59 and shall record in his diary the fact that he has done so.

92. (1) The medical officer shall keep up regularly, from day to day throughout the voyage, the following records in connection with his duties, *viz.* :—

(*a*) a medical diary of the principal events of the voyage, briefly and accurately recording all facts in connection with the medical history of the pilgrims, including a record of any advice he may give to the master, and of compliance with or neglect of, such advice;

(*b*) an Admission and Discharge Book of every case brought under treatment in Form No. X appended to these rules; and

(*c*) a Register of Deaths in Form No. XI appended to these rules.

(2) These records shall be written in either English, French, German or Italian.

93. On arrival at the port of debarkation in the Red Sea, the medical officer shall submit his dairy and returns to the Consular authority there for transmission to the Government of India, and shall forward simultaneously a copy of them to the Inspector at the port in British India from which the voyage commenced, and on arrival at any British Indian port to the Chief Customs-officer or to any officer authorized under Section 25 to receive the statements referred to in that section.

MEMORANDUM.

The following extract from a D. O. letter No. 332, dated the 16th December 1910, from the Government Mycologist and Entomologist (Dr. L. C. Coleman) is published for general information:—

"I have just returned from an extended tour through parts of Chitaldrug and Shimoga Districts. One of the objects was to ascertain as accurately as possible the damage done to jola and other dry land cereals by a grasshopper pest which has appeared within the last three or four years in Davangere, Chitaldrug, Jagalur, Channagiri and Honnali Taluks and to inspect the results of work done in combating it at Honnali this year.

First as to the extent of damage,—there is no doubt that the pest has been becoming progressively worse ever since it appeared and I look upon it as the most serious insect pest in Mysore to-day, not from the extent of damage it has done but from its possibilities for the future. As far as I can at present see, unless energetic steps are taken now, it is likely to spread throughout the jola and ragi growing parts of the State. Its spread will no doubt be slow as the grasshopper has no wings and therefore cannot fly, but it will be none the less sure on that account.

The actual area in Mysore seriously attacked this year must be about 7,000 or 8,000 acres. On this whole area I should say the crop has been reduced to one-half by the pest. Where the attack has been worst—and that is probably over more than a thousand acres the loss has been practically a complete one. I should estimate the total loss this year at about Rs. 50,000.

Now as to what we have been doing,—I have had a man stationed at Honnali for about four months trying to persuade the people to take up certain measures to combat the pest. I spent considerable time there myself in the same connection and, as a result, in one village we were able to demonstrate to the satisfaction of the people that the pest can be controlled. The method used was a simple one, *viz.*, catching the young grasshoppers in large bags of a given pattern which are swept over the young crops. The cost of a bag is about one rupee.

In addition another method was attempted. The grasshopper lays its eggs to a great extent in the fields in masses at a depth of about two inches. The young hoppers hatch in July and work their way to the surface through soil above them, which is for the most part quite loose through cultivation. Experiments carried out by me in the laboratory have shown that the young hoppers are not able to push up through more than about 2½ inches of firm soil. It is clear then that if the eggs could be buried to a depth of six or seven inches, most of the young grasshoppers would never reach the surface at all but would die in the ground. This can be done by deep ploughing by means of an improved plough which we are selling, and work was done in this connection at Honnali this year. Unfortunately on account of indifference and opposition on the part of the raiyats, we could get only about sixteen acres ploughed so that this method could not be given a fair test, as grasshoppers naturally came in in large numbers from the surrounding land.

The accompanying photographs taken by me on this tour will give you an idea of the damage done and the work we have done in combating it.

A.—Shows a plot where nothing was done and where the loss is practically a total one. An examination will show that the stalks have been quite devastated of leaves except for the midribs of the leaves which stand out like so many long needles from the stem. In the heads practically every grain has been eaten out leaving simply an empty head. The crop is not worth harvesting for the grain that is left.

B.—This shows a plot not quite so badly attacked there being a few shreds of leaves left and a small amount of grain in the heads.

C.—This shows a plot which was deep ploughed and bagged only twice. The seed was placed far apart which accounts for the thin appearance of the crop. Some damage has been done and there would undoubtedly have been more had not the man's neighbours on practically all sides bagged much more thoroughly than he did so that they helped to save his crop.

D.—This shows jola in a plot which was ploughed deep and bagged 8 times. Last year this plot (8 acres) was the worst affected in the village, the man getting only one candy of grain worth about Rs. 20. This year his is the best crop in the whole neighbourhood, estimated by him at ten candies and by his neighbours at over twelve candies worth over Rs. 200. He places his whole expenses connected with the bagging at Rs. 6. Other crops where bagging was done less thoroughly were not so completely saved, but in all cases the bagging paid for itself many times over.

I have given you this long explanation of the work done, as I wish to make certain proposals in connection with it. It is clear that to get really good results a whole village should co-operate and this is just what they apparently will not do.

* * * * * * * * * *

What I really propose doing is as follows :—

(*a*) *Deep ploughing.*—I want to test this thoroughly on one or two whole villages. The ploughs are fairly expensive costing about Rs. 30. I want to hire ploughs out by the day to the raiyats of these villages charging a fee just sufficient to cover wear, etc. I have estimated it at about two or three annas per day. If the work is successful this year, I have no doubt a number of landholders will go in for ploughs and the following year the operations could be extended to all the affected tracts.

(*b*) *Bagging.*—This should be done in all the affected villages. One fieldman should be appointed temporarily in each affected group of villages to see that the work is thoroughly and systematically done. Coolies would have to be hired to carry out the bagging. The whole of the operations would be under the supervision of two or three permanent members of the staff of this department.

By Order,
C. S. BALASUNDARAM IYER,
Officiating Secretary to Government, General and Revenue Departments.

A.—See paragraph A in text.

B.—See paragraph B in text.

This field is full of weeds which are not turned under and killed by the country plough.

C.—See paragraph C in text.

The improved plough has turned under and killed most of the weeds, thus reducing very much the work of weeding.

Crops harvested.—Kadale, avare and togari in Hassan; hutchellu, kadale and haralu in Hole-Narsipur. The raiyats are generally engaged in the thrashing floor and some to ploughing their lands.

Crops sown.—Kode paddy in Manjarabad.

10. Prospects of the season are good.

11. Except for plague in parts of Hassan, Channarayapatna, Manjarabad and Belur, public health is generally good.

12. Fdder and water are available. Cattle are generally healthy, except in parts of Alur and Salagrama and Kasaba hoblis of Hassan Taluk, where "foot and mouth disease" prevails. Preventive measures are being adopted.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed for sowing in parts of Channagiri, Shikarpur, Sagar and Nagar; sugar cane planting is going on in parts of Shikarpur, transplanting of kar paddy in parts of Sagar Taluk and manuring to the areca trees in Sagar.

Standing crops, such as sugar cane in all parts of the district, except Tirthahalli and Channagiri; Bengal gram in Shimoga, Channagiri, Honnali and Sorab; green and black grams in Sorab; castor seeds in Shikarpur and wheat in Honnali, are in good condition.

Crops harvested.—Sugar cane is being milled in parts of Shimoga, Shikarpur, Sorab, Nagar and Kumsi; paddy in Sorab and Sagar; arecanut in Nagar; ragi, save, navane, jola, avare and togari in Honnali and parts of Channagiri; horse gram in Shimoga, Sorab and Honnali.

10. Prospects of the season are generally good. Food stuffs are available.

11. Public health is generally good but for plague at Gulladahalli and Anchehalli in Shikarpur and Shimoga Taluks, respectively, a few cases of sporadic nature are reported to have occurred in the Shimoga town.

12. Cattle are healthy. Fodder and water are available. "Foot and mouth disease" prevails in parts of Sorab and Kumsi. Wild elephants are said to have destroyed crops in Chordi village of Kumsi Sub-Taluk.

KADUR.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being prepared for sowing in parts of Chikmagalur, Mudgere and Yedahalli.

Crops sown.—Kode paddy in the malnad parts of Chikmagalur.

P. PALPU,
For *Sanitary Commissioner.*

REPORT OF THE HEALTH OFFICER OF BANGALORE CITY FOR THE OFFICIAL YEAR 1907-08 BY A. K. PANI, D.P.H., ETC.

INTRODUCTION.

After having worked for three years in Colombo, a town with a population of over 1,75,000 as Assistant Medical Officer of Health, Acting Medical Officer of Health and as lecturer in Hygiene and Public Health in Ceylon Medical College, I rejoined Mysore service on Government offering me a better status and pay though the prospects are not so good as in Colombo, merely with a patriotic feeling.

For the information of the Government and the Council, I beg leave to quote here an extract from the Colombo Municipal Council's resolutions regarding my work in Colombo.

Municipal Office, Colombo No. 35—7004, *dated* 17*th August* 1907.

"That the resignation of Dr. Pani be accepted and that the Council do record its high appreciation of the good work done by Dr. Pani and the assistance rendered in the cause of sanitation during the past three years."

(Sd.) E. M. D'EC. SHORT,
Chairman Municipal Council and Mayor of Colombo.

I assumed charge of the sanitation of the City from Vice-President Mr. M. G. Krishnaswami Rao and the Plague operations from Mr. D. M. Gnanapriam, Honorary Sub-Assistant Surgeon, on 12th August 1907. Immediately after taking charge, I had to pay attention more to plague preventive measures than to the general sanitation as the disease had broken out in an epidemic form.

Though my appointment was sanctioned, my office establishment was not sanctioned till the latter part of last year; consequently it will be seen that the work turned out in the year under report could not be so very satisfactory as I expected. When I first took charge I found the Sanitary Inspectors not doing systematic public health work, so, much of my time was engaged in organising systematic work, opening out several registers, etc., for tabulating correct statistics and recording the work done by Inspectors.

Out of 4 Sanitary Inspectors, I detailed 2 qualified Sanitary Inspectors for abatement of all nuisances inside premises, for periodical inspections of native hotels, bakeries, sweetmeet shops, aerated water factories, and food stuffs, and the other two unqualified Inspectors for the supervision of scavenging and conservancy of the town.

As this is the first annual report sent from this Department, it took time to train the clerks for this sort of work. Fortunately clerk Tholasingam who was transferred from Sanitary Commissioner's Office being intelligent grasped the statistical work and prepared all the necessary statements, charts, diagrams, etc., and opened necessary registers to prepare reports soon.

Statements, etc., were prepared first for the Calendar year but as the Municipality wanted them for the official year the preparation took further time. As there is now only a few days before me to submit by first annual report it must necessarily be brief.

Vital statistical statements are also appended with diagrams in the form of curves showing rise and fall quarterly and in the form of columns annually comparing with the previous year for ready and easy reference.

It is to be noted that the rates are worked out on the last Census population but not on the estimated population at the middle of the year, on account of recurring epidemic of plague year after year, having raised the death rate considerably higher than the birth rate.

Registration of births and deaths.—As this was not compulsory on the part of the public in the official year under report, the total number of births registered by the special registration staff may be somewhat lower, though the total number of deaths is correct on account of strict supervision exercised over burial and cremation grounds.

Births.—One thousand six hundred and ninty-six births were registered during the official year against 1,487 in the previous year, of these 884 males and 812 females. The increase in the year is probably due to better supervision exercised over Registration Department.

The rate per 1,000 living, calculated on the last Census population for the year under report, is 24·4 against 21·4 of last year, *vide* Statement 1 (*a*) and Diagram 1 (*a*).

Statement No. 1 *and Diagram No.* 1.—Diagram compares in the form of curves birth rate with the death rates quarterly. It will be seen that the birth rate curve is almost a straight line maintaining almost a steady rate throughout the year. Birth rate curve is considerably below the death rates curves owing greatly to the disturbing factor plague and imperfect registration of births.

Statement No. 3 *and Diagram No.* 3.—Show the birth rates quarterly according to Municipal Divisions. It will be seen in the diagram that the curve of 1st and 9th divisions is pretty high owing to the better class of people residing in sanitary houses.

The order of divisions according to birth rates for the year is as follows :—*Vide* diagram No. 8 (A) which shows in ascending order.

1st	...	1st and 9th Divisions.
2nd	...	7th and 8th ,,
3rd	...	4th Division.
4th	...	2nd ,,
5th	...	3rd ,,
6th	...	5th ,,
7th	...	6th ,,

The ratios of 1st and 9th, 7th and 8th cannot be correct as they are worked out on the last Census population of these extensions. Populations of these extensions have increased enormously since, mostly by people migrating from the City proper. Further 1st and 9th Divisions include Maternity Hospital where number of births belonging to various divisions of the city and probably belonging to outside limits are also registered in the divisions. An arrangement has been made from this year to distribute the births to various divisions, etc., concerned.

Statement No. 5 *and Diagram No.* 5.—Show birth rates quarterly according to races. The curves of Europeans and Eurasians are very high but they cannot be compared with other curves as these two races form a minority of the population in a prosperous condition. The curve of Hindus is almost straight and steady throughout the year. The curves of Mahomedans and Christians are lower than Hindus.

Still-births.—There were 127 still-births in the year under report, *vide* Diagram No. 9.

Deaths.—The total number of deaths for the year was 4,260 including 992 deaths from plague; of these 2,240 were males and 2,020 females, with a ratio of 61·34 per 1,000 living against 58·11 giving an increase of 3·23 which is due to plague having broken out in a more severe form than the previous year.

The total deaths excluding plague was 3,268 against 3,465 giving a ratio of 47·5 against 49·9. The rate 47·5 per 1,000 living, ought to have been the legitimate annual death rate but for plague, *vide* Diagram No. 9 and Statement No. 1 (*a*).

Statement No. 1 and Diagram 1 show quarterly death rates. It will be seen that the death rates shot up in 2nd quarter of the official year while they suddenly dropped in 3rd and 4th quarters.

Statement No. 4 *and Diagram No.* 4.—Show quarterly death rates according to divisions. It will be seen that the rates of almost all the divisions have gone high in 2nd quarter dropping in 3rd and 4th quarters of the official year.

Statement No. 8 *and Diagram No.* 8 (*a*).—Show the death rates according to divisions in descending order. The ratios of 1st and 9th and 7th and 8th divisions cannot be correct as they are worked out on the last Census population of these divisions. The populations of these divisions have increased enormously since, mostly by people migrating into these extensions from the city proper. Further 7th and 8th divisions include deaths, that occurred in Victoria Hospital belonging to various divisions and also non-residents of the city. An arrangement has been made from this year to distribute deaths to various divisions, etc., concerned.

Statement No. 6 *and Diagram No.* 6.—Show death rates according to races quarterly. If we exclude Europeans and Eurasians who form a minority of the population, Mahomedan death rate was high being 63·0, *vide* Statement 6 (*a*).

The order is as follows :—

Europeans	69·10	per 1,000 living.
Mahomedans	63·0	
Hindus	61·7	
Eurasians	59·7	
Christians	45·9	

Statement No. 9 shows deaths during different age periods. The following is the order :—

		No. of deaths.
1st	Under 1 year	891
2nd	Above 60 years	555
3rd	21 to 30 years	523
4th	12 to 20 years	505
5th	2 to 5 years	426
6th	6 to 12 years	386
7th	31 to 40 years	380
8th	41 to 50 years	325
9th	51 to 60 years	269

It works out that 43·1 per cent of the total deaths was from 1 to 30 years and 20·9 per cent of the total deaths was under 1 year, making a total of 64 per cent of total deaths of both young and adult lives.

Statements Nos. 7 and 7 (a).—Show deaths due to principal causes in descending order. If we exclude deaths due to plague and old age, the high mortality due to premature births, bronchitis, malarial cachexia which includes all fevers, phthisis, infantile convulsions deserve to receive special attention to find out their causes and prevention.

Infant mortality.—*Vide* Statement 2 and diagram No. 2. There were 891 deaths of children under 1 year. The deaths were mostly due to premature births and infantile convulsions. The causes of these as already stated deserve special attention. The infant death rate for the official year under report is 525 per 1,000 births registered (*vide* diagram No. 9) against 565 in the previous year.

The ratio of Civil and Military Station, Bangalore, for the official year 1906-07 is 345 per 1,000 births registered.

The infant death rate for the city is very high. The principal causes seem to be due to the following :—

(1) Early marriages and weakly parents.
(2) Insanitary surroundings due to accumulation of both solid and liquid refuse, etc.
(3) Improper feeding.
(4) Insufficient clothing and exposure.
(5) Hereditary tendencies with a history of syphilis, scrofula, etc.

Statement No. 2 and diagram No. 2.—Show infant mortality quarterly as compared with previous year 1906-07.

Plague.—*Vide* special report for the corresponding year under report submitted to the President on the 28th August 1908. Plague broke out at the beginning of official year and kept on throughout the year. The total number of attacks was 1,327, deaths 992 against 612 attacks and 478 deaths in the previous official year, *vide* diagram No. 9.

The usual preventive measures such as destroying large number of rats (76,237 against 36,763), evacuation, segregation, disinfection and inoculation were adopted.

Cholera.—There was only one imported case from Rameswaram. The patient and contacts were removed at once to Infectious Diseases Hospital, where the patient died.

Small-pox.—There were 68 cases of small-pox in the year under report. The disease broke out in a sporadic form in different parts of the city. The patients and contacts were isolated in Infectious Diseases Hospital wherever possible, and the usual preventive measures vaccination and disinfection were carried out.

CONSERVANCY AND GENERAL SANITATION.

Conservancy and scavenging of the city are supervised by two unqualified Sanitary Inspectors. The number of scavengers for the extensions ought to be doubled or even trebled to meet the demand in the ever extending extensions. The scavenging refuse of the city is leased out to private contractors who cart the refuse in village carts with U-shaped basket receptacles with no lids whatever. The carts are still in a primitive stage in the premier Municipality in the State. One is shocked to see the night soil of the city carted out in these primitive carts with scavenging refuse. Very often the contents are spilt on the public roads and streets. One can imagine very well how typhoid and cholera infection, etc., can spread. I hope the Council will at least next year have their own model sanitary carts as in other Municipalities.

One hundred and five cess pits have been cleared, filled up and converted into daily conservable closets. There are still a large number of cess pits in the city. Wherever the cess pits are accessible for conservancy purpose, this department issues notices to convert them into daily conservable closets, but the progress made in this direction is not very satisfactory as the people do not heed notices served by the Municipality and repeated warnings and to bring them to their sense of duty, there is no separate court to deal with the Municipal prosecutions in time. A proposal was made to the President to have a separate court with Bench Magistrates and I since learn that it is being considered by Government. At present the Municipality aims at conserving only night soil from daily conservable closets, allowing the urine to flow in public open drains and sewers for want of water-tight special carts.

Newly constructed public latrines by the Municipal Engineer are in accordance with a standard design but the old ones are more a source of nuisance and they should be reconstructed soon.

Internal sanitation of the city (inspection of premises) is looked after by two qualified Sanitary Inspectors who move about with no uniforms whatever. Very often the public do not recognise them and care for their instructions and warnings. As already suggested I hope the Council will soon fit all the Sanitary Inspectors with suitable uniforms for the proper discharge of their duties.

A perusal of the statements showing the work done by Sanitary Inspectors will show that every other premises visited by them has some nuisance or other. To find out and abate more nuisances, the city requires not less than four more qualified Sanitary Inspectors. It is to be noted that money spent in this direction is well spent in the interest of public health. For the improvement of sanitary defects in private houses 2,589 notices were served during the year and 145 prosecutions were instituted and a sum of Rs. 125-12-0 realized in fines against Rs. 37-12-0 in the previous year.

Proposals made by this department during the year are for the following :—

(1) For compulsory registration of births and deaths.
(2) „ compulsory vaccination.
(3) „ control of dairies and milk supply, *vide* special report No. 589, dated 23rd March 1908.
(4) „ Building Regulations in detail.
(5) „ compulsory notification of infectious diseases and their control.
(6) „ control over native hotels, bakeries, sweetmeat shops, refreshment rooms and ærated water factories.

First and 2nd are passed by the Council and Government, 4th and 6th are receiving their attention and are likely to be passed. I am glad to state that the draft bye-laws still under consideration under (6) for native hotels, etc., are more or less put into force and there is striking improvement already and the hotels, etc., are brought more or less under strict control.

There are 10 bakeries, 18 sweetmeat shops and 53 native hotels in the city. By constant and strict supervision of this department, the floors of all these have been paved with Cuddappah slabs and pointed with cement with sufficient slope for washing daily, the sides of walls to a height of 4 feet have been rendered impervious by cement plastering, chimneys have been greatly improved and enlarged for the proper escape of smoke, and more windows have been opened to admit more light and air, the kneaders in bakeries have been forced to wear white clean aprons. What remains now to be done in sweetmeat shops is to force the vendors to expose all sweets, etc., in glass show cases to prevent contamination from dust, flies and bad odours. Bye-laws that are soon to be brought into force will enforce these as well. Small vendors of sweets and other eatables in bazaars and markets are forced to expose them for sale in glass show cases.

Statistics are being collected to find out which of the areas in the city are malarious and an attempt is made to deal with anopheles breeding pools in the city.

Becteriological examination of public water-supply is undertaken by the Government Bacteriologist and as the records are not in this office they are omitted in the report.

Vaccination.—This was not compulsory in the year under report. There are two vaccinators and a vaccinatrix moving round the city, in addition, vaccination is done in all the Municipal and Government Dispensaries in the city. 1,318 vaccinations were performed in the year against 1,244 in the previous year, of these 1,209 were successful, *vide* Appendix XIX.

Work done by Municipal midwives.—There are 6 qualified Municipal midwives in the city against 5 in the previous year. The number of labour cases conducted in the year is 273 when 1,696 births were registered in the same year. In only 16 per cent of the births, aid of qualified midwives is sought for the rest were managed by unqualified midwives. This is no doubt one of the main causes for still-births. If the qualified midwives were to attend on all labour cases they would be able to perform artificial respiration on new-born infants when they are still and breathless.

Finding that the infant death rate was high, I recently instructed the midwives to attend to all recent births soon after the information reaches them to see that both the mother and infant are properly attended to and to make themselves more popular and useful in the city. It is a common practice to dress the raw navel cords with ash and other dirty stuffs probably containing tetanus bacillus and when infants get tetanus, deaths are incorrectly returned as infantile convulsions. To prevent this, midwives are strictly instructed to see that all new-born infants' navel cords are properly dressed with Iodoform and Boric Acid till they dry, drop and the parts heal.

A check is maintained over Municipal midwives' work to see that they attend to labour cases scientifically with all antiseptics precautions, and occasional lectures are given to them in the office to keep them to the required standard.

Dispensaries.—There are 3 Municipal and 2 Government Dispensaries in the city, the Hospital Assistants in charge of these continued to act as Registrars of Births and Deaths with a subordinate staff to assist them in this work.

All the Hospital Assistants being very elderly and senior men of old school, causes of deaths are not correctly certified. I think a change with younger men of recent schools will mend matters, but this is a matter for the consideration of the Senior Surgeon.

Health Officer.

Health Office, Bangalore, dated 23rd March 1908.

From—The Health Officer, City Municipal Council, Bangalore.

To—The President, City Municipal Council, Bangalore.

SIR,

I have to honor to submit my report on the state of the dairies within Municipal limits with a set of draft bye-laws, to keep them under Municipal control for the sake of cleanliness of the dairy premises and for the proper protection of milk and milk products from contamination, consistent with Municipal Regulation, Section 48, (Rule (*e*) (1 & 2).

On my assuming charge of the City, I visited several dairies in the City and on finding almost all the dairies situated in most crowded and insanitary localities and kept in most filthy state possible, I arranged to get detailed statistics but with my little time at my disposal on account of plague, I was not able to report on the same earlier. In all civilised cities the dairies receive the constant attention of the Health Department next to infectious diseases as several of the infectious diseases are carried through milk which acts as a very good liquid medium for all disease producing germs to grow in it.

From the annexed statement it will be seen that there are 301 dairies where milk and milk-products are kept for sale, out of these only 8 dairies are detached from the dwellings, the remaining 293 are attached to dwellings under the same roof with bipeds and quadrapeds living together. The number of people living in 301 dairies is 1,453 roughly 5 times more than the dairies that is, for every dairy there are on an average about 5 persons living in it, the number of milch cattle and calves is about 1,846 *i.e.*, 1,453 people connected with the dairies live with 1,856 cattle under the same roof. As I have said above only 8 dairies are somewhat detached, the remaining 293 are attached, that is, the cattle are tied in the verandahs of houses with few windows of houses opening directly into cattle-sheds. One could very well imagine the purpose these windows serve, that is, they suck in all imaginable foul and vitiated air from cattle sheds into dwellings when the windows act as inlets. Invariably the houses of these dairymen are regular dungeons, to add to this, the dairymen are often seen tying the calves inside their dwelling houses to prevent them from getting loose at nights and sucking all milk from their mothers.

The cattle-sheds are low roofed, the mean height is less than 5 feet and in sheds where it is high, the height is miserably reduced by an attic where the dairyman stores the fodder for want of room elsewhere. The cattle are so closely tied in the sheds that there is hardly an inter space of two or three feet so that the poor cattle can be seen one rubbing against another. The floor of the sheds are mostly irregularly and unevenly paved so to speak with several pieces of granite slabs thus allowing the dung and urine to accumulate and stagnate in crevices. One could very well imagine the state of bodies of cattle that lie on such floors especially the udder and teats. There is no such thing as drainage to carry away the washings of the cattle-shed, if at all there is any, it is very imperfect and deficient and washings are drained deliberately into street open sewers or drains, the consequence is, there is strong ammonical smell all along the drains.

The dung is either allowed to accumulate in the dairy premises or manufactured into bratties and dried on every available open place making the premises still more insanitary. In several of the dairies there are shallow wells, the water of which is freely used for washing cattle, dairy premises and milk vessels. In one instance I have seen a well without a parapet wall in a cattle shed which at times receives cattle-shed washings into it and in another a shallow well surrounded with cess-pits within three feet from the well. Very often it is the water from these wells that is used for washing milk vessels and probably for adulterating milk as well. If one were to visit these wells he would not be surprised to hear of several cases of fever in the town most of them if verified will be typhoid. I learn that most of the milk is supplied to supplement the milk in dairies in Cantonment. As regards storage of milk in dairies it is stored in any part of the dwelling house more often in sleeping apartments and left lying in open vessels on dusty floor under dusty roof.

When the milk is hawked about or taken out in the streets early in the morning for sale, it is invariably carried in open vessels and thus allowed to be contaminated by dust storms raised by Municipal sweepers and by flies.

In a way the cattle are more lucky than the dairywomen as they are taken out for open air to such open places as Cubbon Park, etc., for grazing, whereas the poor dairywomen are always in vitiated air generated in cattle-sheds.

The insanitary and filthy condition of the dairies and the overcrowding of cattle in the dairies in congested localities can better be imagined by a visit than by a description of any sort here.

It may not be out of place to mention here for the information of the Council members the various ways by which milk is contaminated from the time it is milked to the time it is consumed. Milk as it contains all the necessary constituents of a perfect diet, is the most fertile liquid for the transmission of disease due to the fact that milk is organic fluid derived from an animal in the puerperal condition, a highly neutritive liquid for the growth of organism gaining access to it, liable to fermentative and putrifactive changes, and rapidly absorbes gases of diffusive substances in its proximity.

Bacteria or impurities are present everywhere. Milk as it contains substances on which they can live, thrive, and grow and reproduce, offers a suitable and not less luxurious nidus or home and it absorbs gases easily.

No matter how clean our houses or our premises of business are kept, still, we find this little beings invisible to the naked eye, but their presence can be demonstrated only by the microscope. Cleanliness both personal and of the surroundings lessens the quantity and the number of bacteria or germs, and also diminishes a great deal of their existence. The bacteria that may be present in milk is observed say, when milk is left in a vessel undisturbed sometime about 6 hours, the cream the lightest of its constituents rises to the top of the vessel and at the same time we will notice that it becomes sour and that it has acquired an acid taste. Further, as stated above, the milk has strong power of absorbing gases. It will be manifest how careful we have to be to keep milk in closed vessels.

Some diseases can be traced to or propagated by the use of bad or contaminated milk. Many a disease and many an epidemic are traceable to bad milk or to milk that has become contaminated with germs characteristic of different diseases.

Epidemic of enterics fever, cholera, diarrhœa, tuberculosis, have been traced to have their source besides water, to milk and in such a case the admixture of it with foul and dirty water. Besides these diseases that may be derived from contamination of milk by infected individuals, or by gases and vapours, or by water, used for cleansing and dilution; certain other diseases may be transmitted without human or external agency, the milk cows themselves being the subjects of disease. Foot and mouth disease, tuberculosis may be so communicated.

The contamination or pollution of milk may occur either at dairies, or during the conveyance of milk.

Re : the dairies.—The fouling of milk by the bacteria of different diseases mentioned above may be caused either by dairyman himself or any of his help-mates suffering from an infectious disease, or by some outsider who has been attending on or nursing a person down with an illness, coming to the dairy on business or otherwise.

Firstly, then we have the dairyman or persons frequenting the dairies as a cause of spreading an infectious disease, by imparting to the milk, germs peculiar to the disease.

Secondly, infectious disease when propagated by the use of dirty water from lake, tanks and wells in which excreta of persons ailing from an infectious disease have been dropped in accidently or rain water that has dissolved the excreta has been allowed to percolate, that is to say drip in through the earth into the well.

Thirdly, we have the clothes used for wiping or cleansing the utensils of milk as the means of spreading infectious disease. These clothes may have been used by a person having disease or they have been in the room occupied by a person ailing exposed to the discharges carried to them by air as that of cough (tuberculosis); or these clothes may have been heaped together with sick persons suffering from Typoid or Cholera, or even with linen that was imperfectly cleansed that is the germs of which were not killed by disinfectants. In the next place in connection with the dairies there is the pollution of milk by the use of dirty and filthy water in cleaning the milk-cans, etc., and by giving impure water for the cows to drink.

During transit, milk may be contaminated if carried in open pails or vessels. Unless kept in clean vessels with properly fitting covers, it is a source of danger as the dust that flies off from the streets is sure to fall in or flies that have been feasting on some refuse of putrifactive matter may come to sip it and may fall into it accidently. Those who take the milk from house to house may be the source of spreading and causing an epidemic either by diluting it with impure water or by using measures that have been soiled.

Contamination then broadly speaking may be aerial, that is carried on by air or water borne. The deduction that we can draw from above are (1) that the dairymen, the distributors and the milk sellers are to be in good health and that they have nothing to do with the cows or in the cow-sheds if they themselves are ailing with an infectious disease or are in attendance on one who has it. (2) That they should use pure clean water for all purposes. (3) That they should have clean utensils washed in clean water and if wiping be necessary to be done with clean cloth set apart for the purpose and the vessels protected with well fitting covers.

Disease in cows :—So far as disease in cow is concerned, the precautions that appear necessary are any disease of the udder and teats, this should disqualify the milk for the use of food. That a milch cow is suffering from any disease or disturbance of health be immediately isolated, and the milk not used until pronounced free from disease by Veterinary Surgeon.

While recommending to enforce strictly the bye-laws relating to the dairies, I would strongly recommend the construction of a few model dairies with quarters for dairymen in different parts of the City. Sooner this question is taken up by the Council, the better it is for the public I would consider the major portion of the nuisance in the City caused by these insanitary dairies to have abated and with it, the serious risk the public run by consuming highly polluted milk and milk products which form the chief neutrient food for vegetarians.

No. 498—Enc. 2.

Office of the Municipal Council, (Health Department), Bangalore City, dated 29th January 1908.

From—*The Health Officer, Bangalore City.*

To—*The President, City Municipal Council, Bangalore.*

SIR,

I have the honor to inform that I have visited most of the bakeries, sweet-meat shops and native hotels in the City and submit the following report on the same with draft by-laws required under Municipal Regulation 48 (*c*) for early adoption in the City.

Almost all the bakeries, sweet-meet shops and native hotels are situated in main roads where frequent dust-storms are raised both by heavy traffic and by people passing and re-passing. Most of the bakeries, sweet-meat shops and small native hotels are small hovels measuring roughly 15'×10'×8'. The front portion of these premises is set apart for a stall to expose bread, biscuits, sweets and cooked food, etc., to constant action of dust, flies and bad odours wafted from street drains; the middle portion is set apart for storing flour, sugar, etc., on damp, dusty and pervious floor, with a low dirty table on which kneeding is done in bakeries by the kneaders with extremely filthy clothes on and at times with sweat dropping on the table.

Very often the kneader is seen sitting comfortably on the kneading table with his dirty feet on and weighing the dough.

The rear part of these premises is reserved for oven for baking or preparing sweet-meats, food, etc., with any amount of rubbish scattered indiscriminately and heaped all round.

The racks, moulds and vessels used in these places are kept extremely filthy so much so that one could actually scrape out a thick layer of muck.

Water stored in these places is not at all wholesome, as it contains a lot of floating impurities and is very scanty both for proper cleanliness and use in the premises.

The floor and walls of these premises are quite pervious, full of dust with sticky muck and are indiscriminately used by the workmen for spitting and wiping nasal discharges.

This is the description of these premises in short.

The innocent workmen and the buyers seem to labour under false impression that flour sugar and food stuffs used in the preparation in these places, however they may be, contaminated by the dirty condition of these premises, by the persons engaged in them and by the water used, matters very little so long as the bread, biscuits sweets and food are backed or cooked at a high temperature, but, I may point out that it has been proved that if typhoid germs, etc., happen to get into dough (through dirty water) which is baked at a very high temperature, the heat generated is not enough to kill the germs in the middle of the loaf.

Further, bread freshly baked and taken out is very thirsty for all gases; consequently if exposed to roadside to foul odours absorbs all bad gases.

Other sweets and cooked food are similarly contaminated more especially when kept exposed to dust, flies and bad odours.

I shall briefly describe the dangers of such contamination.

Fortunately, the germs that produce diseases have no wings to fly about, but they generally stick to the surface of floating impurities present in the atmosphere. So stuck, they get wafted and settle on food-stuffs exposed to dust.

Another danger that is more serious is caused by our unavoidable companion domestic-fly which feeds both on filth of all sorts and food-stuffs of man alteranately and drops at times its poisonous excreta innocently on exposed cooked food, etc.

While feeding on cholera, typhoid or dysenteric evacuations the flies take into their stomachs the germs that produce these deadly diseases and pass the same out in their tiny drop of excreta (unfortunately without their being least affected) but in a more deadly form. As a rule, very large number of disease producing germs such as cholera, typhoid, dysentery and consumptive diseases, stick on to the slender legs of flies when they settle on such discharges and are wiped on food-stuffs, etc.

Briefly these are the dangers to which our food-stuffs, plates, trays, etc., are constantly exposed in our crowded bazaars.

I therefore recommend that the draft bye-laws which I have carefully drafted, after consulting Colombo and Bangalore Contonment bye-laws, and modified and improved to suit the local requirements, be adopted early for the proper control, management and keeping of bakeries, sweet-meat shops and native hotels, etc. If necessary, they may be cast into legal phraseology with penalties.

In conclusion, I am glad to inform that since my assuming charge of the city with very little time at my disposal owing to plague which requires my first attention, some of the bakeries, sweet-meat shops and native hotels have been paved with Cuddappa slabs and walls pleastered with cement to the height of 4 feet whitewashed and kept fairly clean at my advice as well as that of qualified Inspectors.

A rough statement showing the number of bakeries, sweet-meat shops and native hotels is annexed.

I have, etc.,

BANGALORE CITY MUNICIPALITY.

Notice dated the 27th March 1909.

Notice is hereby given under Section 48, clause 2, of the Mysore Municipal Regulation of 1906, that the following Draft Bye-laws having been approved by the Municipal Council of the Bangalore City will be taken into consideration with a view to their being brought into force on or after the 1st of July 1909, together with any objections which may be received before that date :—

Draft Bye-law *re* bakeries and sweet-meat shops framed under Section 48 (*c*) of the Mysore Municipal Regulation of 1906.

I. (1) No place shall be used as a bakery or a sweet-meat shop without an annual license from the President.

(2) No license shall be granted unless the building is spacious and suitable for a bakery or sweet-meat shop.

II. The person applying for an annual license shall before so doing cause or procure to be laid into the premises a water connection from the watermain and shall cause such connection and all fittings thereof to be kept in a proper order and efficient action so as to provide for use on the premises a sufficient supply of water for the purpose of thoroughly washing and cleaning such premises.

III. The walls of every bakery or sweat-meat shop shall be rendered impervious to the extent of four feet from ground level by cement plastering and the rest plastered with chunam and whitewashed; the whole floor either cemented or paved with Cuddappah slabs with cement pointing and drainage sufficiently provided.

(2) No part of a bakery or a sweat-meat shop shall be within thirty feet of any cess-pit or latrine nor in a position where bad odours wafted therefrom shall reach it.

IV. No place used as bakery or sweet-meat shop shall be used for any other purpose whatsoever.

V. All utensils and other furniture shall be kept clean.

VI. The flour, sugar, ghee, water and other materials used in the manufacture of bread and sweet-meat shall be good and wholesome. There shall be a separate store-room or receptacle for flour and sugar and no flour or sugar shall be left lying on the floor or against wall in any part of the bakery or sweet-meat shop.

VII. All refuse and dirt in and about the premises shall be swept off and the drains well flushed and the premises at all times maintained in a clean and tidy condition.

VIII. No person suffering from a contagious infectious or loathsome disease or who has recently been in attendance on such person or who is unwashed or otherwise unclean shall be employed in a bakery or sweet-meat shop and all kneaders engaged in kneading shall wear white, clean, linen or cotton aprons to cover entirely their front part of the body from neck to knees.

IX. A bakery or sweet-meat shop includes any building or part of a building used for any process connected with the baking of bread or preparation of sweets for sale.

(2) No person shall soil the kneading table in any way.

X. No person shall transport bread or sweet-meat from any one place to any other place, except in a closed vehicle or a closed basket, tin or other receptacle, every such vehicle, basket, tin or other receptacle shall at all times be kept thoroughly clean and no person shall commit any act which may tend to render any bread or sweet-meat which are being transported dirty or unwholesome.

XI. All papers and stitched leaves used for wrapping bread, sweets, etc., shall be clean and stored in a clean rack.

XII. Bread, sweets, etc., shall be stored and kept for sale in glass show-cases and all reasonable precautions shall be taken from contamination from flies, dust and bad odours. Any person who shall appear, act or behave as the person in charge of a bakery or sweet-meat shops shall be deemed and taken to be the keeper or manager thereof.

XIII. A sign-board to be put up to show that the bakery or sweet-meat shop is licensed.

XIV. Whoever without obtaining a license as required by these bye-laws uses any place for bakery, or sweet-meat shop shall be liable on conviction to a fine not exceeding Rs. 50 and a further fine which may extend to Rs. 5 for every day after such conviction during which he continues to use such place for such purposes.

Draft Bye-law *re* native hotels or eating-houses, framed under Section (*c*) of the Mysore Municipal Regulation of 1906.

I. (1) An eating-house or hotel includes any house or place where cooked rice, mutton, beaf, poultry, vegetables, dhall and confectionery or refreshments including chappaties, rice-cakes, tea, coffee, etc., are prepared and kept for sale.

(2) No place shall be used as an eating-house without an annual license from the President.

(3) No license shall be granted unless the building is spacious and suitable for an eating-house.

II. (1) Water connection will be insisted on where the President thinks that the business is carried on on large scale.

(2) The water used in the premises for drinking purposes shall be from Public Water supply (Hessarghatta water) and shall be boiled and kept clean and free from floating impurities in a suitable covered clean receptacle.

The water receptacles shall be provided with a tap so that the water may be drawn off and placed in a clean place a foot above the ground level.

III. (1) The walls of every eating-house shall be impervious, plastered and paved with flooring stones.

(2) Kitchen and bath-rooms to be well ventilated and provided with proper smoke vents so that smoke may not pervade into other dwelling-rooms. All rooms in eating-houses shall be well lighted and ventilated.

(3) The proprietor or the person in charge shall not allow persons to dine in any other place, but the dining hall.

IV. (1) All utensils and other furniture shall be kept clean and all metallic vessels used in the cooking or for keeping food-stuffs, shall have a continual lining of tin and no lead vessels of any sort shall be used for any purpose. All reasonable precautions shall be taken to preserve cooked food, pastry, sweet-meats, confectionery or preserved, dried or cut fruit intended for human consumption from contamination from flies, dust and bad odours.

(2) No food-stuff of any sort shall be stored or exposed for sale in the premises, which is stale, unwholesome, offensive or in any way unfit for human consumption.

(3) All refuse and dirt in and about the premises shall be swept off and the drains well flushed and the premises at all times maintained in a clean and tidy condition. There shall be sufficient latrine accommodation and the latrine shall be kept clean and the night-soil shall be covered with ashes or earth.

V. No person suffering from a contagious, infectious or loathsome disease or who has recently been in attendance on such person or who is unwashed or otherwise unclean shall be employed in an eating-house.

VI. (1) All premises and all cooked and uncooked food-stuffs, vessels, shall at all times be open to inspection by the President, the Health Officer or other officer authorized on their behalf.

(2) All cases of dangerous infectious diseases such as cholera, plague, eruptive fevers, such as small pox, chicken pox, measels and fevers of more than seven days duration shall be notified to the President forthwith.

VII. No person shall, after passing of these bye-laws, keep or manage an eating-house without obtaining license, within seven days of his commencing to keep or manage such eating house; and in the case of such eating-houses already existing at the time these bye-laws come into operation within thirty days of the coming into operation of these bye-laws.

Any person who shall appear, act or behave as the person in charge of an eating-house shall be deemed and taken to be the keeper or manager thereof.

VIII. A sign-board to be put up to show that the native hotel or eating-house is licensed.

IX. Whoever without obtaining a license as required by these bye-laws uses any place for eating-house shall be liable on conviction to a fine not exceeding Rs. 50 and a further fine which may extend to Rs. 5 for every day after such conviction during which he continues to use such place for such purposes.

Draft Bye-laws *re* manufacture, preparation and sale of ice and ærated waters framed under Section 48 (*c*) of the Mysore Municipal Regulation of 1906.

1. No place shall be used for the manufacture or preparation for sale of ice or ærated waters unless licensed for the purpose.

2. Any person wishing to use any premises for the said purposes shall apply to the President for a license. The President may, in his discretion, grant or refuse such license.

3. Application shall be made to the President before the end of the first month of each official year for the renewal of all licenses granted under this bye-law.

4. Fees at the rate of Rs. 50 for ice manufactory and Rs. 100 for ærated water manufactory shall be charged for licenses granted under these bye-laws.

The following conditions shall be attached to all licenses granted under its Bye-law for any of the following purpose :—

(1) *Manufacture of Ice.*

(*a*) Water to be converted into ice shall be drawn only from such sources as are approved of by the President.

(*b*) Such water shall not be carried in massacks or in any other vessels not approved of by the President.

(*c*) Carts employed for the carriage of such water shall be kept on the premises and shall have the designation of the factory painted on the barrel and shall at all times be kept in a state of scrupulous cleanliness.

(*d*) Ice factory premises shall be kept in a state of scrupulous cleanliness and thoroughly drained of all waste water.

(*e*) It shall be lawful for the Health Officer or any Municipal Sanitary Inspector to enter any place used for the manufacture or sale of ice at any time when such place is open, to inspect or to take a sample of ice which is there manufactured or kept for sale, and any proprietor or person in charge of such place who shall refuse to permit to take such sample shall be guilty of an offence. Such sample shall be forthwith forwarded to Government Chemical Examiner and Bacteriologist and if a certificate from him states that such sample is unfit for human consumption shall be evidence that it is so unfit until the contrary is proved and the proprietor or the manager of any place used for the manufacture or sale of ice, from which place any such sample was taken which proved to be unfit for human consumption shall be guilty of an offence.

(2) *Manufacture of Aerated Waters.*

(*a*) All water to be manufactured into ærated waters shall be boiled before use and be kept while cooling in a suitable covered vessel.

(*b*) If the water be filtered after boiling, the filtering vessels and materials shall be sterilized at such times and in such manner as the President may direct.

(*c*) All water to be used for washing bottles shall be stored in closed iron vessels and be treated before use with permanganate of potassium in such manner as the President may direct.

(*d*) The room in which ærated waters are manufactured shall be properly roofed and kept clean and in good repair ; the walls shall be plastered with mortar and shall be limewashed at least once in three months ; the floor shall be flagged, tiled or cemented so as to be impervious to water and shall be properly drained.

(*e*) All water to be manufactured into ærated waters or to be used for washing bottles shall be drawn only from sources approved of by the President.

(*f*) Such water shall not be carried in massacks or in any other vessels not approved of by the President.

(*g*) Carts employed for the carriage of such water shall be kept on the premises, shall have the designation of the factory painted on the barrel and shall at all times be kept in a state of scrupulous cleanliness.

(*h*) The premises and all appliances used in the manufacture shall be opened to inspection at all reasonable times by the President, the Health Officer or any other Municipal Officer.

(*i*) No ærated waters of any kind shall be issued from the manufactory without having a proper label on each bottle, giving full name and address of the manufacturer.

It shall be lawful for the Health Officer or any Municipal Sanitary Inspector to enter any place used for the manufacture or sale of ærated waters at any time when such place is open to inspect or to take a sample of bottles of any kind of ærated waters which are there manufactured or kept for sale and any proprietor or person in charge of such place who shall refuse to permit to take such sample shall be guilty of an offence. Such samples shall be forthwith forwarded to Government, Chemical Examiner and Bacteriologist and if a certificate from him states that such sample is unfit for human consumption shall be evidence that it is so unfit until the contrary is proved, and the proprietor or the manager of any place used for the manufacture or sale of ærated waters, from which place any such sample was taken which proved to be unfit for human consumption, shall be guilty of an offence.

A breach of any condition of any license granted under this Bye-law either for ice or ærated water manufactory shall render the holder of the license and the person in charge of the place licensed, liable on conviction to a fine not exceeding Rs. 20 and to a further fine which may extend to Rs. 5 for every day after such conviction during which the breach continues.

The Mysore Gazette

PUBLISHED BY AUTHORITY.

BANGALORE, THURSDAY, MARCH 16, 1911.

NOTIFICATION.

No. R. 5125—Agri. 77-10-3, dated 7th March 1911.

OFFICIAL MEMORANDUM.

The accompanying report of the Deputy Commissioner, Bangalore District, on the measures adopted by certain private gentlemen for the manufacture of jaggory is hereby published for general information.

By Order,

C. S. BALASUNDARAM IYER,

Officiating Secretary to Government, General and Revenue Departments.

Letter No. R. C. 444, dated the 7—8th December 1910, from the Deputy Commissioner, Bangalore District, to the Revenue Commissioner in Mysore.

With reference to your Memo No. 12077, dated the 27th May 1910, forwarding copy of your letter No. 12076, dated the 27th May 1910, to the Secretary to Government, General and Revenue Departments, *re* improving the quality of jaggory and calling for a full report on the measures adopted by Messrs. Urgehalli Krishniengar, Guruva Reddi and Agaram Rama Reddi for the manufacture of jaggory, etc., I have the honour to state that Mr. C. S. Kuppusami Iyengar, Assistant Commissioner, Clospet Sub-Division, and Mr. A. Hayes, the then acting Assistant Commissioner and Civil Officer, Bangalore, were deputed for personal inspection of the plant and machinery set up by the above raiyats with a request to submit a full and clear report on the operations connected, the measure of success so far achieved and necessity for expert guidance and help. Each of the above officers has submitted a detailed report on the points asked for. The reports which are expansive and give the necessary information are enclosed herein in original.

2. From the report of Mr. Kuppusami Iyengar, it will be seen that 38 acres have now been planted with sugar cane by Mr. Urgehalli Krishniengar and the number of shoots is estimated at 3 lakhs. The engine installed by this gentleman is being worked by a local trained man and no necessity is felt for expert advice. The number of men employed for work daily is said to be 150 and the mill is reported to be working between 16 to 18 hours a day.

3. Mr. A. Hayes personally inspected the mills employed by Messrs. Guruva Reddi and Agaram Rama Reddi, both these mills working from 6 A.M. to 6 P.M. and the number of coolies employed being 50 and 80 respectively. From this officer's report it will be seen that these two raiyats have planted sugar cane on an average extent of 50 and 20 acres of land respectively and the number of shoots is estimated at about 5 lakhs and 2 lakhs. The machinery employed by these two persons stopped action on one or two occasions when expert men had to be sent for on this ground. Messrs. Guruva Reddi and Rama Reddi represented to Mr. Hayes that they require expert advice and guidance as the want of adequate knowledge of the machinery and its working causes much inconvenience at times.

4. It is evident from the Assistant Commissioners' reports that milling with machine is much more profitable than milling with iron mills worked by bullocks.

ENCLOSURE No. I.

Report of Mr. C. S. Cuppusami Iyengar, Assistant Commissioner, dated 14th November 1910.

As desired, I paid a visit to the Urgehalli Kayamgutta village yesterday morning. Mr. Krishniengar met me and took me round the estate.

2. He has installed an oil engine (6½ H. P.) of the Hornsby patent and works a centrifugal pump, a sugar cane mill and a ragi thrashing machine with it. The oil engine was got from Messrs. Massey and Co., Madras, and the sugar cane mill was imported from A. W. Smith & Co., Glasgow. Each of them is said to have cost Rs. 1,700. Both of them were installed in January 1906, and cane was milled with the power mill in 1906, 1907, 1908 and 1909. There was no sugar cane crop in 1910. Now 38 acres have been planted with sugar cane and the number of shoots is estimated at 3 lakhs. The cane will be ready for milling in January. Mr. Krishniengar explained to me the working of the oil engine and the mill. He told me that the mill is worked between 16 to 18 hours a day, that about 150 men are engaged each day and that the quantity of jaggory made per day is 200 maunds of 27 lbs. Milling with engine-power is said to be about 40 to 50 per cent more profitable than the old method of milling with iron mills worked by bullock power. It is also said that the engine power mill, gives 25 per cent more juice. Mr. Krishniengar thinks that it will take about 2½ months to mill three lakhs of cane.

3. No sugar is made for the present. Mr. Krishniengar, informed me that he intends ordering for sugar evaporating plant.

4. The oil engine is being worked by a locally trained man and has till now given no trouble. Mr. Krishniengar does not feel any need for expert advice.

5. A loan of Rs. 9,000 has been sanctioned. Mr. Krishniengar has taken only Rs. 2,000 out of it and has utilised the amount in getting out the pumping plant, construction of wells for pumping purposes, etc. He says he will take the balance of the loan when he orders for the sugar evaporating plant.

6. The oil engine, mill, etc., are installed in a building roofed with corrugated iron. Eight pans have been provided for heating the juice and these are also placed in the same building.

7. The engine is also used to work the pump when the tanks become dry and water is required for irrigation purposes.

ENCLOSURE No. II.

Report of Mr. A. Hayes, Acting Assistant Commissioner.

In obedience to No. 2926, dated the 8th June 1910, I beg to submit the following report regarding the sugar cane mill imported by Guruva Reddi of Hudi. I have already separately submitted a report regarding the mill imported by Rama Reddi and a copy of which I have enclosed herein.

Kundlahalli.
Kaggadasa Basavanpura.

This Guruva Reddi pays about Rs. 1,000 kandayam towards Government and owns the marginally noted jodi villages of this taluk.

He plants on an average yearly about 40 to 50 acres with sugar cane and the number of canes raised may roughly be estimated at about five lakhs.

In October 1908, Guruva Reddi secured a loan of Rs. 5,000 from Government and imported the following machinery :—

	Rs.
One sugar cane crushing mill for	2,000
One oil engine	2,000
Implements and tools	500

and the remaining Rs. 500 he spent on erecting buildings to locate the machinery.

The machinery arrived in February 1909 and has worked for the last two seasons of 1909 and 1910. The engine is one of 7½ horse power of the Hornsby patent and the sugar cane mill is one the kind which are now being imported for engine-power.

Guruva Reddi has not erected proper buildings for the plant and ovens, he has put up temporary sheds at Jodi Kundlahalli village in which he has for the present located the machinery, and has carried out the jaggory manufacture for the last two years.

The mill used to work from 6 A.M. to 6 P.M. daily and the number of coolies employed was on an average about 50, and the quantity of jaggory turned out from the 14 ovens daily was 20 bags of seven maunds each.

Guruva Reddi informs me that he intends erecting a large building at a cost of about Rs. 3,000 for this purpose in the near future, with arrangements for the manufacture of refined sugar also ; and is in need of expert advice for which he means to apply for to Government.

I am informed that the machinery gave trouble on three or four occasions and stopped action, when men from Bangalore and Urgalli had to be called in to set it right, and on one occasion an expert had to be sent from Messrs. Massey & Co., and that great inconvenience was consequently experienced.

As compared with the old system I am informed that the work of milling the cane and converting it into jaggory by the improved methods, can be done in quarter of the time ; with a great deal of saving in manual and animal labour even though the cane is at present carted to the site of the mill from several villages ; and the yeild is also reported to be 20 per cent in excess of the old system.

In conclusion, I beg to add that it was strongly represented to me, during my visits to these villages that great inconvenience was experienced for want of adequate knowledge of the machinery and its working, and in some cases, serious loss was also hazarded owing to the machinery suddenly coming to a dead stop which was afterwards attributed to very trifling causes thereby establishing a great necessity for expert guidance in these cases, the necessity for which is further enhanced by the intention on the part of Guruva Reddi to manufacture refined sugar in the near future.

MEMORANDUM.

As personally directed I beg to submit the following report in connection with the sugar cane crushing mill imported by Rama Reddi of Agara village, Begur hobli, Bangalore Taluk.

2. This Rama Reddy, is a wealthy raiyat of the Vakkaliga community paying about Rs. 2,000 kandayam, he owns about 100 head of cattle, a few of which are the finest specimen available in these parts.

3. He informs me that he first conceived the idea of importing a sugar cane mill while attending the lectures at the Agricultural Exhibition at Mysore about the year 1908.

4. Subsequently after hearing of Mr. Urgahalli Krishniengar and Guruva Reddy, having imported similar mills he ordered one from Europe through Messrs. Massey & Co., while the oil engine was purchased from a firm in Calcutta.

The mill cost about Rs. 2,000 and the oil engine with its appurtenances about Rs. 2,000 also. They arrived about the end of last year, after the milling season, and had to be kept by till a building was ready.

5. While the machinery was on its way, Rama Reddy, applied to the Deputy Commissioner and obtained the land in front of the village for an upset price of Rs. 27 and soon after the arrival of the machinery, he laid the foundation of a massive building 100 feet long by 40 feet wide. It is built of granite to the height of 10 feet, above which a brick wall raises the height to about 18 feet all around. The roofing is composed of large iron trusses and teakwood covered over with Mangalore tiles.

6. There are ovens for 12 pans, and the construction of the ovens together with the underground tunnel to convey smoke, and the immense chimney which is, partly finished, reflect great credit on the ingenuity of Rama Reddy. I may mention that Rama Reddy is illiterate, but his powers of perception and his natural intelligence are great. He informs me that he derived his ideas about the construction of this building and the erection of the plant from the Tileworks at the City of Bangalore to which he was supplying firewood.

7. The cost of the building is roughly estimated about Rs. 5,000 inclusive of the cost of iron trusses. He intends enlarging the building by running a verandah all round, to afford shelter to the workmen and also for the erection of a paddy husking machine and a threshing mill.

8. As regards the working of the mill itself, he informs me that he commenced work on the 5th March 1910, but that he felt great trouble in getting the machinery into working order, so much so that it stopped working on one or two occasions, so as to necessitate experts being brought in to advice him, and finally he was compelled to appoint a native driver on a salary of Rs. 20 per mensem.

9. The average extent of land planted by Rama Reddy, annually is about 20 acres and the number of shoots sown, is on an average about two lakhs and the work of milling this quantity of mature cane used to extend for about three months with 5 ordinary iron mills, and 23 pairs of bullocks working both day and night. But this year a larger extent was planted with 3 lakhs of shoots in view of the arrival of the mill.

10. The work of milling which commenced on the 5th March 1910, will lost till about the 4th June 1910. The mill had to be stopped for about 21 days in April, owing to the village jatra and rain, so that with all the stoppages an interval of about 4 weeks of 28 days has to be excluded from the period the mill has been working, thus bringing the period down to about 2 months.

11. The mill works from 6 A.M. to 6 P.M.; and the number of coolies employed is 80. The average yield per diem is 18 bags of sugar or jaggory weighing 7 maunds each or 126 maunds of 25 lbs. each.

12. Rama Reddy informs me that even with this large number of coolies the mill is not sufficiently fed with canes and that the number of ovens are also insufficient to cope with the mill, considering all the difficulties they had to contend with and the increased quantity of three lakhs of canes milled. This year, he feels that the work has been completed with a great deal of saving in time and labour.

13. The benefits which have therefore accrued by this improved method, I am informed, are despatch of work, saving of deteriorating labour to live stock and increased yield roughly about 20 per cent.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE,
Dated Bangalore, the 6th April 1911.

A. RANGASWAMI IYENGAR,
Revenue Commissioner.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE.

No. 9746—53, *dated* 22*nd*—24*th March* 1911.

OFFICIAL MEMORANDUM.

Subject.

Statements received from the Deputy Commissioners of Districts, showing the retail prices of food grains and other articles for the half-year ending the 30th September 1910.

Recorded.

2. The half-yearly statements of retail prices hitherto published districtwar will, in future, be published talukwar in accordance with Government Order No. R. 446-55—Agri. 6-10-2, dated the 25th July 1910, to facilitate the collection by the Survey Department of statistics of prices of food grains.

3. The statements from all the districts, except Kadur and Chitaldrug, contained many mistakes and had to be returned for revision and resubmission. Hence the delay in publishing the statistics.

4. Considering the importance of the statistics contained in the half-yearly prices returns in regard to future revision settlement operations, the Deputy Commissioners are requested to bestow greater attention on the correct preparation of the statements.

A. RANGASWAMIENGAR,
Revenue Commissioner.

To—The Deputy Commissioners of Districts.

Statement showing the prices of food grains and other articles that prevailed in the Bangalore District for the half-year ending on 30th September 1910.

Chief Observer in charge.

REPORT OF THE HEALTH OFFICER OF BANGALORE CITY FOR THE OFFICIAL YEAR ENDING 30TH JUNE 1910, (1909-10)

BY A. K. PANI, L.M.S., D.P.H., ETC.

During the year under report, Mr. B. Krishna Rao, L.M.S., L.S.Sc., continued to act as Health Officer from the commencement of the year up to 4th February 1910 and handed over charge of the office to Mr. A. K. Pani, the permanent incumbent on the forenoon of the 5th February 1910.

The Health Officer continued to be *ex-officio* Vice-President in matters relating to Public Health and an *ex-officio* member of the Municipal Council, as sanctioned in Government Proceedings Nos. 6483-6—Ml. 127-07-13, dated 12th January 1909 and 3633—Ml. 52-09-3, dated the 14th October 1909, respectively, and also a member of the committee appointed in Government Proceedings No. 5352-3—Ml. 143-08, dated 4th December 1908, to draw up a scheme for the improvement of City with a view to relieve congestion.

During the year under report, the Government in their Notification No. 6881—San. 106-07, dated 8th February 1910, conferred on the Municipal Council all the powers specified under sub-section 2 of Section 144 of the Municipal Regulation, regarding the prevention of dangerous diseases.

Government in their Proceedings No. 12364—San. 196-08-2, dated 9th June 1909, ordered that vaccination should be compulsory for a further period of a year from 1st July 1909, in continuation of a year sanctioned in Notification No. 12698—Medl. 67-07-11, dated 5th June 1908.

Government in their Notification No. 9987—Ml. 397-08-7, dated 4th May 1910, declared that sub-section 2 of Section 142 of the Municipal Regulation, be made applicable to certain articles of food and drink therein mentioned.

The following bye-laws framed under Section 48 (1) of the Municipal Regulation are pending sanction of Government.

1. Rules for regulating bakeries, sweetmeat shops, native hotels, manufacture, preparation and sale of articles of drink;

2. Regulation of structures and buildings.

VITAL STATISTICS.

Statements are appended with diagrams in the forms of curves showing rise and fall quarterly comparing with the previous year, for ready and easy reference.

It is to be noted that the rates are worked out on the last Census population but not on the estimated population at the middle of the year on account of recurring epidemic of plague year after year, having raised the death-rate considerably higher than the birth-rate.

Registration of Births and Deaths.—The total number of births registered during the year under report was not so satisfactory as it ought to be owing to the ignorance on the part of the public of the rules recently passed by Government making Registration of Births and Deaths compulsory.

It would take some time more to arrive at the correct Registration of Births and Deaths and to enforce the bye-law in its entirety. The total number of deaths is correct on account of strict supervision exercised over burial and cremation grounds and prosecutions instituted in few cases against those who failed to register deaths within a day as required by the bye-law.

Births.—The births registered during the year 1909-10, exclusive of still-births numbered 1,985 against 2,137 in the previous year. Of these 1,044 males and 941 females against 1,119 males and 1,018 females respectively in the previous year. The rate per 1,000 living calculated on the last Census population for the year under report was 28·5 against 30·7 of last year *vide* Statement A.

Statement No. 1 and Diagram No. 1.—Diagram compares in the form of curves birth and death-rates with those of the previous year quarterly. It will be seen that the birth-rate curve is considerably below the death-rate curve owing probably to the non-registration of all the births that took place.

Statement No. 3 and Diagram No. 3.—Show the birth rates quarterly according to Municipal Divisions. It will be seen in the diagram that the curve of 4th Division is pretty high owing mostly to the existence of Maternity Hospital and partly to the division being thickly populated.

Statement No. 3 and Diagram No. 3.—The order of Divisions according to birth-rates for the year under report was as follows :—

1st	... ...	... 4th Division.
2nd	... ...	... 7th and 8th Divisions.
3rd	... ...	... 2nd Division.
4th	... ...	... 3rd Division.
5th	... ...	... 5th Division.
6th	... ...	... 1st and 9th Divisions.
7th	... ...	... 6th Division.

The birth-rate of 4th Division is high owing to the inclusion of births in the Maternity Hospital, where number of births belonging to various Divisions of the City and probably belonging to outside limits are also registered in the Division, besides being thickly populated.

According to Nationality.—The births registered among Hindus during the year were 1,742; among Mahomedans 131; among Native Christians 72; among Eurasians 30; and among Europeans 10.

The ratio being 30·2 among Hindus; 15·2 among Mahomedans 26·3 among Native Christians; 111·9 among Eurasians; and 40·6 among Europeans. *Vide* Statement A.

Still-births.—There were 84 still-births in the year under report against 41 in the previous year, showing a proportion of 4·2 per cent of the live births.

The high percentage of still-births is mostly due to the women in labour, being attended to by unqualified Midwives (barber women) and the elderly old women who profess to be Midwives. To throw the Municipal qualified Midwives more at the disposal of the public, signboards are put up this year in all the Dispensaries that their services are obtained free and to know their residence another signboard is put up against their houses.

Deaths.—The total number of deaths for the year was 3,155 including deaths from plague; of these 1,639 males 1,516 females with a ratio of 45·4 per 1,000 living against 49·0 in the previous year, showing a decrease of 3·6 which is due to plague having broken out in a milder form than in the previous year.

The total deaths excluding plague was 3,058 against 3,219 in the previous year, giving a ratio of 44·03 against 46·3. The rate 44·03 per 1,000 living ought to have been the legitimate annual death-rate but for plague.

Statement No. 1 and Diagram No. 1.—Show quarterly death-rates. It will be seen that the death-rate curve has fallen down gradually in the 2nd, 3rd and 4th quarters.

Statement No. 4 and Diagram No. 4.—Show quarterly death-rates according to Divisions. It will be seen in the Diagram that the curve of 7th Division is pretty high in the first quarter and has dropped down in the second quarter.

The death-rate curve of 7th Division has gone high in the first quarter owing to the inclusion of deaths that occurred in the Victoria Hospital, belonging to various divisions and also non-residents of the City. Arrangements having been made in the second quarter to distribute such deaths to various Divisions concerned, the curve has dropped down in the remaining quarters of the year.

According to Nationality.—The deaths registered among the Europeans during the year were 9; among Eurasians 24; among Native Christians 136; among Mahomedans 392; and among Hindus 2,594; the ratio being 36·5 among Europeans; 89·5 among Eurasians; 50·4 among Native Christians; 45·7 among Mahomedans and 44·9 among Hindus *vide* Statement A.

The following is the order of deaths arranged according to different age periods :—

		Deaths.
1st	under 1 year	833
2nd	above 60 years	488
3rd	21 to 30 years	357
4th	2 to 5 years	346
5th	12 to 20 years	291
6th	31 to 40 years	227
7th	41 to 50 years	223
8th	51 to 60 years	197
9th	6 to 12 years	193

The heaviest mortality was as usual among infants under one year of age, returning 419·6 deaths per 1,000 births registered.

Statement No. 5 and Diagram No. 5.—Show deaths due to principal causes in descending order. The high mortality is due to Bronchitis and Infantile Convulsions.

Infant Mortality.—Statement No. 2 and Diagram No. 2 show infant mortality quarterly as compared with previous year 1908-09. There were 833 deaths among children under one year against 925 in the previous year. The deaths were mostly due to premature births and infantile convulsions. The infant death rate for the year under report is 419·6 per 1,000 births registered against 432·8 in the previous year. The infant death rate is generally high in the City.

Taking the local conditions of the City into account, the infantile death-rate under 12 months should not exceed 100 per 1,000 births, whereas it is 419·6 for the year.

It is shocking to find nearly more than a third of the new-born dying away before they could count upon a year and as this is the chief index of the sanitary condition of the City, it can very well be inferred how very insanitary the City proper is. The insanitation in City proper is due to ill-ventilated houses being packed together in narrow lanes with defective drainage. One of the chief remedies to prevent the high infant mortality is to improve the City proper once for all as early as possible instead of slow patch work here and there. The financial condition of the council being very poor, the council would do very well to raise a loan of at least 8 lakhs of Rupees and improve the City quickly to save the infants who if survived would keep up balance and even over-weigh the general death-rate which ought to be in all prosperous Cities.

The principal causes seem to be due, to the following as pointed out in the report of the year 1907-08 :—

(1) Early marriages and weakly parents.
(2) Insanitary surroundings due to accumulation of both solid and liquid refuses, etc.
(3) Improper feeding, this includes adulterated and highly polluted milk.
(4) Insufficient clothing and exposure and
(5) Hereditary tendencies with a history of Syphilis, Scrofula, etc.

The number of prosecutions instituted during the year for failing to register births and deaths within the time allowed by the bye-law was 7. In 4 cases, conviction was obtained and the remaining cases are pending disposal. The total amount of fines imposed was Rs. 2-4-0.

During the year under report the number of applications received for extracts from the register of births was 3 and from the death register 96. Of these 2 extracts of births and 93 of deaths were granted.

Plague.—Vide special report for the corresponding year under report submitted to the President, City Municipal Council.

Plague broke out at the beginning of the official year and kept on till April 1910. The total number of attacks and deaths was 128 and 97 against 246 and 185 respectively in the year previous.

The usual preventive measures such as destruction of large number of rats (2,09,299 against 1,50,139) and disinfection of infected houses were adopted. As compulsory segregation of patients and contacts are not in force, the persons concerned were advised and persuaded and whoever were willing removed to Isolation Hospital.

Inoculation.—The number of persons inoculated during the year under report by the two Inoculating Officers temporarily appointed for the purpose and by the Health Officer was 6,435 against 257 in the previous year and the amount of reward paid to poor persons at annas 4 for adults and annas 2 for children was Rs. 1,110-4-0. It is worthy of note that Municipal Councillors Messrs. Mahomed Gouse Razvi Saib and Audiappa, evinced great interest in persuading people to avail themselves of the advantage of being inoculated by offering grain doles, etc., to the poor besides reward.

Cholera.—There were 25 attacks and 23 deaths from cholera for the year under report. Of these 11 were reported to be imported from Kengari, Nanjangud and Dodballapur and those that were willing were removed to the Infectious Diseases Hospital. The out-break having become known at its commencement and the seasonal condition not being favorable to its spread, the necessary preventive measures adopted on the occasion, brought the disease under control.

Small-pox.—There were 52 attacks and 29 deaths from small-pox in the year under report. The disease broke out in a sporadic form in different parts of the City. Some of the patients and contacts who consented to go to the Infectious Diseases Hospital, were admitted and the usual preventive measures such as vaccination and disinfection were carried out.

CONSERVANCY AND GENERAL SANITATION.

The conservancy and scavenging of the whole City are being solely supervised by one unqualified Senior Sanitary Inspector. Out of the three qualified Sanitary Inspectors, two are attending to internal sanitation and one devotes all his time to cess collection work, a work which should entirely be outside the zone of this Department.

The number of toties and sweepers engaged were 126 and 244 respectively. This number being inadequate to cope with the work, an additional staff consisting of 12 toties and 8 sweepers was provided for in the budget of 1909-10 and Government sanction was obtained for their entertainment in the latter part of the year, for conserving the drains and latrines in the City and in the extensions recently handed over by the Sanitary Engineering Department.

Internal sanitation of the City is looked after by 2 qualified Sanitary Inspectors who move about in their area and make house to house visit noting the sanitary defects found therein, for the purpose of issuing notices to abate such defects. A perusal of the statement No. B shows the work done by the Sanitary Inspectors. From which, it can be seen that almost every other premises visited by them has some nuisance or other especially in the City proper.

Close and extended acquaintance with the general sanitary condition of the City and its people would lead one to conclude that ample work exists for four more Sanitary Inspectors.

Excluding one qualified Sanitary Inspector deputed for cess collections, the remaining three have visited 5,597 premises in the year and found 2,000 houses wherein sanitary defects existed.

1,926 notices were issued under different sections of the Municipal Regulation, out of which 674 were complied with and prosecutions instituted in 150 cases against 58 in the year previous. Of these 101 were for not closing cesspits, 12 for not providing house connection drains; 9 for building without license; 7 for not removing

rank vegetation and the remaining 21 for failure to abate other nuisances. *Vide* Statement C.

Statement D shows the details of nuisances abated under different sections of the Municipal Regulation. The night-soil and street refuse were leased out to private contractors who cart the same to their fields outside the City limits with sufficient number of carts.

138 dustbins were purchased and distributed among several divisions during the year.

Removal of congestions.—Although the total area included within Municipal limits is extensive when compared with the population occupying it, yet overcrowding does occur to a considerable degree in the heart of the City proper. In 2nd, 3rd and 4th Divisions the houses are so closely packed that majority of houses are occupied by more than one family. The Municipal Council is making a move in the way of opening out congested portions by acquiring lands and opening new lanes, etc.

Mosquito destruction.—Systematic oiling of pools and ponds that cannot be drained or filled up in the City limits, with gas works liquid-waste and kerosene oil was introduced in the latter part of the year. The staff of this department during their rounds try to educate the public all about mosquitoes.

Vaccination.—This continued to be compulsory during the year under report. There were two vaccinators and a vaccinatrix moving round the City and vaccination was also done in all the Municipal and Government Dispensaries in the City. The number of cases vaccinated during the official year 1909-10 by the vaccinators as well as by the Registrars of Births and Deaths in charge of dispensaries was 2,482 against 3,920 in the previous year; of these 2,083 were successful and in the remaining cases results could not be verified and are shown as unknown. *Vide* Statement E.

Work done by Municipal Midwives.—There were 6 qualified midwives in the City. The number of labour cases conducted in the year was 357 when 1,985 births were registered in the same year. In only 17 per cent of the births, aid of qualified midwives was sought for and the rest were managed by unqualified midwives. This is no doubt one of the main causes for still-births. If the qualified midwives were to attend on all labour cases, they would be able to perform artificial respiration, on new-born infants when they are still and breathless in most cases. *Vide* Statement F.

Dispensaries.—There were 3 Municipal and 2 Government Dispensaries in the City. The Hospital Assistants in charge of these continued to act as Registrars of Births and Deaths with a subordinate staff to assist them in this work.

In the year under report, the public water-supply has been much improved by the substitution of Jewell filters in place of sand filters which is decidedly a better filter for the supply, which occasionally becomes very muddy during and after rains. The supply is regularly being examined by the Government Bacteriologist once a week and reports sent to the Sanitary Commissioner. The standard of purity has been good and has improved considerably ever since the introduction of Jewell filter.

The most urgent needs for the City are :—

I. Providing uniforms to Sanitary Inspectors.

II. Increasing the number of qualified Sanitary Inspectors.

III. Placing large sum of money at the disposal of the council for the speedy improvement of the City proper.

IV. Providing model dairies and bringing other dairies under control.

V. Registration of "dhobies" and construction of model "dhobikhanas."

VI. Providing an up-to-date steam disinfector in a building specially built for the purpose.

VII. Providing horse model ambulance for conveyance of patients to Infectious Disease Hospital.

The special recommendation for the above will follow from time to time as the funds are available.

A. K. PANI,
Health Officer.

CIRCULAR No. 3.

Koleroga of Supari.

The work in connection with Koleroga of Supari for the summer of 1911 is already being arranged for. During the summer of 1910 spraying was done in 46 different gardens. In most cases where Koleroga appeared in any part of the garden a record was kept, at the harvest, of the damage done on the sprayed portion and on a kotte-tied portion of equal extent close beside it. Records are, thus, available from twenty-two gardens and in all of these, with two exceptions, spraying has given better results than kotte-tying. In almost all cases where no record could be kept, owing to lack of sufficient staff for the purpose, a statement was received from the garden-owner that spraying had been decidedly better than kotte-tying. In one of the two cases where spraying did not give better results than kotte-tying, the losses on the sprayed area were practically the same as on the kotte-tied area (9 per cent of loss on sprayed area, 8·6 per cent of loss on kotte-tied area). In the other case (Basti in Nagar Taluk) the sprayed part of the garden had been leased from the owner and he had therefore no interest in looking after the crop and no officer of the Department was available to look after the garden. The result was that a number of the best bunches were removed before the proper harvest and no account of them could be kept. How many were removed is not known but in all probability the number was fairly large as only 328 bunches remained on 358 trees, a number which is exceedingly small. It is clear then that the results from this garden cannot be taken into consideration.

An examination of the records from the other gardens shows that spraying has given a better result than kotte-tying, varying from 1 per cent to 26 per cent or about one-fourth of the crop. The following table shows in a general way just how much better spraying has proved than kotte-tying in the garden where records were kept :—

Spraying has saved between 1% and 5% more crop than kotte-tying (In most of these cases the attack had been light and the loss was comparatively small.)	in 8 gardens
Spraying has saved between 5% and 10% more crop than kotte-tying	in 4 gardens
Spraying has saved between 10% to 15% more crop than kotte-tying	in 4 gardens
Spraying has saved between 15% and 20% more crop than kotte-tying	in 2 gardens
Spraying has saved between 20% and 30% more crop than kotte-tying	in 2 gardens

In all the other gardens except the two mentioned above, there was either no attack whatever or the attack on the sprayed area was very much lighter than that on the kotte-tied area. It was found impossible to keep a record in all the gardens, so those were chosen for the purpose where the results were least satisfactory.

In a few cases (seven out of the forty-six) a second spraying was given to some of the trees that had been previously sprayed. This was necessary, partly at least, on account of the extreme length of duration of the monsoon in 1910 which extended up to October. This second spraying was done towards the end of August or in September and in every case stopped the spread of the disease at once. Where the rainfall is very heavy and the monsoon is prolonged such a second treatment of some of the trees will be necessary, and if done properly, and at the right time will pay for itself many times.

Now as to the cost of materials, an accurate account was kept of the amount of materials used in each garden and the number of trees sprayed, and from these figures an estimate of the cost per 400 trees has been made. There has been considerable difference in the cost in different gardens due in part to the size and number of the bunches and in part to the fact that a good deal of material has been

wasted in some cases. The following table shows the cost in some of the gardens:—

Cost of material per 400 trees.	Number of gardens.
Re. 1 to Rs. 1-15-0	in 2 gardens.
Rs. 2 to „ 3	„ 18 „
Rs. 3 to „ 4	„ 19 „
Rs. 4 to „ 5	„ 4 „
Above Rs. 5	„ 3 „

The total expenses of spraying including the wages of climbers has been furnished by fifteen of the garden-owners and has varied between Rs. 5-10-0 and Rs. 15-3-0. In only five of the fifteen cases have the total expenses exceeded Rs. 8 per 400 trees which can be taken as about the lowest rate at which the tying of kottes alone could be done on this number of trees leaving out of account altogether the cost of the kottes.

Up to the present over 100 applications have been received from garden-owners for spraying in their gardens in 1911. This number will be greatly increased within the next few weeks and all those wishing to try spraying should make application at once as it is possible that not all the applications can be accepted owing to lack of staff and sprayers. Applications should be addressed to me at Bangalore up to the 12th of May and after that date to Mr. M. K. Venkata Rao, Assistant Mycologist at Talaguppe (for Sagar and Nagar Taluks), and to Fieldman Stephen Ansir at Tirthahalli (for Tirthahalli and Koppa Taluks). These two officers will also receive applications in person at any time.

The formula that has been employed in preparing the Bordeaux mixture for treating the Koleroga of Supari consists of 5 lbs. of copper sulphate (blue stone) and 5 lbs. of unslaked lime in 25 gallons of water. The copper sulphate is dissolved in 12 gallons of water in a wooden vessel (an earthenware one would also do but in no case should an iron vessel be used). This is best done by placing the copper sulphate pounded up rather fine in a coarse cloth bag and suspending it in the water till it is entirely dissolved. The lime is placed in another vessel which may be of wood, earthenware or iron, and water is slowly sprinkled over it till the lumps of lime have broken up into fine particles. Then the whole of the twelve gallons of water may be poured in with constant stirring. To make the completed mixture, equal quantities of lime water and copper sulphate solution are taken and poured into a third vessel with constant stirring or the lime water is poured into the solution of copper sulphate. The completed mixture should have a light blue colour (on no account green) and should leave no deposit of copper on a clean knife-blade dipped into it for half a minute. The adhesive used is made by mixing 2 lbs. of resin, such as used by tinsmiths, and 1 lb. of washing soda and adding to this one gallon of water. The whole is then heated for about an hour till the mass has become quite clear.

For those who are not familiar with the above weights and measures, it may be noted that one gallon is equal to 4 measuring seers and one pound is equal to 40 tolas.

The mixture used is therefore made up as follows:—

(*a*) 5 lbs. of copper sulphate dissolved in 12 gallons of water.

(*b*) 5 lbs. of lime slaked in 12 gallons of water.

(*c*) 2 lbs. of resin and 1 lb. of soda heated in one gallon water till quite clear (about an hour),

(*b*) is poured into (*a*) accompanied by constant stirring and then (*c*) is added to make up the completed mixture.

It need hardly be pointed out that any quantity can be made up at one time down to one gallon of the completed mixture, it being only necessary to keep the same proportions throughout. In practice it is always wise to make up just sufficient for one day's work as the mixture should be used fresh. Where only small wooden or earthenware vessels are available it will be necessary to make up smaller quantities at a time.

* Suspicious case of cholera.

S. V. RAMASWAMIENGAR,
For *Sanitary Commissioner with the Government of Mysore.*

The following Circular of the Government of Bombay is republished :—

General Department, No. 5616, dated 11th November 1910.

CIRCULAR.

The Haj Committee of Bombay, which consists of a number of Muhammadan gentlemen of the city, have recently brought to the notice of the Government of Bombay that large numbers of pilgrims start on their journey to Mecca with money just sufficient to enable them to reach that place, trusting to obtain sufficient charitable assistance for the return journey. On their return many reach Bombay, but have no money to meet the expense of the further journey to their homes in the interior of India or elsewhere. The Committee recommend that the pilgrims should be enjoined either to purchase return railway tickets or to deposit with the Protector of Pilgrims, Bombay, sufficient money to cover the return railway fare before embarkation. His Excellency in Council is in cordial sympathy with the object of this recommendation since the adoption of either of the courses suggested would prevent much avoidable suffering to returning Hajis.

2. His Excellency in Council considers, however, that intending pilgrims may well be reminded of the precepts of the Koran on the subject, more especially of those which enjoined that sufficient provision should be made for the journey. He accordingly desires to draw the attention of all Muhammadans to the following extracts from the Koran and other authoritative works dealing with the Haj, so that all may understand what the great teachers of Islam have laid down :—

I. *Koran Chapter II* (Sale) lays down : " Make provision (for your journey) but the best provision is piety : and fear me, O ye of understanding." The reason for this verse, is given in Sahi Bukhari, Volume VI, Chapter 1410, and in *tradition No. 736, Mishkat, Volume II*, to the following effect :—

The son of Abbas says that the people of Yemen used to go on the Haj without providing sufficient food for their journey, declaring that they placed reliance upon God, and after reaching Mecca used to beg. Therefore, God sent down this verse (from heaven).

II. *Koran Chapter III* (Sale) : " And it is a duty towards God (incumbent) on those who are *able* to go thither to visit this house." Foot note in Sale's translation " According to an exposition of this passage attributed to Muhammad, he is supposed to be able to perform the pilgrimage who can supply himself with provisions for the journey and a beast to ride upon. Al Safai has decided that those who have money enough, if they cannot go themselves, must hire some other to go in their room. Malek Ebu Aus thinks he is to be reckoned *able* who is strong and healthy, and can bear the fatigue of the journey on foot, if he has no beast to ride, and can also earn his living by the way. But Abu Hanifa is of opinion that both *money sufficient* and *health of body* are requisite to make the pilgrimage a duty."

Tradition No. 730, Mishkat Volume II : " Another man asked ' O messenger of God, what should be provided for the journey.' He replied ' sufficient food and conveyance.' "

Tradition No. 729 : " The son of Umer says that one came unto the prophet—may peace be upon him—and asked him ' O messenger of God, what makes the Haj Obligatory ? ' He replied that (it is obligatory upon him) who has sufficient for the expenses of the journey and conveyance."

3. In addition to the above, the *Nurul Hidaya*, (Book of the Haj), recognised by the Hanafis, and the *Matalud Minh Shafai*, recognised by the Shafais, both lay down that a pilgrim must have sufficient funds for the journey.

4. It is clear from the destitution prevailing amongst return Hajis that sufficient heed has not been given to these wise commands by pious pilgrims. Much hardship and suffering are thus endured every year, while the increasing number of indigent pilgrims imposes a burden now becoming intolerable on the responsible authorities who have to find the requisite funds for their repatriation. His Excellency in Council, while thus bringing to notice the injunctions of Islam on the subject of the Haj and the hardship and suffering entailed by their neglect, desires to disclaim any intention of interfering with this great religious journey. Beyond the sanitary precautions rendered necessary by international agreement, which moreover are highly desirable in the interests of the health of the pilgrims themselves, it is not intended by these orders to place any restrictions on pious Muhammadans desiring to undertake a pilgrimage to Mecca. The object in view is to remind intending pilgrims that sufficient provision for the journey has been laid down in the Koran, in the traditions of the prophet and by the great interpreters of Islam as obligatory on all intending pilgrims.

5. It would ensure the safe return of outgoing pilgrims to their homes if, as recommended by the Haj Committee, outgoing pilgrims obtained return railway tickets or deposited with the Commissioner of Police, Bombay, through the Protector of Pilgrims, an amount sufficient to cover the expenses of the journey from Bombay to their homes before embarkation at Bombay.

PROSPECTUS OF THE DASARA EXHIBITION OF 1911.

Introductory.—With the sanction of the Government of His Highness the Maharaja of Mysore, the Committee issue the following Prospectus in connection with the Exhibition of 1911.

2. *Opening of the Exhibition.*—This year the Exhibition will be opened to the public from the 25th of September to the 15th of October, both days inclusive. The cattle (local) and poultry shows will begin on Wednesday the 4th October and close on Saturday 7th.

3. *Object of the Exhibition.*—The primary aim of the Committee is to impart to the Exhibition an educative character and to bring together articles, machinery and processes, the use of which it is desirable to bring to the notice of the raiyat, artizan and the manufacturer by actual demonstration. But as the exhibition of a single specimen may not afford full information and may not be sufficiently attractive to the visiting public, articles intended for sale will also be admitted.

Sale rooms and sale of exhibits.—Articles on a larger scale sent merely for sale will have to be kept in separate stalls and in charge of the exhibitors or their agents. There is no objection to the sale of actual exhibits; but they will not be allowed to be removed from the Exhibition grounds till the termination of the Show. Articles admitted for purposes of sale alone may be removed after purchase. No article will be allowed to leave the Exhibition grounds without a gate pass. Those who desire special facilities for the sale of articles or demonstration of processes, are requested to place themselves in communication with the Secretary to the Exhibition Committee.

4. *Horticultural Show.*—The horticultural show comprising Class II, Group 2, items 1 to 7, mentioned in the first section of the Prospectus, will be held on the 4th of October 1911 and kept open till the following day.

5. *Lectures.*—Written notes on subjects connected with Agriculture and Industry will be thankfully received and printed in book forms for distribution at the Exhibition.

Demonstrations.—Arrangements will be made for holding a competition on the Exhibition grounds in Ploughing, Weaving and Pottery work, Carving and Metal work. The exact time of demonstrations will be announced later on by hand-bills and notices.

6. *Donations.*—The Committee will thankfully accept donations for awarding prizes or medals from individuals or associations desiring to give an impetus to any special branch of agriculture or industry.

7. *Classification of exhibits.*—The classification of exhibits will be according to the prize list subjoined to the Prospectus and entries in several sections should be made in the application forms prescribed.

8. *Open to all India.*—The Committee invite exhibits from all the districts of the State as well as from outside. They also appeal to the various agricultural departments and associations in other parts of India, Burma and Ceylon to help them with exhibits and suggestions.

9. *Judges.*—Leading raiyats and non-official gentlemen will be invited to assist the Committee in judging the exhibits.

10. *Admission fees for visitors.*—An admission fee of annas two per head will be levied each time a person enters the Exhibition buildings. Season Tickets will be issued at Rs. 1-8-0 per head. These are not transferable, but books of eight single tickets may be had also at Re. 1 per book. Return railway season tickets between Bangalore and Mysore at a reduced rate, which will also admit to the Exhibition for the whole period, will be arranged for.

RULES AND REGULATIONS.

Noxious articles.—Explosives or any substance noxious or dangerous will not be admitted by the Committee.

2. *Particulars regarding the exhibits.*—Intending exhibitors are requested to send to the Secretary to the Exhibition Committee, particulars of exhibits they intend to forward and the amount of space which their exhibits may take up, in the necessary entry form appended to this Prospectus. Forms may also be obtained from the District, Divisional and Taluk Offices or from the Secretary to the Committee; plain paper of foolscap size, may also be used provided all the headings in the form are properly copied and filled up and separate sheets should be used for each section.

3. *Applications from exhibitors.*—Applications should reach the Secretary not later than 15th August 1911. Each application should contain a post card with the full address of the exhibitor and the receipt of the application will be communicated by return of the card.

4. *Lists from taluks.*—Deputy Commissioners of Districts with the District Committee, Sub-Divisional Officers and Amildars of Taluks, are requested to convene, as early as possible, a meeting of the leading artizans, raiyats and merchants residing within their respective charges, to explain to them fully the object and the scope of the Exhibition, to carefully

acquaint them with the rules and regulations, drawing particular attention to such paras as 2, 3, 10, etc., to send to this office for information copies of proceedings of District and Taluk Committee Meetings, to distribute to them forms of applications, to have them filled up by intending exhibitors and to compile and forward them to the Secretary.

5. *Articles not enumerated.*—The classified list of prizes will show the nature of articles which can compete at the Exhibition. Articles not specially enumerated in the prize list may, however, be admitted by the Committee at their discretion.

6. *No fees to be charged for exhibits.*—No fees will be charged for the admission or registration of exhibits or for the space allowed for them.

7. *Acceptance of exhibits.*—The Committee reserve to themselves absolute discretion as regards the acceptance or rejection of exhibits and the allotment of space covered or uncovered.

8. *Delivery of exhibits.*—Articles intended for the Exhibition may be brought by the exhibitor or his agent or servant and delivered at the Exhibition grounds or sent by post or railway and all taluk and district *exhibits should be sent through the Deputy Commissioners o Districts* with a consolidated list of exhibits and exhibitors in duplicate (before the 10th September) one of which will be checked, receipted and returned by the Secretary.

9. *Payment of freight and transport charges.*—No exhibits in respect of which the necessary freight or transport charges have not been paid by the exhibitor, will be accepted by the Committee.

10. *List of particulars.*—All packages received or delivered and all implements and machinery intended for the Exhibition must bear a label specifying name and number of exhibits and the registered number of the exhibitor and must be addressed to the Secretary. They must contain a list in duplicate showing the name or description of the article, its price, the place of production or manufacture, name of the manufacturer or exhibitor; in the case of exhibits in the agricultural section, essential particulars should be given, such as—

1. The season of sowing.
2. The soil on which they are grown.
3. The quantity of seed per acre.
4. The manure used.
5. Whether any irrigation is required.
6. The time required for the maturing of the crop.
7. The average yield per acre.
8. Any other interesting details regarding cultivation.

11. *Exhibits which have already won prizes.*—Exhibits which have won prizes or medals in the previous Mysore Exhibitions shall be precluded from competing for prizes, though there is no objection to their being accepted for purposes of show or sale.

12. *Date of delivery of the exhibits.*—Intending exhibitors are requested to send the exhibits so as to reach Mysore on the 25th August 1911, from which date the Committee will arrange to take charge of exhibits, *and no exhibits should arrive later than the 10th of September 1911.*

13. *Belated exhibits.*—Articles that are not delivered at the Exhibition Hall in the time fixed, may be admitted at the discretion of the Committee subsequent to the date in para 12, but they shall not find an entry in the official Hand-book if the exhibitors fail to furnish at least the accurate lists of exhibits within the prescribed time.

14. *Perishable articles.*—Vegetables, fruits and other perishable articles may, however, be delivered at the Exhibition Hall till 7 P.M. on the 3rd October 1911.

15. *Responsibility of exhibitors.*—Exhibitors will have to pay every expense of transit, delivery, fixing and removing their exhibits and they must either personally or by their agents or servants superintend their reception and removal, in default of which, the Committee reserve to themselves the right of doing whatever may be considered necessary at the expense of the exhibitor.

16. *Committee accept no responsibility.*—No responsibility shall be accepted by the Committee for any damage to or loss of exhibits howsoever occurring.

17. *Special facilities.*—Exhibitors are requested to mention in their applications whether they wish to illustrate practically any process of manufacture or the working of any implement or machinery and if so, to state briefly the nature of the demonstration and any special facilities they require for mounting their machinery.

The Committee will be glad to give such aid as may be possible in the shape of getting skilled or unskilled manual labour at the exhibitor's expense. The expenses for any special facilities sought for demonstrating machinery and implements should be borne by the exhibitor except where special arrangements have been made by the Committee.

18. *Valuable exhibits.*—All valuable exhibits must invariably be forwarded and kept under the charge of an attender.

19. *Exhibits unaccompanied by men in charge.*—Exhibitors who are unable to attend personally or send their agents in charge of exhibits, may make special arrangements with the

Committee for the exhibition of their goods on payment in advance in full, of the estimated expense.

20. *Weighing of exhibits.*—The Committee entrust the work of receiving the exhibits to responsible officials. But as the goods are landed near the Exhibition grounds by special arrangements, it is not possible to weigh every consignment before taking delivery of it. So the exhibitors are requested to take every precaution in packing their exhibits and to send to the Committee in time *an accurate list* of exhibits sent by them. Exhibitors who wish that their consignment should be weighed at the Railway Station before delivery, should intimate their wish to the Secretary in time and remit in advace a special fee of one rupee on each consignment to be thus weighed.

21. *Acknowledgment of exhibits.*—Receipt of exhibits will be acknowledged by return of the duplicate list mentioned in para 10 to the exhibitors, duly signed by the Secretary. No other kind of recept or acknowledgment shall be sent.

22. *Free pass to exhibitors.*—In cases in which the owners themselves are in charge of exhibits, the necessary free pass will be given: Exhibitors and such assistants, servants, or other attendants as they may require for service in their stalls shall enter the Exhibition grounds through such entrance or entrances as the Committee may direct; they must wear badges, discs or hold passes issued to them before the opening of the Exhibition. All such assistants, servants or other attendants must obey the orders of the Committee and of the supervising staff appointed by them.

23. *Free admission to bona fide raiyats and artizans.*—Raiyats and artizans unable to pay fees, belonging to the Mysore State or from outside, who produce certificates of identification signed by their respective Taluk Officers in form B appended to this Prospectus, will be admitted free.

24. *Space for articles on sale.*—Accommodation for articles to be sold by owners will be provided in the sale rooms erected within the Exhibition grounds, as far as possible, and the following rent will be charged for special accommodation. Sellers may have temporary booths put up at their own cost in the Exhibition grounds by previous arrangements with the Committee.

	Rs.
1. Full stall 21' by 10½'	15
2. Half stall	8
3. Quarter stall	5

No refund will be given to an exhibitor who occupies less space than that allotted and paid for and the unoccupied space will be disposed of by the Committee in the way it deems best.

No exhibitor shall assign, transfer, sublet, or part with the possession of any site or building or portion thereof allotted to him or dispose of any part or interest therein or place therein any other than his own duly approved exhibits. Any breach of this rule renders the exhibitor liable to have his exhibits removed summarily from the Exhibition and he shall not be entitled to any compensation.

Commission.—A commission of six pies in the rupee will be charged on the sales conducted in the sale rooms by the exhibitors themselves or by their agents.

25. *Exhibits for sale.*—Exhibits labelled 'for sale' will be sold during the time the Exhibition lasts; but no article will be removed till the close of the Exhibition.

26. *Commission on sales.*—A commission of half an anna in the rupee will be levied on all articles sold in the Exhibition stalls and grounds through the salesmen appointed by the Exhibition authorities. In this case the money will be received and remitted to the exhibitor by the Exhibition office.

27. *Opening of stalls.*—All buildings erected by Exhibitors and all sites, stalls, etc., occupied by them shall be properly cleaned and open for the public before the hour of opening each day and shall remain so during the hours of Exhibition and if this is not done to the satisfaction of the Committee, it shall arrange to have everything done at the sole risk and expense of the Exhibitor.

28. *Removal of exhibits.*—All exhibits must be removed within a fortnight after the close of the Exhibition. Exhibits remaining after that time will be disposed of as the Committee deem fit. Perishable articles will be allowed to be removed at the option of the owners or purchasers within 24 hours after the opening of the Exhibition.

29. *Exhibits on loan.*—Works of art and articles of special merit including those of antiquarian interest will be thankfully received. Gentlemen willing to lend them are requested to place themselves in communication with the Secretary or the members of the Committee who will inform them of the acceptance of the offer and will make necessary arrangements in connection with the exhibition of articles.

30. *Exhibits belonging to Departments of Mysore Government.*—Articles or cattle exhibited by any Department of Government will not be eligible for money prizes or medals; but may be awarded certificates of merit. Certificates of merit will also be given to such of the exhibits from private gentlemen as have not been provided for in the Prospectus, if they are

considered by the judges worthy of the same. (This rule does not preclude Government servants or pupils of Industrial Schools from competing for prizes, if the exhibits are manufactured by themselves.)

31. *Admission of live-stock.*—The time of the year when the owners of cattle are fully engaged in the fields, having been found very unsuitable for a regular cattle show, it has been decided to restrict the show to the fine specimens of local (Mysore City) cattle irrespective of breeds and classes.

32. *Accommodation for cattle.*—Accommodation will be provided free of cost.

33. *Practical test.*—Working cattle may, at the owners' option, be subjected to a practical test as to their powers of draught. They must be the *bona fide* property of the exhibitor.

34. *Care-taker.*—Each animal or lot competing separately must be in charge of a care-taker who will remain in charge of the exhibit and must be ready to lead it out at any time as required by the Committee.

35. *Poultry show.*—A class has been opened in the Prospectus for poultry and prizes will be awarded for different pure strains.

36. *Poultry appliances.*—Prizes will also be awarded for incubators and other poultry appliances.

37. *Distribution of awards.*—Prizes and medals will be distributed at the close of the Exhibition. This year it is proposed to hold a distribution of prizes in the Exhibition grounds on or about the 25th October 1911.

38. *Number of judges.*—The judges in each class or group will not be less than three but no prizes will be awarded unless, in the opinion of the judges, the exhibits merit the reward. Judges cannot compete for prizes in classes or section in which they are judges, and the decision of the judges is final.

39. *Photograph of articles exhibited.*—No articles exhibited may be copied photographed, drawn or reproduced in any manner without the special permission of the exhibitor and the Committee. General photographs of stalls may, however, be taken with the permission of the Committee.

40. *Committee decision final.*—The Committee have full power to make rules for the conduct of the Exhibition under these regulations, and their decision is final in all cases.

41. *Acceptance of rules.*—All persons who become exhibitors shall be held to signify their assent to and acceptance of the foregoing rules and regulations and also such other rules as the Committee may hereafter issue not inconsistent with these regulations.

42. *Official hand-book.*—An official hand-book of all exhibits with the names and the addresses of the exhibitors and their agent or agents, if any, will be published before the opening of the exhibition without any further cost to the exhibitors. It is expected that a large number of people will visit the Exhibition and that many of them will probably purchase the official hand-book which will be sold at a nominal price. It will be a capital opportunity for advertisers to advertise through the medium of this hand-book. Advertisements will be received for publication in the official hand-book at the following rates:—

	Rs.
Full page	20
Half page	12
Quarter page	7½

(Special rates will be charged for advertisements on the pages of the cover and coloured fly-leaves and other special positions.)

Applications for these advertisements will be received not later than 15th September 1911 and must be accompanied by a remittance in full payment of the amount due for space applied for.

43. *Refreshments.*—No articles of refreshment, food, drink or tobacco shall be sold in or on any site, buildings or part thereof in the Exhibition without the written permission of the Committee.

44. *Committee's right.*—The Committee or any person or persons that they may appoint shall at all times have free access and right of entry to all or any part of the space, site or buildings allotted to exhibitors.

45. *Accommodation.*—Accommodation for visitors will be arranged in the sheds put up outside the Exhibition buildings, provided intending visitors apply to the Secretary at least a fortnight before the opening of the Exhibition. A rent of annas four per day subject to a minimum charge of Rs. 2-8-0 will be charged.

46. *Entertainments.*—The Committee will receive applications for entertainments in the Exhibition grounds. No charges will be levied for space allotted therefor.

47. *Post and Telegraph Office.*—"The Mysore Exhibition Camp" Post and Telegraph Office will be open at the Exhibition from 1st September to 20th November and all letters, etc., addressed to the Exhibition Camp Office will be delivered earlier than those addressed to Mysore Town.

48. *Railway Concession.*—Concession for the carriage of exhibits over the following Railways to the Mysore Dasara Industrial and Agricultural Exhibition, on production of necessary certificates which may be had by applying to the Secretary to the Exhibition, has been kindly granted by the respective managers :—

1. M. & S. M. Railway.
2. The South Indian Railway.
3. The Great Indian Peninsular Railway.
4. The East Indian Railway.
5. Oudh and Rohilkhand Railway.
6. The Bengal and Nagpur Railway.
7. The B. B. C. I. Railway.
8. The Assam Bengal Railway.
9. The Morvi Railway.
10. The B. G. J. P. Railway.
11. Burma Railways.

Besides, the following Railways have also extended the concession to the exhibitors. The period will commence in the case of exhibits from the 20th of August 1911 and end on the 17th of November 1911, and in the case of exhibitors from 10th September to 25th October 1911, the latest day for the issue of concession tickets to the latter being 10th October 1911 :—

1. M. & S. M. Railway.
2. S. I. Railway.
3. The B. N. Railway.
4. The Assam Bengal Railway.
5. The Morvi Railway.
6. The B. G. J. P. Railway.
7. Burma Railways.

49. *Communications regarding the Exhibition.*—All communications regarding the Exhibition should be addressed to the Secretary to the Mysore Dasara Industrial and Agricultural Exhibition Committee, Mysore.

NOTES ON THE LACE AND EMBROIDERY SECTION OF THE MYSORE DASARA INDUSTRIAL AND AGRICULTURAL EXHIBITION.

Owing partly to the fact that it is extremely difficult to translate into Indian vernaculars English terms used for needle-work and Embroidery, and partly because people do not readily understand the difference between an Exhibition and an ordinary shop or stall, exhibitors have not always understood what articles are required and will be rewarded, and have sent in much to former Exhibitions that, even if good in itself, was debarred from getting any prize by the fact that it was not asked for in the Prospectus.

It has therefore been thought well to publish a few explanatory notes.

The room devoted to the lace and embroidery section is necessarily limited and it is not possible in any one year to include all kinds of needle-work.

If too many specimens are received, they cannot be displayed effectively and the crowding of embroideries, etc., only results in confusion, dust, damage to the exhibits, and prevents their being satisfactorily shown.

Therefore instead of crowding the stalls with masses of needle-work, good and bad, old and new, clean and dirty, whether included in the Prospectus or not, the Sub-Committee wish the Exhibition to be confined to such specimens only as—

(1) are asked for in the Prospectus,
(2) are considered by them to be really of excellent workmanship,
(3) are new and fresh.

N. B.—Valuable specimens of old embroidery, lace or needle-work should be placed apart in "A loan exhibition."

Exhibitors would do well to note that the best materials available should be used, and that one perfect specimen of any particular work is much more likely to gain a prize than many indifferent specimens. For instance, one silk tie, perfectly knitted in good silk of a nice colour, would stand a better chance of reward than a score of ties carelessly knitted.

Moth-eaten, faded, torn or dirty work cannot be accepted.

Competitors will please note that this year cushions worked in wool work, crewel work, chenille work or bead work are not included in the Prospectus; and that no bead work or miscellaneous work is to be sent for exhibition.

In judging the needle-work, its suitability for use and sale (including the possibility of its being easily cleaned or washed) will be taken into consideration, as well as beauty of design, material, colouring and workmanship.

Preference will be given to Swadeshi exhibits and particularly to those of the Mysore manufacture.

G. SUBBUSWAMI IYER,
Secretary.

V. MUTHUSAWMY DOSS,
For *Sanitary Commissioner with the Government of Mysore.*

MYSORE AGRICULTURAL DEPARTMENT.

CIRCULAR NO. 3.

Koleroga of Supari.

The work in connection with Koleroga of Supari for the summer of 1911 is already being arranged for. During the summer of 1910 spraying was done in 46 different gardens. In most cases where Koleroga appeared in any part of the garden a record was kept, at the harvest, of the damage done on the sprayed portion and on a kotte-tied portion of equal extent close beside it. Records, are, thus, available from twenty-two gardens and in all of these, with two exceptions, spraying has given better results than kotte-tying. In almost all cases where no record could be kept, owing to lack of sufficient staff for the purpose, a statement was received from the garden-owner that spraying had been decidedly better than kotte-tying. In one of the two cases where spraying did not give better results than kotte-tying, the losses on the sprayed area were practically the same as on the kotte-tied area (9 per cent of loss on sprayed area, 8·6 per cent of loss on kotte-tied area). In the other case (Basti in Nagar Taluk) the sprayed part of the garden had been leased from the owner and he had therefore no interest in looking after the crop and no officer of the Department was available to look after the garden. The result was that a number of the best bunches were removed before the proper harvest and no account of them could be kept. How many were removed is not known but in all probability the number was fairly large as only 328 bunches remained on 358 trees, a number which is exceedingly small. It is clear then that the results from this garden cannot be taken into consideration.

An examination of the records from the other gardens shows that spraying has given a better result than kotte-tying, varying from 1 per cent to 26 per cent or about one-fourth of the crop. The following table shows in a general way just how much better spraying has proved than kotte-tying in the garden where records were kept:—

Spraying has saved between 1% and 5% more crop than kotte-tying, (In most of these cases the attack had been light and the loss was comparatively small.)	in 8 gardens
Spraying has saved between 5% and 10% more crop than kotte-tying	in 4 gardens
Spraying has saved between 10% to 15% more crop than kotte-tying	in 4 gardens
Spraying has saved between 15% and 20% more crop than kotte-tying	in 2 gardens
Spraying has saved between 20% and 30% more crop than kotte-tying	in 2 gardens

In all the other gardens except the two mentioned above, there was either no attack whatever or the attack on the sprayed area was very much lighter than that on the kotte-tied area. It was found impossible to keep a record in all the gardens, so those were chosen for the purpose where the results were least satisfactory.

In a few cases (seven out of the forty-six) a second spraying was given to some of the trees that had been previously sprayed. This was necessary, partly at least, on account of the extreme length of duration of the monsoon in 1910 which extended up to October. This second spraying was done towards the end of August or in September and in every case stopped the spread of the disease at once. Where the rainfall is very heavy and the monsoon is prolonged such a second treatment of some of the trees will be necessary and if done properly and at the right time will pay for itself many times.

Now as to the cost of materials, an accurate account was kept of the amount of materials used in each garden and the number of trees sprayed; and from these figures an estimate of the cost per 400 trees has been made. There has been considerable difference in the cost in different gardens due in part to the size and number of the bunches and in part to the fact that a good deal of material has been

wasted in some cases. The following table shows the cost in some of the gardens:—

Cost of material per 400 trees.	Number of gardens.
Re. 1 to Rs. 1-15-0 ...	in 2 gardens.
Rs. 2 to „ 3 ...	„ 18 „
Rs. 3 to „ 4 ...	„ 19 „
Rs. 4 to „ 5 ...	„ 4 „
Above Rs. 5 ...	„ 3 „

The total expenses of spraying including the wages of climbers has been furnished by fifteen of the garden-owners and has varied between Rs. 5-10-0 and Rs. 15-3-0. In only five of the fifteen cases have the total expenses exceeded Rs. 8 per 400 trees which can be taken as about the lowest rate at which the tying of kottes alone could be done on this number of trees leaving out of account altogether the cost of the kottes.

Up to the present over 100 applications have been received from garden-owners for spraying in their gardens in 1911. This number will be greatly increased within the next few weeks and all those wishing to try spraying should make application at once as it is possible that not all the applications can be accepted owing to lack of staff and sprayers. Applications should be addressed to me at Bangalore up to the 12th of May and after that date to Mr. M. K. Venkata Rao, Assistant Mycologist at Talaguppe (for Sagar and Nagar Taluks), and to Fieldman Stephen Ansir at Tirthahalli (for Tirthahalli and Koppa Taluks). These two officers will also receive applications in person at any time.

The formula that has been employed in preparing the Bordeaux mixture for treating the Koleroga of Supari consists of 5 lbs. of copper sulphate (blue stone) and 5 lbs. of unslaked lime in 25 gallons of water. The copper sulphate is dissolved in 12 gallons of water in a wooden vessel (an earthenware one would also do but in no case should an iron vessel be used). This is best done by placing the copper sulphate pounded up rather fine in a coarse cloth bag and suspending it in the water till it is entirely dissolved. The lime is placed in another vessel which may be of wood, earthenware or iron, and water is slowly sprinkled over it till the lumps of lime have broken up into fine particles. Then the whole of the twelve gallons of water may be poured in with constant stirring. To make the completed mixture, equal quantities of lime water and copper sulphate solution are taken and poured into a third vessel with constant stirring or the lime water is poured into the solution of copper sulphate. The completed mixture should have a light blue colour (on no account green) and should leave no deposit of copper on a clean knife-blade dipped into it for half a minute. The adhesive used is made by mixing 2 lbs. of resin, such as used by tinsmiths, and 1 lb. of washing soda and adding to this one gallon of water. The whole is then heated for about an hour till the mass has become quite clear.

For those who are not familiar with the above weights and measures, it may be noted that one gallon is equal to 4 measuring seers and one pound is equal to 40 tolas.

The mixture used is therefore made up as follows:—

(*a*) 5 lbs. of copper sulphate dissolved in 12 gallons of water.

(*b*) 5 lbs. of lime slaked in 12 gallons of water.

(*c*) 2 lbs. of resin and 1 lb. of soda heated in one gallon water till quite clear (about an hour),

(*b*) is poured into (*a*) accompanied by constant stirring and then (*c*) is added to make up the completed mixture.

It need hardly be pointed out that any quantity can be made up at one time down to one gallon of the completed mixture, it being only necessary to keep the same proportions throughout. In practice it is always wise to make up just sufficient for one day's work as the mixture should be used fresh. Where only small wooden or earthenware vessels are available it will be necessary to make up smaller quantities at a time.

9. *Progress of agricultural operations.*—Lands are being ploughed and manured in parts of the Nelamangala, Magadi, Channapatna, Anekal and Devanhalli Taluks. Sugar cane milling is going on in parts of Bangalore.

Standing crops.—Vaisakhi paddy and sugar cane are in good condition. But Vaisakhi paddy in parts of the Closepet Sub-Taluk is reported to have been slightly damaged by disease.

Crops sown.—Sugar cane in parts of the Bangalore, Dodballapur, Nelamangala, Kankanhalli and Magadi Taluks.

Crops harvested and their estimated outturn.—Sugar cane in parts of the Bangalore Taluk, yield from 8 to 10 annas.

10. Prospects of the season are good. Food stuffs are sufficiently available. Work is available to the cooly classes.

11. Except for the prevalence of plague in parts of the Bangalore, Nelamangala, Magadi and Anekal Taluks, public health is generally good.

12. Cattle are reported to be healthy in all the taluks. Water and fodder are available.

KOLAR.

8. Market well supplied.

9. *Agricultural operations.*—Weeding in sugar cane and paddy fields in the Sidlaghatta and Srinivaspur Taluks and ploughing in the Gudibanda Sub-Taluk, are going on.

Standing crops.—Sugar cane, paddy and mulberry are in good condition.

Crops harvested and their yield.—Jola in Goribidnur, yield from 6 to 10 annas; paddy in the Bowringpet and Goribidnur Taluks and in the Gudibanda Sub-Taluk, yield from 8 to 14 annas; and Baragu in the Gudibanda Sub-Taluk, yield 8 annas.

10. Prospects of the season are good. Food stuffs are available. Work is available to the cooly classes.

11. Except for plague in Kolar and Chikballapur towns and in a few villages surrounding them and in the Kolar Gold Fields, public health is generally good.

12. Cattle are healthy. Water and fodder are available.

TUMKUR.

8. Market well supplied.

9. *State of standing crops.*—Their condition is good in the Chiknayakanhalli, Gubbi, Tiptur and Kunigal Taluks and in the Koratagere and Turuvekere Sub-Taluks, and fair in the Tumkur, Sira and Pavagada Taluks. It is reported that Vaisakhi crops in some parts of the Maddagiri Taluk are withering for want of water.

Crops sown.—Paddy in the Chiknayakanhalli Taluk and the Turuvekere Sub-Taluk and sugar cane in the Maddagiri and Kunigal Taluks.

Crops harvested.—Paddy in the Maddagiri, Chiknayakanhalli, Sira and Pavagada Taluks and the Koratagere Sub-Taluk; sugar cane in the Sira, Gubbi and Kunigal Taluks and the Turuvekere Sub-Taluk; and cholum, castor and cotton in the Pavagada Taluk.

10. Prospects of the season are good. Food stuffs are available throughout the district.

11. Except for plague prevailing in some parts of the Gubbi Taluk, public health is generally good.

12. Water and fodder are available throughout the district.

MYSORE.

8. Market fairly well supplied.

9. *Agricultural operations.*—Lands are being ploughed in parts of the Mysore, Hunsur, Yedatore, Nanjangud, Mandya, Krishnarajpete and Nagamangala Taluks.

State of standing crops is reported to be good.

Crops sown.—Cholum in parts of the Mysore, Chamrajnagar, Gundlupet, Nanjangud, T.-Narsipur and Mandya Taluks; til in parts of the Mysore, Hunsur, Heggaddevankote and Gundlupet Taluks; ragi in parts of the Mysore and Heggaddevankote Taluks; and black gram and green gram in parts of the Yedatore Taluk.

Crops harvested.—Cotton in parts of the Nanjangud Taluk and sugar cane in parts of the Mandya Taluk.

10. Prospects of the season are good. Food stuffs are available.

11. Except for plague in parts of the Mysore, Chamrajnagar, Yedatore, Gundlupet, Nanjangud and Krishnarajpete Taluks, and small-pox in parts of the Krishnarajpete Taluk, public health is generally good.

12. Cattle are reported to be healthy. Water and fodder are available.

HASSAN.

8. Market well supplied.

9. *Agricultural operations.*—Excepting parts of the Hole-Narsipur Taluk, in other parts of the district, raiyats are engaged in preparing their fields for sowing.

Standing crops.—The following are reported to be in good condition:—

Hassan and Channarayapatna Taluks—Kar paddy and sugar cane.

Manjarabad Taluk—Kode paddy.

Belur, Arsikere and Hole-Narsipur Taluks and Alur Sub-Taluk—Sugar cane.

Crops sown.—In parts of the Hole-Narsipur Taluk gidda ragi, cholum, til and togari are being sown.

Crops harvested.—Sugar cane in parts of the Channarayapatna Taluk.

10. Prospects of the season are generally good. But more rain is required in the Manjarabad and Arsikere Taluks.

11. Except for plague in parts of the Hassan, Arsikere and Channarayapatna Taluks and ague and fever in parts of the Channarayapatna Taluk, public health is generally good.

12. Cattle are healthy, except in a few villages of the Alur Sub-Taluk, where "Metre kattu" disease is reported to be prevailing among them. It is reported that the Veterinary Inspector has been directed to proceed to the spot and do the needful. Water and fodder are available.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed for cultivation in parts of the Shimoga, Channagiri, Honnali, Sorab, Sagar, Nagar and Tirthahalli Taluks.

Standing crops.—Sugar cane in the taluks of Shimoga, Honnali, Shikarpur, Sorab and Sagar and the Kumsi Sub-Taluk and kar paddy in the Sagar and Nagar Taluks are in good condition.

Crops sown.—Sugar cane planting in the Kumsi Sub-Taluk has been completed.

10. Prospects of the season are generally good. Food stuffs are available.

11. Except for a few cases of plague reported to have occurred in Sangahalli village, Channagiri Taluk, and Siralkoppa, Shikarpur Taluk, public health is generally good.

12. Except for "Dod roga" reported to be still prevailing in Muduvala village, Kumsi Sub-Taluk, cattle are generally healthy. Water and fodder are available.

KADUR.

8. Market well supplied.

Standing crops.—Kar paddy and sugar cane in Chikmagalur and Kadur, sugar cane in Tarikere and Koppa and kode paddy in Mudgere are reported to be in good condition.

Crops sown.—Nil.

Crops harvested.—Kar paddy in Kadur and sugar cane in Tarikere.

10. Prospects of the season are good. During the week the rainfall was general throughout the district, except in Kadur, where it is urgently required for agricultural operations. Food stuffs are sufficiently available.

11. Except for plague in certain villages of Chikmagalur and Tarikere and in the Mudgere town, public health is generally good.

12. Except for "Foot and mouth" disease still prevailing in certain villages of Chikmagalur and Mudgere, cattle are generally healthy. Water and fodder are available.

CHITALDRUG.

8. Market well supplied.

9. *Agricultural operations.*—Raiyats are busily engaged in preparing their lands for sowing seeds.

Standing crops such as paddy, cotton and sugar cane, are reported to be in good condition.

Crops sown.—Nil.

Crops harvested and their yield.—Paddy in the Challakere and Hosdurga Taluks, yield from 8 to 16 annas; and cotton in the Challakere Taluk, yield from 8 to 12 annas.

10. Prospects of the season are good. Food stuffs are available.

11. Public health is generally good.

12. Cattle are healthy. Water and fodder are available.

CIRCULAR No. 3.

Koleroga of Supari.

The work in connection with Koleroga of Supari for the summer of 1911 is already being arranged for. During the summer of 1910 spraying was done in 46 different gardens. In most cases where Koleroga appeared in any part of the garden a record was kept, at the harvest, of the damage done on the sprayed portion and on a kotte-tied portion of equal extent close beside it. Records are, thus, available from twenty-two gardens and in all of these, with two exceptions, spraying has given better results than kotte-tying. In almost all cases where no record could be kept, owing to lack of sufficient staff for the purpose, a statement was received from the garden-owner that spraying had been decidedly better than kotte-tying. In one of the two cases where spraying did not give better results than kotte-tying, the losses on the sprayed area were practically the same as on the kotte-tied area (9 per cent of loss on sprayed area, 8·6 per cent of loss on kotte-tied area). In the other case (Basti in Nagar Taluk) the sprayed part of the garden had been leased from the owner and he had therefore no interest in looking after the crop and no officer of the Department was available to look after the garden. The result was that a number of the best bunches were removed before the proper harvest and no account of them could be kept. How many were removed is not known but in all probability the number was fairly large as only 328 bunches remained on 358 trees, a number which is exceedingly small. It is clear then that the results from this garden cannot be taken into consideration.

An examination of the records from the other gardens shows that spraying has given a better result than kotte-tying, varying from 1 per cent to 26 per cent or about one-fourth of the crop. The following table shows in a general way just how much better spraying has proved than kotte-tying in the garden where records were kept :—

Spraying has saved between 1% and 5% more crop than kotte-tying (In most of these cases the attack had been light and the loss was comparatively small.)	in 8 gardens
Spraying has saved between 5% and 10% more crop than kotte-tying	in 4 gardens
Spraying has saved between 10% to 15% more crop than kotte-tying	in 4 gardens
Spraying has saved between 15% and 20% more crop than kotte-tying	in 2 gardens
Spraying has saved between 20% and 30% more crop than kotte-tying	in 2 gardens

In all the other gardens except the two mentioned above, there was either no attack whatever or the attack on the sprayed area was very much lighter than that on the kotte-tied area. It was found impossible to keep a record in all the gardens, so those were chosen for the purpose where the results were least satisfactory.

In a few cases (seven out of the forty-six) a second spraying was given to some of the trees that had been previously sprayed. This was necessary, partly at least, on account of the extreme length of duration of the monsoon in 1910 which extended up to October. This second spraying was done towards the end of August or in September and in every case stopped the spread of the disease at once. Where the rainfall is very heavy and the monsoon is prolonged such a second treatment of some of the trees will be necessary and if done properly and at the right time will pay for itself many times.

Now as to the cost of materials, an accurate account was kept of the amounts of materials used in each garden and the number of trees sprayed, and from these figures an estimate of the cost per 400 trees has been made. There has been considerable difference in the cost in different gardens due in part to the size and number of the bunches and in part to the fact that a good deal of material has been

wasted in some cases. The following table shows the cost in some of the gardens:—

Cost of material per 400 trees.	Number of gardens.
Re. 1 to Rs. 1-15-0	in 2 gardens.
Rs. 2 to „ 3	„ 18 „
Rs. 3 to „ 4	„ 19 „
Rs. 4 to „ 5	„ 4 „
Above Rs. 5	„ 3 „

The total expenses of spraying including the wages of climbers has been furnished by fifteen of the garden-owners and has varied between Rs. 5-10-0 and Rs. 15-3-0. In only five of the fifteen cases have the total expenses exceeded Rs. 8 per 400 trees which can be taken as about the lowest rate at which the tying of kottes alone could be done on this number of trees leaving out of account altogether the cost of the kottes.

Up to the present over 100 applications have been received from garden-owners for spraying in their gardens in 1911. This number will be greatly increased within the next few weeks and all those wishing to try spraying should make application at once as it is possible that not all the applications can be accepted owing to lack of staff and sprayers. Applications should be addressed to me at Bangalore up to the 12th of May and after that date to Mr. M. K. Venkata Rao, Assistant Mycologist at Talaguppe (for Sagar and Nagar Taluks), and to Fieldman Stephen Ansir at Tirthahalli (for Tirthahalli and Koppa Taluks). These two officers will also receive applications in person at any time.

The formula that has been employed in preparing the Bordeaux mixture for treating the Koleroga of Supari consists of 5 lbs. of copper sulphate (blue stone) and 5 lbs. of unslaked lime in 25 gallons of water. The copper sulphate is dissolved in 12 gallons of water in a wooden vessel (an earthenware one would also do but in no case should an iron vessel be used). This is best done by placing the copper sulphate pounded up rather fine in a coarse cloth bag and suspending it in the water till it is entirely dissolved. The lime is placed in another vessel which may be of wood, earthenware or iron, and water is slowly sprinkled over it till the lumps of lime have broken up into fine particles. Then the whole of the twelve gallons of water may be poured in with constant stirring. To make the completed mixture, equal quantities of lime water and copper sulphate solution are taken and poured into a third vessel with constant stirring or the lime water is poured into the solution of copper sulphate. The completed mixture should have a light blue colour (on no account green) and should leave no deposit of copper on a clean knife-blade dipped into it for half a minute. The adhesive used is made by mixing 2 lbs. of resin, such as used by tinsmiths, and 1 lb. of washing soda and adding to this one gallon of water. The whole is then heated for about an hour till the mass has become quite clear.

For those who are not familiar with the above weights and measures, it may be noted that one gallon is equal to 4 measuring seers and one pound is equal to 40 tolas.

The mixture used is therefore made up as follows:—

(*a*) 5 lbs. of copper sulphate dissolved in 12 gallons of water.

(*b*) 5 lbs. of lime slaked in 12 gallons of water.

(*c*) 2 lbs. of resin and 1 lb. of soda heated in one gallon water till quite clear (about an hour),

(*b*) is poured into (*a*) accompanied by constant stirring and then (*c*) is added to make up the completed mixture.

It need hardly be pointed out that any quantity can be made up at one time down to one gallon of the completed mixture, it being only necessary to keep the same proportions throughout. In practice it is always wise to make up just sufficient for one day's work as the mixture should be used fresh. Where only small wooden or earthenware vessels are available it will be necessary to make up smaller quantities at a time.

Crops harvested.—Kode paddy in parts of the Manjarabad Taluk and sugar cane in parts of the Arsikere Taluk.

10. Prospects of the season are good.

11. Except for plague in parts of the Hassan, Arsikere and Channarayapatna Taluks and ague and fever in the two latter taluks, public health is generally good.

12. Cattle are generally healthy, except in parts of the Arsikere Taluk, where "Chappe Roga" is reported to be prevailing among them. In parts of the Alur Sub-Taluk, this disease is abating. It is reported that the Assistant Veterinary Inspector has been directed to issue needful instructions to the taluks in the matter of arresting the spread of the disease. Water and fodder are available.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed and manured in parts of all the taluks in the district.

Standing crops.—Sugar cane is in good condition in portions of the Shimoga, Honnali, Shikarpur, Sorab and Sagar Taluks and the Kumsi Sub-Taluk.

Crops sown.—Kar paddy is being sown in parts of the Sagar Taluk.

10. Prospects of the season are generally good. Food stuffs are available.

11. Plague is decreasing in Tirthahalli Town and public health is generally good.

12. Cattle are generally healthy; and "Dod roga" is subsiding in Muduvala village, Kumsi Sub-Taluk. Water and fodder are available.

KADUR.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed and manured throughout the district.

Standing crops.—Kar paddy and sugar cane in Chikmagalur; sugar cane in Kadur, Tarikere and Koppa and kode paddy in Mudgere are reported to be in good condition.

Crops sown.—Ragi, avare, gingelly, tadagani and coriander in Chikmagalur; paddy in parts of Tarikere; paddy and ragi in Mudgere and paddy in Yedahalli and Sringeri.

Crops harvested.—Nil.

10. Prospects of the season are good. But rain is urgently required in the Sringeri Jahgir. Food stuffs are sufficiently available.

11. Except for plague in a few villages of Chikmagalur, public health is generally good.

12. Cattle are generally healthy. Water and fodder are available.

CHITALDRUG.

8. Market well supplied.

9. *Agricultural operations.*—Raiyats are busily engaged in preparing their lands for sowing seeds.

Standing crops such as paddy and sugar cane are reported to be in good condition.

Crops sown.—Sugar cane in the Hiriyur Taluk.

Crops harvested and their yield.—Paddy in the Chitaldrug, Challakere and Hosdurga Taluks, yield from 8 to 14 annas; and cotton in the Chitaldrug Taluk, yield from 8 to 12 annas.

10. Prospects of the season are good. Food stuffs are available.

11. Public health is generally good.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words kinds and varieties may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct kinds of flowers. Marechal Niel, Crimson Rambler, La France, etc., are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition and any exhibitor acting contrary after being asked to retire will have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the current show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees will be deducted to defray cost of a miniature facsimile cup to be given as a souvenior to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 5th August 1911 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 7th, 9-30 A.M., after which they may be sold.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words 'kinds' and 'varieties' may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct kinds of flowers. Marechal Niel, Crimson Rambler, La France, etc. are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition and any exhibitor acting contrary after being asked to retire will have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the current show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees will be deducted to defray cost of a miniature facsimile cup to be given as a souvenior to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 5th August 1911 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 7th, 9-30 A.M., after which they may be sold.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words 'kinds' and 'varieties' may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct kinds of flowers. Marechal Niel, Crimson Rambler, La France, etc. are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition and any exhibitor acting contrary after being asked to retire will have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the current show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees will be deducted to defray cost of a miniature facsimile cup to be given as a souvenior to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 5th August 1911 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

READ—

Subject No. 98 of the Proceedings of the Representative Assembly of 1908 regarding the introduction into Mysore of the form of Revenue Money Order prescribed in the Madras Presidency for remitting Kandayem by landholders.

2. Also Subject No. 66 of the Proceedings of the Representative Assembly of 1909.

3. Letter No. 8203, dated the 15th February 1910, from the Revenue Commissioner in Mysore, expressing his opinion in favour of the representation.

4. Correspondence ending with letter No. 2225, dated the 12th April 1911, from the First Assistant to the Honorable the Resident in Mysore, conveying the approval of the Director General of the Post Offices for the extension of the Revenue Money Order system in force in the Madras Presidency to the Post Offices in the Mysore State experimentally for three years with effect from the 1st May 1911.

No. R. 6499-509—L. R. 210-08-13, DATED BANGALORE, 30TH MAY 1911.

ORDER THEREON.—Facilities for payment of kandayem by landholders have been provided in Rule 91 of the Land Revenue Rules. Government, however, consider it desirable to increase still further the facilities for the payment of land revenue, for the benefit of absentee pattadars and others interested in the land by adopting a system of Revenue Money Orders similar to the one in force in the Madras Presidency, where, however, the system which was brought into force some six years ago is still in its experimental stage. The Director General of Post offices has also been pleased to accord his approval for the extension of the system to Mysore.

2. The Government of His Highness the Maharaja are accordingly pleased to direct that the Revenue Money Order system be introduced into the State experimentally for three years with effect from the 1st May 1911 and lay down the following rules for the guidance of local officers in the working of the system.

3. The Revenue Commissioner is requested to cause wide publicity to be given to the scheme, and submit a report on the result of its working at the end of the year 1911-12.

Rules relating to the Revenue Money Orders for the Mysore State for the guidance of local officers.

I. The object of Revenue Money Orders is to enable raiyats paying land revenue to Government, especially absentee pattadars and others interested in the land, to remit the amount due by them to the Taluk through the shanbhog of the village in which the land on account of which the amount is payable, is situated.

II. Revenue Money Orders must be used only for the remittance of land revenue, cesses, and any other item which is due on account of land or is ordinarily payable with land revenue and cannot be used for any other purpose whatsoever.

III. Revenue Money Orders may contain pies (fractions of an anna) but not fractions of a pie.

IV. If a raiyat holds or is interested in lands covered by different pattas in the same revenue village, he may remit the land revenue due on all such pattas by a single Revenue Money Order, provided that full particulars of each patta are given in the Money Order.

V. The adoption of this system of payment is optional and no raiyat is compelled to resort to it unless he wishes to do so.

VI. The rules do not confer the right to pay land revenue direct into the Taluk Treasury without the intervention of the village shanbhog on any class of landholders except as subject to the exception already provided by Rule 91 of the Land Revenue Rules.

VII. The Revenue Money Order form which is appended to this order, and copies of which will be available in all the Post Offices in the State, consists of three parts, *viz.*:—

(1) The Money Order,
(2) The acknowledgment,
(3) The memorandum of particulars of remittance.

The first part is almost exactly like the corresponding portion of the ordinary inland Money Order Form. The upper portion is intended to be filled up by the Post Office and the lower portion by the remitter.

The second part is the acknowledgment for the Revenue Money Order which will be returned to the remitter through the Post Office duly signed by the village shanbhog. This part will be filled up by the remitter.

The third part provides headings for the entry of particulars of remittance which will also be filled up by the remitter for the information of the village shanbhog and the Amildar.

VIII. Revenue Money Orders will be delivered to the village shanbhog by the Branch postmaster, postman or village Postman as the case may be, *without cash*. The shanbhog will see that the amount of each order as entered in the Money Order (1st part) corresponds with that entered in the acknowledgment (2nd part) and in the memorandum of particulars of remittance (3rd part). If there is no discrepancy, he will sign the acknowledgment portion of each Revenue Money Order (2nd part), detach it and make it over to the Post Office official who delivered the Money Order. The shanbhog will then grant a receipt for each Revenue Money Order and the coupon or memorandum of particulars delivered to him in the postman's book or village postman's register, which will be presented by the Post Office official along with the Revenue Money Orders.

IX. If either the acknowledgment or the memorandum of particulars of a Revenue Money Order is not completely filled up by the remitter, or if the remitter has omitted to affix his signature on the memorandum of particulars of remittance (3rd part), the shanbhog will return the Revenue Money Order to the Post Office official and will not grant a receipt in respect of such Revenue Money Order.

X. The shanbhog will then have the amount of each Revenue Money Order (which is in order and for which he has granted a receipt to the Post Office official) passed through his accounts treating the Revenue Money Order in every respect as cash or currency note. But the shanbhog will on no account detain the Post Office official who must be sent away immediately the acknowledgment portion of each Revenue Money Order is detached and given to him.

XI. The memorandum of particulars of remittance (3rd part) of each Revenue Money Order will then be carefully filed in monthly bundles by the shanbhog.

XII. If the amount of a Revenue Money Order falls short of the monthly payable to Government by the landholder concerned, the amount must still be credited in the village accounts. If on the other hand, the amount is in excess of the demand; the excess amount will be credited to surplus collections.

XIII. When the day for making the next remittance arrives, all the Revenue Money Orders taken delivery of by the shanbhog will be sent by him to the Amildar along with other collections duly entered in a list in the form appended to these rules.

XIV. The list will be received back from the Amildar duly signed by him or the Taluk Sheristadar or the Taluk Head Gumasta. The list will be filed by the village shanbhog with the memorandum of particulars of remittance (3rd part) of the Revenue Money Orders entered in it.

XV. The issue of a Revenue Money Order which is ultimately delivered to the shanbhog concerned too late for the Khist day does not exempt the remitter from the penalties prescribed in the Land Revenue Code and the rules framed thereunder.

XVI. Revenue Money Orders taken delivery of by the shanbhog, the amounts of which cannot be credited in the village accounts owing to an irregularity in the remittance or any other cause will be detailed on the reverse of the list and sent to the Amildar with the memorandum of particulars (3rd part) attached to the corres-

ponding money order portion (1st part). The total amount of such Revenue Money Orders will not be included in the amount of remittance made to the Amildar.

XVII. Revenue Money Orders delivered to the village shanbhogs will be received in the Taluk Office invoiced in a list in the form prescribed in Rule XIII *supra*. If the amount of any Revenue Money Order has not been credited in the Revenue Accounts, owing to any irregularity in the remittance, the Revenue Money Order will be treated as "Refused" and sent by the Amildar to the Postmaster or Sub-Postmaster at his headquarters under receipt. All Revenue Money Orders will, if their amounts have been credited in the Revenue Accounts, be signed by the Amildar or in his absence, by the Taluk Sheristadar or the Taluk Head Gumasta, and presented daily at a convenient hour for payment by book-transfer at the Post Office (Head or Sub) at the headquarters of the Amildar whether such Post Office is the office by which the shanbhog's village named in the Money Order is served or not.

XVIII. The Postmaster or Sub-Postmaster at the headquarters of the Amildar will, in exchange for the Revenue Money Orders, give the Amildar a voucher in duplicate representing the value of all the Revenue Money Orders presented to the former by the latter under the usual procedure prescribed for drawings from the Treasuries in the State. The words "Revenue Money Order" will be written in red ink at the top of the voucher. On the reverse of the voucher, the following entry will be made by the Postmaster or Sub-Postmaster under his signature. "Please debit the amount of this voucher to the Post Office by book transfer." The duplicate voucher should be signed and returned immediately. The amount of this voucher will be entered, like other drawings from the Taluk Treasury in the Treasury Pass Book, but in the column headed "Amount drawn by transfer for Revenue or other official money order payments." This entry will be attested by the Taluk Treasury Officer. The amount of Revenue Money Order vouchers will not be charged against the letter of credit of the Postmaster or Sub-Postmaster.

XIX. The amount of the original Revenue Money Order voucher will, on the day it is given by the Post Office, be shown in the Taluk Treasury Accounts on the receipt side as amount received on account of Land Revenue by book transfer and on the disbursement side as amount paid to the Post Office by book transfer.

XX. On receipt of these vouchers in the District Treasury along with the daily cash accounts of the Taluk Treasuries, they should be attached to His Majesty's Treasury Jamakarch account in support of the debit.

Chief Observer in charge.

Dated 28th June 1911.

Proceedings of the Government of His Highness the Maharaja of Mysore,

READ—

Subject No. 98 of the Proceedings of the Representative Assembly of 1908 regarding the introduction into Mysore of the form of Revenue Money Order prescribed in the Madras Presidency for remitting Kandayam by landholders.

2. Also Subject No. 66 of the Proceedings of the Representative Assembly of 1909.

3. Letter No. 8203, dated the 15th February 1910, from the Revenue Commissioner in Mysore, expressing his opinion in favour of the representation.

4. Correspondence ending with letter No. 2225, dated the 12th April 1911, from the First Assistant to the Honorable the Resident in Mysore, conveying the approval of the Director General of the Post Offices for the extension of the Revenue Money Order system in force in the Madras Presidency to the Post Offices in the Mysore State experimentally for three years with effect from the 1st May 1911.

No. R. 6499-509—L. R. 210-08-13, DATED BANGALORE, 30TH MAY 1911.

ORDER THEREON.—Facilities for payment of kandayam by landholders have been provided in Rule 91 of the Land Revenue Rules. Government, however, consider it desirable to increase still further the facilities for the payment of land revenue, for the benefit of absentee pattadars and others interested in the land by adopting a system of Revenue Money Orders similar to the one in force in the Madras Presidency, where, however, the system which was brought into force some six years ago is still in its experimental stage. The Director General of Post offices has also been pleased to accord his approval for the extension of the system to Mysore.

2. The Government of His Highness the Maharaja are accordingly pleased to direct that the Revenue Money Order system be introduced into the State experimentally for three years with effect from the 1st May 1911 and lay down the following rules for the guidance of local officers in the working of the system.

3. The Revenue Commissioner is requested to cause wide publicity to be given to the scheme, and submit a report on the result of its working at the end of the year 1911-12.

Rules relating to the Revenue Money Orders for the Mysore State for the guidance of local officers.

I. The object of Revenue Money Orders is to enable raiyats paying land revenue to Government, especially absentee pattadars and others interested in the land, to remit the amount due by them to the taluk through the shanbhog of the village in which the land on account of which the amount is payable, is situated.

II. Revenue Money Orders must be used only for the remittance of land revenue, cesses, and any other item which is due on account of land or is ordinarily payable with land revenue and cannot be used for any other purpose whatsoever.

III. Revenue Money Orders may contain pies (fractions of an anna) but not fractions of a pie.

IV. If a raiyat holds or is interested in lands covered by different pattas in the same revenue village, he may remit the land revenue due on all such pattas by a single Revenue Money Order, provided that full particulars of each patta are given in the Money Order.

V. The adoption of this system of payment is optional and no raiyat is compelled to resort to it unless he wishes to do so.

VI. The rules do not confer the right to pay land revenue direct into the Taluk Treasury without the intervention of the village shanbhog on any class of landholders except as subject to the exception already provided by Rule 91 of the Land Revenue Rules.

VII. The Revenue Money Order form which is appended to this order and copies of which will be available in all the Post Offices in the State, consists of three parts, *viz.*:—

(1) The Money Order,
(2) The acknowledgment,
(3) The memorandum of particulars of remittance.

The first part is almost exactly like the corresponding portion of the ordinary inland Money Order Form. The upper portion is intended to be filled up by the Post Office and the lower portion by the remitter.

The second part is the acknowledgment for the Revenue Money Order which will be returned to the remitter through the Post Office duly signed by the village shanbhog. This part will be filled up by the remitter.

The third part provides headings for the entry of particulars of remittance which will also be filled up by the remitter for the information of the village shanbhog and the Amildar.

VIII. Revenue Money Orders will be delivered to the village shanbhog by the Branch Postmaster, Postman or village Postman as the case may be, *without cash*. The shanbhog will see that the amount of each order as entered in the Money Order (1st part) corresponds with that entered in the acknowledgment (2nd part) and in the memorandum of particulars of remittance (3rd part). If there is no discrepancy, he will sign the acknowledgment portion of each Revenue Money Order (2nd part), detach it and make it over to the Post Office official who delivered the Money Order. The shanbhog will then grant a receipt for each Revenue Money Order and the coupon or memorandum of particulars delivered to him in the postman's book or village postman's register, which will be presented by the Post Office official along with the Revenue Money Orders.

IX. If either the acknowledgment or the memorandum of particulars of a Revenue Money Order is not completely filled up by the remitter, or if the remitter has omitted to affix his signature on the memorandum of particulars of remittance (3rd part), the shanbhog will return the Revenue Money Order to the Post Office official and will not grant a receipt in respect of such Revenue Money Order.

X. The shanbhog will then have the amount of each Revenue Money Order (which is in order and for which he has granted a receipt to the Post Office official) passed through his accounts treating the Revenue Money Order in every respect as cash or currency note. But the shanbhog will on no account detain the Post Office official who must be sent away immediately the acknowledgment portion of each Revenue Money Order is detached and given to him.

XI. The memorandum of particulars of remittance (3rd part) of each Revenue Money Order will then be carefully filed in monthly bundles by the shanbhog.

XII. If the amount of a Revenue Money Order falls short of the amount payable to Government by the landholder concerned, the amount must still be credited in the village accounts. If, on the other hand, the amount is in excess of the demand, the excess amount will be credited to surplus collections.

XIII. When the day for making the next remittance arrives, all the Revenue Money Orders taken delivery of by the shanbhog will be sent by him to the Amildar along with other collections duly entered in a list in the form appended to these rules.

XIV. The list will be received back from the Amildar duly signed by him or the Taluk Sheristadar or the Taluk Head Gumasta. The list will be filed by the village shanbhog with the memorandum of particulars of remittance (3rd part) of the Revenue Money Orders entered in it.

XV. The issue of a Revenue Money Order which is ultimately delivered to the shanbhog concerned too late for the Khist day does not exempt the remitter from the penalties prescribed in the Land Revenue Code and the rules framed thereunder.

XVI. Revenue Money Orders taken delivery of by the shanbhog, the amounts of which cannot be credited in the village accounts owing to an irregularity in the remittance or any other cause will be detailed on the reverse of the list and sent to the Amildar with the memorandum of particulars (3rd part) attached to the corres-

ponding money order portion (1st part). The total amount of such Revenue Money Orders will not be included in the amount of remittance made to the Amildar.

XVII. Revenue Money Orders delivered to the village shanbhogs will be received in the Taluk Office invoiced in a list in the form prescribed in Rule XIII *supra*. If the amount of any Revenue Money Order has not been credited in the Revenue Accounts, owing to any irregularity in the remittance, the Revenue Money Order will be treated as "Refused" and sent by the Amildar to the Postmaster or Sub-Postmaster at his headquarters under receipt. All Revenue Money Orders will, if their amounts have been credited in the Revenue Accounts, be signed by the Amildar or in his absence, by the Taluk Sheristadar or the Taluk Head Gumasta, and presented daily at a convenient hour for payment by book-transfer at the Post Office (Head or Sub) at the headquarters of the Amildar whether such Post Office is the office by which the shanbhog's village named in the Money Order is served or not.

XVIII. The Postmaster or Sub-Postmaster at the headquarters of the Amildar will, in exchange for the Revenue Money Orders, give the Amildar a voucher in duplicate representing the value of all the Revenue Money Orders presented to the former by the latter under the usual procedure prescribed for drawings from the Treasuries in the State. The words "Revenue Money Order" will be written in red ink at the top of the voucher. On the reverse of the voucher, the following entry will be made by the Postmaster or Sub-Postmaster under his signature. "Please debit the amount of this voucher to the Post Office by book transfer." The duplicate voucher should be signed and returned immediately. The amount of this voucher will be entered, like other drawings from the Taluk Treasury in the Treasury Pass Book, but in the column headed "Amount drawn by transfer for Revenue or other official money order payments." This entry will be attested by the Taluk Treasury Officer. The amount of Revenue Money Order vouchers will not be charged against the letter of credit of the Postmaster or Sub-Postmaster.

XIX. The amount of the original Revenue Money Order voucher will, on the day it is given by the Post Office, be shown in the Taluk Treasury Accounts on the receipt side as amount received on account of Land Revenue by book transfer and on the disbursement side as amount paid to the Post Office by book transfer.

XX. On receipt of these vouchers in the District Treasury along with the daily cash accounts of the Taluk Treasuries, they should be attached to His Majesty's Treasury Jamakarch account in support of the debit.

APPROPRIATION REPORT

ON

THE ACCOUNTS OF THE GOVERNMENT OF MYSORE

FOR

1909-10.

(NOTE.—Throughout this report the figures given are, unless otherwise indicated, in thousands of Rupees omitting 000.)

General Summary.

The budget estimates for the year 1909-10, including the Cauvery Power head were framed for a receipt of 2,32,93 and an expenditure of 2,32,38 resulting in a small surplus of 55. Exclusive of the Cauvery Power Scheme Revenue and Expenditure, the receipts and expenditure were estimated at 2,15,93 and 2,17,51 respectively. Instead of the small surplus of 55, there was thus an estimated deficit of 1,58 on the ordinary account. But this was only nominal. The ordinary account included the interest payable on the loan of 20 lakhs raised in connection with the 3rd Installation of the Cauvery Power Scheme and the amount payable towards the Sinking Fund formed for the repayment of the said loan. Though for avoiding complications in the Cauvery Power Scheme Accounts and for other reasons this loan has been treated as an ordinary State Loan, yet the interest and the Sinking Fund contributions on account of it may, for financial calculations, be regarded as charges against the Cauvery Power Revenues. If these two items were taken out of the ordinary account in the budget estimates of 1909-10 the result would have been a surplus of 55 as stated above, the receipt and charges sides in the Cauvery Power Scheme accounts, the latter including arrears of depreciation fund contributions to a large extent, balancing one another.

2. In the actuals the result was more favourable in as much as the year closed with a surplus of 21,01 as noted below:—

	Budget	Actuals	Actuals more + or less—
	Rs.	Rs.	Rs.
Total Receipts	2,32,93	2,43,58	+10,65
Total Expenditure	2,32,38	2,22,57	— 9,81
Surplus ...	55	21,01	+20,46

3. This favourable result was due to an increase of 10,65 in the receipts and a saving of 9,81 in the expenditure and the causes which led to these are briefly explained in the following two paragraphs.

4. On the receipt side, the important heads which chiefly contributed to the increase were *Land Revenue*, *Excise*, *Mining Royalty*, *State Railways* and the *Cauvery Power Scheme*. *Forest* was the only head which showed an appreciable decrease of 79. The estimate of land revenue was naturally a cautious one as the State had, during the year, just emerged from a series of years of scarcity which in the year preceding the one under report culminated in severe distress in many parts of the State. But during the year under report the seasonal conditions were favourable and the harvests good and it was therefore possible to collect a considerable portion of the suspended revenue at the close of the year. *Excise* was also better as the effects of the scarcity did not prejudicially affect the revenue as apprehended when framing the budget. The mining operations were on the whole somewhat more prosperous than anticipated, yielding a slightly higher revenue. And the

Cauvery Power Scheme yielded 2,49 more as a larger amount of arrears was collected and the remissions on account of stoppages of power were practically *nil* owing to the excellent arrangements made by the Public Works Department for the conservation of water during the dry season. Though the Railway receipts fell short of the estimate by 1,15 yet the working expenses were kept well under control by the Madras and Southern Mahratta Railway Company and this resulted in an increase of 2,07 in the net revenue. The large decrease in the Forest Revenue was mainly due to the disappointing sandalwood sales and partly also to the limited timber operations by Government agency.

5. On the expenditure side, though the savings were in some cases more and in others less, yet all the group heads showed savings. The important variations were however the following. The *Land Revenue* charges were less by 74 owing partly to full effect not having been given to the new Shekdari System and partly also to the Potgi allowance not having been claimed and paid in full. The demand under *Interest* fell short of the estimate chiefly owing to the full amount of interest due on the 4% State Loan of 1906-07 not having been claimed. The absence of any extended tours during the year and some savings in establishment of the General and Revenue Secretariat account for the decrease under *General Administration*. *Education* showed some saving as the charges incurred for the gas installation, the laboratory and apparatus of the Central College did not come up to the amounts provided and some of the grants were not at all utilized during the year under report. There were also some savings in the Taluk School establishments and also in the provisions made for grants-in-aid. Under *Medical* there was some lapse under Sanitary and Vaccination Department Establishments and the grants for Sanitary School and Scholarships for the L. S. Sc. degree were also not utilized to the extent anticipated. The large saving under *Miscellaneous* was chiefly due to the lump addition of 1,50 made under this head on account of grain compensation allowance, being mostly appropriated for other purposes. Moreover the small amount actually utilized and charged on account of grain compensation appears under the heads concerned. Between the Public Works and the Electrical Departments, there was a lapse of 4,43.

6. It will thus be seen that the surplus of 21,01, disclosed by the final accounts of 1909-10, though satisfactory in itself cannot be regarded as the normal outcome of the financial operations of the year taken by itself but has to be viewed as the result of a powerful double reflection from the preceding and following years. Besides the normal land revenue of the year a large amount of the suspended land revenue of the previous year came in, while on the expenditure side most of the so-called "savings" were mere lapses which had to be provided for by enhanced grants in the year following. The poor revenue figures of 1908-09 and the heavy expenditure of 1910-11 may be said to furnish the key to the surplus in the accounts of 1909-10 which was in itself an ordinary year of average financial prosperity.

7. During the year under report the only important change made in the classification was the transfer from *Cauvery Power Scheme* to *Interest* and *Reduction or Avoidance of Debt* of the charges for Interest and Sinking Fund in connection with the State Loan of 20 lakhs raised for the 3rd Installation. For simplification of accounts the loan is treated as a State Loan and the expenditure on the 3rd Installation is treated as State expenditure instead of complicating the Cauvery Power accounts with separate accounts of State capital and Loan capital.

8. The following is a summary of the budget and account figures for the year 1909-10 reviewed in this report. The detailed figures will be found in the statement appended to this report.

NOTE.—In this statement both the budget and account figures are net, *i.e.*, on the revenue side the gross figures *minus* refunds are shown, while on the charge side the gross expenditure *minus* departmental receipts are given. The revenue from *Salt* has been deducted from miscellaneous expenditure as usual.

10. The important variations in the actuals as compared with the budget estimates have been already generally explained. They are also explained in more detail later on. The variations in the actuals of the year, as compared with those of the previous, are also explained under the heads concerned.

Appropriation Audit.

11. The following statement shows the excess over budget grants still requiring sanction, for which additional allotments have not been made by reappropriation :—

Major and minor heads of account	Amount of excess expenditure	Already sanctioned		Amount of excess requiring sanction	Remarks in explanation of excess
		Amount	Government Order No. and date		
2. Land Revenue—					
Assignments ...	3	...	.....	3	Due to larger Malnad Land Inam payments on account of arrears.
4. Excise—					
Superintendence (Headquarters)	2	...	.....	2	Due to the grant of privilege leave to the Excise Commissioner and the appointment of an acting officer.
8. Stamps—					
Superintendence (1), Discount on sale of stamp papers (2).	3	...	.....	3	The excess in the first case is due to rounding and in the second to larger sale of stamps.
12. Interest on other obligations—					
Interest on Endowment Funds (1), Interest on State Life Insurance Funds (2) and Refunds (2).	5	...	.....	5	Increase in the amount of the Funds necessitated the increase in the payment of interest.
15. General Administration—					
Staff and Household of H. H. the Maharaja (22), Comptroller's Office (3).	25	...	.....	21	There was an excess of 25 caused by the appointment of the Military Secretary to His Highness and the increased charges under establishment of the Comptroller's office. Of the excess under the former head 4 was met by re-appropriation.
16A. Law and Justice—Courts of Law—					
Munsiffs' Courts (1) and City Magistrates' Courts (2).	3	...	.....	3	Increases under salaries of Munsiffs and of City Magistrates.
17. Police—					
Superintendence (6), District Police (2).	8	...	.....	7	Excess in the first case due to travelling allowance of C. I. D. and of officers. Of this 1 was met by re-appropriation. In the case of District Police excess is chiefly due to grain compensation allowance, provision for which was made under "26 Miscellaneous."
20. Medical—					
Chemical Examiner and Bacteriologist (2).					Caused by the deputation of Dr. Srinivasa Rao to England. Of this 1 was met by re-appropriation.
Medical scholarships (1) .	3	...	.....	2	Due to the grant of scholarships to Sanitary Inspectors for which no provision was made in the budget.
24. Superannuation and Retired allowances.	1	...	.....	1	On account of increased pensionary payments.
25. Stationery and Printing—					
Printing and Gazette Office (9), Branch Press at Mysore (1).	10	...	.....	3	The excess of 9 was chiefly under purchase of materials and type and of this 7 was met by re-appropriation. The small difference of 1 under Branch Press is due to rounding.
26. Miscellaneous—					
Travellers' Bungalows (3), Special and unforeseen charges (1).	4	...	.....	4	Due to increase under establishment charges of travellers's bungalows and to special and unforeseen expenditure.

Amount under objection.

12. The total amount under objection at the end of October 1910 was 1,80. The following table gives the distribution of this total by districts :—

Treasuries	Land Revenue	Excise	General Administration	Law and Justice	Police	Education	Medical	Scientific, etc., Departments	Miscellaneous	Total

Section A.—Principal Heads of Revenue.

Revenue.

Accounts 1908-09	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.	Rs.	Rs.	Rs.
1,63,51	1,75,77	1,71,48	1,78,47

14. The revenue in this section exceeded the estimate and actuals of the previous year by 2,70 and 14,96 respectively. The former is accounted for chiefly by the return of agricultural prosperity and the latter by the large remissions and suspensions of land revenue necessitated by the distress which prevailed in the preceding year.

I. Land Revenue.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
82,07	Assessment on lands...	94,70	91,96	96,12
4,45	Quit-rent of minor Inam villages including Kayamgutta	5,24	5,24	5,07
2,57	Miscellaneous	3,41	3,26	3,80
7	Rent on toddy trees	4	4	4
89,16	Total ...	1,03,39	1,00,50	1,05,03

15. The revenue realized under this head exceeded both the budget estimate and the actuals of the previous year, the excess in the former case being 1,64 and in the latter 15,87. Owing to the favourable seasonal and agricultural conditions, it was possible to collect a somewhat larger portion of the suspended revenue than anticipated. The large difference as compared with the previous actuals was due to the fact that in the previous year the acute distress which prevailed necessitated large remissions and suspensions.

The revised was based on the actuals of the first nine months of the year, *i. e.*, on collections up to March inclusive. The land revenue is paid by the Mysore raiyat in four instalments after the harvest, *i. e.*, between January and June and generally speaking there is no tendency on his part to postpone the instalments. On the other hand many raiyats find it convenient to pay the whole amount or instalments larger than required in the earlier months just after the harvest. But this usual course of things did not happen in the year under report when the collections during the last three months, *viz.*, from April to June were unexpectedly large as shown below :—

Collection during first six months, *viz.*	1906-07	1907-08	1908-09	1909-10
	Rs.	Rs.	Rs.	Rs.
July to December	5,48	6,01	4,68	5,90
January to March	47,48	51,21	38,87	47,26
April to June	47,40	46,58	45,60	51,87

The reason for this perhaps was that the raiyat had a really good harvest for the first time in 1909-10 after a series of unsatisfactory years and it took him some time after collecting the harvest to review the situation and see how far he could pay up his land revenue including the arrears of previous years and also repay the instalments of loans which he might have received during the preceding period of depression. The same considerations may have led to cautious collection on the part of the revenue officers of Government just after the harvest. By April 1910, the raiyat felt sure of the situation and collection also proceeded energetically. Hence the actuals exceeded the revised by 4,53.

II. Forest.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
13,33	Timber and other produce removed by Government agency	15,11	11,67	12,68
4,40	Do by consumers or purchasers...	3,46	3,90	4,48
...	Confiscated drift and waif wood ...	1	...	...
30	Miscellaneous	80	99	1,43
18,03	Total ...	19,38	16,56	18,59

16. These receipts fell short of the estimate by 79 but exceeded the previous actuals by 56. The decrease in the former case was mainly under *Timber and other produce removed by Government Agency*. The sandalwood sales during the year were as already stated disappointing and realized 1,69 less than the estimate. The receipts from timber were less, due partly to the small stock of prepared timber on hand and partly also to the restricted timber operation consequent on the withdrawal of the elephants for kheddah work. The realization under "Grass and other minor produce" was only 5 against the estimate of 15 due, it is said, to the withholding of the sale of a large quantity of gall-nuts in consequence of the low rates offered at the auctions. On the other hand the receipts from *Timber, etc., removed by consumers and purchasers* exceeded the budget anticipations by 1,02 and the improvement was due mainly to the large extraction of timber and other minor produce. Under *Miscellaneous* the large increase was chiefly due to the kheddah operations by which 92 elephants were caught,—of which 1 escaped and 13 died; and of the remaining 78, 61 were sold for Rs. 1,08,255. As compared with the previous actuals the decrease of 65 under *Timber, etc., removed by Government Agency* was more than counterbalanced by the increase in the kheddah receipts.

The revised was based on the actuals of the first ten months and before the improved collections in May and June 1910 were known. The improvement over the revised was chiefly under sandalwood and elephant kheddas.

III. Excise.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
21,95	Arrack	20,10	21,03	21,20
20,42	Toddy	19,41	19,69	20,03
2	Beer	4	3	3
4	Akki Bhoja—License Fees	2	4	4
68	Ganja	54	75	24
42	Opium	30	34	40
10	Miscellaneous	6	9	10
...	Proportionate share of the cost of Central Distillery Establishment charges recovered from the Civil and Military Station ...	3	3	7
43,63	Total ...	40,50	42,00	42,11

17. This head showed a substantial increase (1,61) over the estimate but fell short of the actuals of the previous year by 1,52. The increase was mainly under *Arrack* and *Toddy*. The estimate framed by the Excise Commissioner was somewhat pessimistic as he anticipated a fall in the revenue in consequence of the prevailing distress at the time of framing the budget. The above improvement was shared by all the minor heads except *Beer* and *Ganja*. Under the former the license fees realised were less, and under the latter the gain by sale was not adjusted during the year. The chief source of the increase under *Arrack* was as usual, the still-head duty while that under *Toddy* was the shop-rental. The proportionate share of the cost of the Central Distillery recoverable from the Civil and Military Station was more than double, as the actuals included the recovery on account of the amount due for the previous year.

Compared with the actuals of the previous year, the bulk of the decrease was under *Arrack* and *Toddy*, due in both cases to less consumption. The actuals compare very well with the revised.

IV. Assessed Taxes.

Accounts, 1908-09	2,44
Budget, 1909-10	3,00
Revised, 1909-10	2,75
Accounts, 1909-10	2,89

18. The actuals compare favourably with the estimate and exceed the previous actuals by 45.

VI. Salt.

Accounts, 1908-09	5
Budget, 1909-10	10
Revised, 1909-10	7
Accounts, 1909-10	8

19. This is an insignificant head of revenue, the realisations under which fluctuate from year to year.

VII. Stamps.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
3,57	Sale of general stamps	3,20	3,20	3,55
4,59	Sale of Court-fee stamps	4,47	4,47	4,37
8	Sale of plain paper for Court purposes ...	7	7	8
12	Duty on impressing unstamped and insufficiently stamped documents ...	14	14	6
12	Fines and penalties	11	11	10
...	Miscellaneous	1	1	...
8,48	Total ...	8,00	8,00	8,16

20. The two important items of this revenue are the *General* and *Court-fee* stamps which together showed an excess of 25 over the budget estimate. There were slight deviations in the other items but they are unimportant and call for no remarks.

The previous year was one of distress which was attended by some increase of Stamp and Registration revenue over the usual amount.

VIII. Registration.

Accounts, 1908-09	1,72
Budget, 1909-10	1,40
Revised, 1909-10	1,60
Accounts, 1909-10	1,61

21. The fluctuations are small and call for no remarks.

Section A.—DIRECT DEMANDS ON THE REVENUE.

Expenditure.

Accounts 1908-09	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.	Rs.	Rs.	Rs.
32,69	33,98	33,23	33,11

22. The expenditure in this section showed a saving of 87 on the estimate but exceeded the actuals of the previous year by 42. The saving was mostly under *Land Revenue*.

1. Refunds and Drawbacks.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
1,58	Land Revenue	1,64	1,58	1,59

21	Stamps	24	25	28
1	Other Refunds	1	1	1
1,89	Total ...	2,22	2,15	2,30

23. This is a fluctuating head. The *Excise* and *Stamps* refunds were somewhat under-estimated.

2. Land Revenue.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
62	Revenue Commissioner	62	60	59
8,85	Charges of District Administration ...	8,92	8,73	8,61

1,58	Revenue Survey and Settlement	1,62	1,54	1,52
5	Inam Department	6	5	5
10	District Survey Establishment ...	11	9	10
12	Assignments	15	19	18
18,58	Total ...	19,41	19,00	18,67

24. This expenditure was short of the estimate by 74 but was about the same as that of the previous year.

The decrease as compared with the estimate was shared by almost all the minor heads and the reasons for the important deviations are as under:—

(*a*) *Charges of District Administration.*—31. The new Shekdari system was not evidently given full effect to and about half the amount of the grants under Supplies and Services lapsed.

(*b*) *Remuneration to Shanbhogs and Patels.*—31. The full amount due was not claimed during the year.

(*c*) *Revenue Survey and Settlement.*—10. The lumpsum grant of 1,00 provided for establishment proved too high.

As compared with the previous actuals, against a saving of 33 under *Revenue Commissioner* (3), *Charges of District Administration* (24), and *Revenue Survey and Settlement* (6) due mostly to absence of charges on account of grain compensation allowance, there was an excess of 42 in the *Remuneration paid to patels and shanbhogs* (36) and in the Malnad Inam payments (6) consequent on arrear payments. The net result was an excess of 9.

The actuals followed the revised fairly closely.

3. Forest.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.
4,62	Conservancy and Works	4,64	4,52	4,69
3,00	Establishment	3,11	3,00	3,02
7,62	Total ...	7,75	7,52	7,71

25. The expenditure under this head closely followed the estimate and the actuals of the previous year. There were however variations in the details as compared with the estimate and the noteworthy items are—

(1) a saving of 51 under *Timber, etc., removed by Government Agency* due to the slack demand for sandalwood and the comparatively less quantity of wood prepared for sale and also to the restricted timber operations by this agency;

(2) an excess of 1,01 under *Live and Dead Stock* caused by the kheddah operations organised and the new traction engine purchased during the year;

(3) a nominal saving of 51 under *Miscellaneous* due to the charges in connection with the kheddah operations having been classified under (2);

(4) an excess of 11 in the charges for *Demarcation, etc.*, due partly to the payment of arrears of demarcation charges and partly to the clearing of frontier line and also to the effective measures adopted for the protection of forests; and

(5) a saving of 9 in the charges for establishment and contingencies.

As compared with the previous actuals while the establishment charges were about the same there was an excess of 7 under *Conservancy and Works*. This excess is the net result of a large decrease in the cost of the timber operations, of preparation of sandalwood and in the charges incurred under demarcation, surveys and sowing and planting, and of an excess of 83 due to the purchase of a new traction engine and the kheddah operations conducted during His Excellency the Viceroy's visit.

The revised was based on the 8 months' actuals but subsequently some of the unspent grants were re-appropriated for other expenditure which was not anticipated in the revised. Hence the difference.

4. Excise.

...	Loss by dryage and wastage of ganja ...	...	...	...
...	Loss by dryage and wastage of majum ...	...	...	...
3,40	Total ...	3,39	3,32	3,21

26. The main feature in this expenditure is the saving of 18 on the estimate chiefly in the grants under supplies and services. The lumpsum provision made for the remuneration payable to the contractors for carrying liquor from distillery to bonded depots proved somewhat high, while the grants for communications were not utilised.

The reason for the difference between the actuals of the year and those of the previous year was that during the year the charges for carriage of liquor from the distillery to the depots were less by about 19 owing no doubt to less consumption during the year under report.

Section AA.—MINING REVENUE.

Mining Royalty and Leases.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs.

31	Rent on prospecting lands	6	7	12
...	Fines on assignments	...	1	1
15,96	Total ...	14,56	15,20	16,53

29. The revenue from this source was better than the estimate and the previous actuals by 1,97 and 57 respectively. The increase of 57 over the actuals of 1908-09 is the result of increases of 11,47 in the outturn of the Mysore, Nandidrug and Ooregaum Mines and of decreases of 2,60 in that of the Champion, Balaghat and other mines.

The following table gives the gold produced and the Royalty realised thereon both during the year 1909-10 and the previous year :—

	1908-09	1909-10	1909-10 more + or less —
Weight of bar gold produced in ozs.	538,867	552,781	+13,914
Certified value in £	2,068,456(a)	2,124,450(b)	+55,994
Royalty in £	103,019	106,000	+2,981

Arrears remaining at the end of the year in £	21,674	18,928	—2,746

(a) and (b) include £ 8,080 and £ 4,447, respectively, worth of gold produced by the Mysore West and Mysore Wynaad Companies, on which no royalty was paid under the recent rules.

Section AA.—MINING REVENUE.

10. Charges against Mining Revenue.

6	Miscellaneous	5	5	4
15	Refunds	44	44	42
1,99	Total ...	2,44	2,42	2,37

30. The difference between the estimates and the actuals is comparatively small and calls for no remarks.

Compared with the actuals of 1908-09 the expenditure is higher by 38. The large difference was chiefly under *Refunds* due to the payment in terms of the altered lease to the Mysore West and Mysore Wynaad Gold Mining Companies of about 27 being the refund of the royalty over-paid in 1907 by the said companies.

23	Interest on arrears of Revenue	28	30	36
1,15	Total ...	1,30	1,66	1,77

32. During the year a vigorous attempt was made to recover the arrear interest due on loans to agricultural banks and the result was some increase in realisations. It is feared however that a part of the recovery of principal has been wrongly credited to interest in the treasuries. The matter is under correspondence and needful adjustment will be made later on. The collection of *Interest on Arrears of Revenue* was also better by 8. The same good result is not however observable in the realisation of interest on the other loans. As may be seen from the table given below the interest on loans to *Encumbered Jahgirdars* showed a large outstanding of 83 at the close of the year while that due on *Special Loans* amounted to 88. The total collections however exceeded the total estimate by 47 and the previous actuals by 62.

Table showing the demand, collection and balance of interest on Loans.

(*a*)—This includes interest on account current with the Mysore Spinning and Manufacturing Company.

(*b*)—The balance shown in the last year's report is 36. The increase is due to the readjustment of the amounts due by the members of the Chikmagalur and Saklespur Banks

33. The profit on investments was better by 39 consequent on the additional investments made during the year after the budget estimate was sanctioned. On the other hand the interest on the current deposit with the Madras Bank was nil as the amount due was adjusted by the Bank only in July 1910.

69		85	70	59
70	*Less* Interest debitable to Cauvery Power Scheme	...	...	...
—1	Total ...	85	70	59

35. The accounts were less than the estimate by 26 as the small provision made for the settlement of claims of interest which might arise in connection with the *Mysore 5% Railway Loan of 1882* was not needed, and the demand for the interest on the *4% State Loan of 1906-07* fell short of expectations to the extent of 21.

Compared with the previous actuals, the excess was nominal as in the previous year the major portion of the interest paid on the 4 % State Loan of 20 lakhs was under the then existing arrangements, charged to the Cauvery Power Scheme. But this arrangement has since been cancelled (*Vide* Government Order No. Fl. 703-43—G. F. 506-08-2, dated 28th July 1909) and the whole of the interest paid is now charged to this head.

12. Interest on other Obligations.

53	Interest on Mysore State Life Insurance Fund	57	59	59
23	Refunds	...	...	2
3,00	Total ...	3,08	2,99	2,94

36. This expenditure on the whole closely followed the estimate and the actuals of the previous year. The only fluctuation worth noticing was that under *Interest on Mysore Government Savings Bank Deposits* and this was due partly to a slight fall in the amount of deposits and partly to the full amount of interest due on such deposits not having been adjusted during the year.

13. Profit or Loss.

...	Interest on overdraft and on temporary loan from Madras Bank...	...	...	...

37. The reason for the short expenditure under this head is due to a change made in the form of investment in Government paper by which there was a reduction in the amount of the income-tax payable.

3,89	3,88	3,89	4,32

39. These receipts exceeded the estimate and the actuals of the previous year, the excess in the former case being 44 and in the latter 43. The chief increases were under *Education, Medical* and *Scientific, etc., Departments* and are explained under the respective heads.

XII A. Law and Justice—Courts of Law.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10

4	Miscellaneous	3	3	2
44	Total ...	43	44	42

40. There was nothing special in the receipts under this head. The actuals closely followed not only the estimate but also the previous actuals.

XII B. Law and Justice—Jails.

5	Cost of maintenance of Civil and Military Station prisoners ...	4	6	6
...	Savings and Refunds	...	...	...
...	Miscellaneous	...	...	...
24	Total ...	25	19	24

41. The fluctuations in this case were small except under *Jail Manufacture* and call for no remarks. The large receipts under *Jail Manufacture* at the close of the year could not be foreseen in the revised.

XIII. Police.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10
Rs.		Rs.	Rs.	Rs

1	Savings and Refunds	...	...	...
...	Miscellaneous and other items ...	2	1	1
15	Total ...	25	20	29

42. The actuals under *Seven-tenths share of Railway Police recovered from Companies* were larger as the arrear dues on this account as well as on account of the Contribution for Detective Police which were under correspondence in the previous year were collected during the year. This accounts for the large increase over the actuals of the previous year also.

XIV. Education.

1	Savings, refunds and fines ...	1	...	...
1,31	Total ...	1,28	1,38	1,34

43. The receipts from *School fees* were better than the estimate by 7 and there is nothing unusual in regard to the actuals under the other minor heads. The variations under these are comparatively unimportant.

XV. Medical.

...	Contribution from the Municipalities of Bangalore and Mysore Cities on account of the pay of Health Officers	9	8	8
92	Total ...	1,04	1,05	1,28

44. There was an improvement in the recovery of contribution from Municipal and District Funds on account of Local Fund dispensaries due to arrear adjustments. The contributions on account of the pay of the Health Officers, Bangalore and Mysore, was a new item of credit to this head.

XVI. Scientific and other Minor Departments.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10

15	Miscellaneous	7	6	7
1	Receipts on account of public exhibition and fairs.	1	1	...
83	Total ...	63	63	75

45. The chief items which contributed to the increase over the budget were the sales of Amrut Mahal cattle and the terige or assessment on Amrut Mahal kavals. On the other hand, the receipts on account of the Public Exhibitions and Fairs and the Fees from the Mysore Civil Service Examination were almost *nil*. Hence while there was a slight increase over the budget estimate, the receipts fell somewhat short of the previous actuals.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

Expenditure.

	Accounts 1908-09	Budget 1909-10	Revised 1909-10	Accounts 1909-10

Balance ...	48,73	50,18	49,49	48,37

46. The total expenditure under this group of heads showed a large saving of 1,81 as compared with the estimate and a decrease of 36 as compared with the actuals of the previous year. These variations are the aggregate results of excesses and savings which are explained in their proper places.

15. General Administration.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10

5	Durbar presents	5	5	1
6,80	Total ...	6,96	7,07	6,75

47. The charges under this head were short of the estimate by 21 and were about the same as the previous actuals. The chief items of decrease are the *Tour charges* (13) and the *Civil Secretariats* (24). The former was due to the absence of much touring during the year and the latter was due to savings in charges for establishment, travelling allowances and contingencies of the Secretariat. On the other hand there was an increase of 22 under *Staff and Household of His Highness the Maharaja* due to the creation of the appointment of a Military Secretary to His Highness. This increase was however accompanied by a corresponding reduction under *Military* as the appointment was created by the abolition of the post of Military Assistant to Government.

The same remarks apply to the differences between the year's and the previous actuals, the net result being a small saving of 5. The revised did not contemplate the large savings under *Tours* and *Government Houses*, etc.

16A. Law and Justice—Courts of Law.

7,84	Total	7,86	7,77	7,70

48. This expenditure followed the estimate rather closely except under *Chief Court* in which the provision made for the temporary puisne judge was not found necessary.

16B. Law and Justice—Jails.

Accounts 1908-09	Minor Heads	Budget 1909-10	Revised 1909-10	Accounts 1909-10

1,30	Total	1,27	1,29	1,23

49. The actuals under this head were about the same as the estimate and the previous actuals and the small difference was due to savings under Jail establishment.

17. Police.

27	Share of Land Revenue charges debitable to Police	27	28	27
9,58	Total	9,30	9,46	9,36

50. These charges also followed the budget estimate excepting for a slight excess of 6 which was chiefly under *Superintendence* due to increased travelling allowance charges.

As compared with the previous actuals the decrease was mostly due to the absence during the year of the heavy charge for grain compensation allowance incurred in the previous year in connection with the distress.

18. Education.

Accounts 1908-09 Rs.	Minor Heads	Budget 1909-10 Rs.	Revised 1909-10 Rs.	Accounts 1909-10 Rs.

47	Miscellaneous	52	51	50
...	Refunds	...	...	...
10,01	Total ...	10,87	10,47	10,29

51. This expenditure was short of the estimate by 58 but exceeded the actuals of the previous year by 28. The saving on the estimate was distributed under almost all the minor heads, but the important savings were under *Government Colleges* (29), *Government Taluk Schools for Boys and Girls* (8) and *Grants-in-aid* (7). The first of these savings was mainly due to the provision made for gas installation at the Central College not being fully utilized and to the Laboratory and Apparatus charges being less by 4; the second was due to the fact that the deduction made for the usual savings proved somewhat low, and the third was the combined result of small savings under "Salary and rent" and "Building grants."

The excess over the previous actuals was mainly under *Government Colleges—General*, consequent on the large additions made to the staff of the colleges and to the special grants made for laboratory and apparatus with the view of adapting the colleges to the new University Regulations.

The revised did not take into account the small savings and lapses under *Salaries, Supplies and Services and Contingencies* of the Government Colleges.

19. Muzrai or Religious and Charitable Institutions.

Accounts, 1908-09	3,50
Budget, 1909-10	3,57
Revised, 1909-10	3,52
Accounts, 1909-10	3,58

52. The actuals in the aggregate followed the budget estimate but exceeded the previous year's expenditure by 8. This slight excess was due chiefly to the transfer to this head of the portion of the cost of the Muzrai Superintendent's Establishment from *General Administration* and partly to the debit to this head of the expenditure incurred in the religious institutions in connection with the marriage of His Highness the Yuvaraja of Mysore, which may probably be debited to Palace.

20. Medical.

2	Medical Scholarships	4	3	5
2	Refunds	...	...	...
7,07		7,60	7,21	6,91

53. This expenditure on the whole was short of both the estimate and the actuals of the previous year by 69 and 16 respectively. The most important causes of the decrease in the former case were as under :—

(1) *Medical Establishment*,—19, Due to savings in the charges for salaries and travelling allowances;

(2) *Medical Stores*,—8, to the grant for Europe medicines not having been fully utilized during the year.

(3) *Sanitation and Vaccination*,—44, to the abandonment of the idea of creating Divisional Sanitary Officers and to the full number of the District Sanitary Officers not having been appointed; to the grants for the Sanitary School and the scholarships for the L. S. Sc. degree not having been utilised; and to a portion of the grant for the Public Health Laboratory having lapsed.

The saving of 16 on the actuals of the previous year was the result of a number of variations. Under *Medical Establishment* there was a saving of 8 mostly in the salaries of District Medical and Sanitary Officers and partly also in the charges for Travelling Allowances. Under *Durbar Physician* in the previous year there was a special charge on account of special Medical Officer with H. H. the Yuvaraja of Mysore. On the other hand, there was an excess of 20 under *Sanitation and Vaccination* as this department is being gradually brought up to the sanctioned strength.

The revised anticipated an increase in the dietary charges in hospitals and in the cost of Europe Medicines in connection with the arrear bills for which additional grant had been applied for. In the former case the increase was not large and in the latter case the additional grant and a small portion of the original budget grant were after all allowed to lapse.

54. In this case also the actuals were less than the estimate and the accounts for 1908-09. The important savings in the former case were under *Experimental Cultivation* due to savings in Salaries and in the grants for Supplies and Services, and under *Veterinary and Stallion charges* due to small savings in the establishments of the Civil Veterinary and of the Amrut Mahal departments. There were also other savings but they were unimportant.

As compared with the previous actuals, the saving was chiefly under *Experimental Cultivation*, as in the previous year there was a provision of 8 on account of the pay of the

Agricultural Chemist for about seven months and under *Veterinary and Stallion charges*, due partly to the lump provision made for opening out additional Veterinary Dispensaries not having been utilised and partly to the absence of any heavy charges on account of grain compensation allowance. There was however a fresh charge of 5 in connection with the newly formed Census department.

63. This expenditure showed a large saving of 1,84 on the estimate but exceeded the actuals of the previous year by 1,64.

As compared with the estimate, the following are the important variations. The saving under *Miscellaneous General* was due to the lump provision of 1,50 made on account of grain compensation allowance, which was only partly utilized for the purpose. Moreover the actual charge incurred has been debited to the departments concerned and the rest of this grant was reappropriated for other purposes. Under *Charities, Donations, etc.*, the full grant sanctioned for the bust and additional statue of His Highness the late Maharaja was not utilized. The other savings are comparatively small and require no remarks.

Compared with the previous actuals the excesses were chiefly under the following minor heads and for the reasons noted opposite each.

Miscellaneous General + 14	.... The cost of purchase and repair of tents and the amount of the irrecoverable loans written off during the year were greater.
Reception of Important Personages + 1,04	Due in connection with the visit of His Excellency the Viceroy and Governor-General of India.
Contributions + 43	.... There was an increase during the year in the amount of the grant paid to the Mysore City Improvement Fund, but this was partly reduced by the absence of special grants to other Municipalities for special purposes.
Charities and Donations + 22	.... In the previous year the grant for the additional statue of His Highness the late Maharaja was not utilized while during the year only part of the provision made was utilized. Hence the excess.

The large saving as compared with the revised is due to the additional grant of 64 sanctioned to the Mysore City Improvement Trust Board for the acquisition of certain houses in the Fort not having been availed of and to the provision made for the bust and statue of His Highness the late Maharaja not having been fully utilized.

64. The receipts in this section were much less than either the budget estimate or the previous actuals. Under *Military Proper* the tonga services yielded nothing and the hire of Government carriages was less than that anticipated; under *Kunigal Farm* while the yield from the Farm produce was less, the realization from the sales of foals was about three times the estimate. The receipts from the *Hessarghatta and Nadamavinapura Farms* were evidently over-estimated as the actuals were only one-fifth of the estimate.

The same reasons mostly account for the differences between the present and the previous actuals.

65. The actuals of the year were short of the estimate and of the actuals of the previous year by 27 and 19 respectively.

Compared with the budget estimates the chief variations were the savings under *Headquarters* (20), *Hessarghatta and Nadamavinapura Farms* (8), *Imperial Service Transport Corps* (15) and *Superannuated and Retired allowances* (8), and excesses under *Government Stud Farm, Kunigal* (11), and *Barr or Native Infantry* (10). The largest saving was under *Headquarters* due to the abolition of the appointment of the Military Assistant for which the usual provision had been made but this was counterbalanced by the creation of the post of Military Secretary to His Highness the Maharaja under *15. General Administration,—Staff and Household.* Really speaking there was an increase in establishment charges by the creation of a new appointment of Chief Veterinary Officer, Mysore State Troops; under *Hessarghatta and Nadamavinapura Farms* the farm expenses were less than estimated. In the *Imperial Service Transport Corps*, there were as usual small savings under salaries, establishment, feed and keep of ponies, and the grants for line gear and mobilisation equipment were only partially utilised; on the other hand there was a small excess on account of grain compensation allowance paid. Under *Superannuation and Retired allowances*, the usual provision was made but the actuals were less by 8. As compared with the accounts for 1908-09 while there was a saving of 33 under *Imperial Service Regiment*, due to the varying grants for supplies and services—both ordinary and special, the *Barr or Native Infantry* and *the Imperial Service Transport Corps* showed excesses of 16 and 22 due chiefly in the former case to the payment of grain compensation allowance to the men of the Barr and in the latter case to the increased cost of feed of ponies.

The revised did not expect the large lapses under compensation for dearness of gram and ragi of the *Local*, and under supplies and services of the *Imperial Service Regiments* and the small lapses under the other minor heads.

70. The improvement over the estimate was mainly in connection with the sale of water to the mines and was due to nearly the full stipulated quantity having been supplied. The realizations under "Rents" and "Contributions from the District and Municipal Funds" were also better. The decrease as compared with the actuls of the previous year was mainly due to the reduction in the price of water supplied to the gold mines from 15 annas to 10 annas per 1,000 gallons with effect from February 1910 in terms of the agreement with the mines.

71. There was on the whole a large lapse in this expenditure as compared with the estimate and the previous actuals. The causes of the variations in the details are explained below.

Irrigation, Major.—The actuals of the year fell short of the budget estimate by 67 and the previous actuals by 27. The short expenditure in the first case was caused by the surrender of grant to the extent of 34 in the course of the year and by transfer to the *Cauvery Power Scheme* of the cost of the Public Works establishment employed on it from 1900-01 to 1903-04. The short expenditure in the second case was due mainly to less outlay on the Marikanave Project, and other important tank works which have been practically completed.

Irrigation, Minor.—In this case also, the actuals of the year fell short of the budget estimate and the expenditure of the previous year by 55 and 75 respectively. This was due in the former case mainly to savings on completed works, failure of contractors or labour difficulty and non-payment of land compensation in time; and in the latter case to the improvement in the seasonal conditions and the absence of specially large grants like those of 1908-09 for the restoration of the minor tanks.

Other Public Works—Civil Works.—The excess of 36 as compared with the estimate was due mainly to increased expenditure in the reconstruction of the Palace at Mysore, on the construction of a new building for the Bangalore Government High School and in connection with the alterations and improvements to the Stamp Manufactory. The excess over the previous actuals was in consequence of the increased grants provided during the year for the construction at Bangalore of a Physics Laboratory in the Central College, a new building for the Government High School and an Eye Hospital.

Military.—The greater portion of this grant was surrendered. The small excess over the previous actuals was chiefly owing to the construction of a new Rifle Range at Bangalore for the Imperial Service Lancers undertaken during the year.

Railway Construction.—The actuals of the year were less than the budget estimate by 87 and the actuals of the previous year by 94. The smaller number of works undertaken and the less debit on account of the proportionate share of the General Stores balance are the causes of the short expenditure.

As compared with the revised there was a large lapse of 2,36. The Public Works Department obtained additional grants in the course of the year to the extent of 1,47, but about the close of the year it resigned 1,13 and allowed 1,23 to lapse. There was also a lapse of 87 under Railway construction.

72. The revenue realised during the year exceeded the budget anticipation by 2,49 and the previous actuals by 2,03. A provision of 1,28 was made in the budget for remissions on account of stoppages and short supply of power during hot weather; but this was found unnecessary. This and the normal growth of revenue due to more house connections in Bangalore and Mysore were the causes of the increase.

73. The total expenditure under this head fell short of the budget estimate by 2,37, and the actuals of the previous year by 2,07. There was a large saving under the head "Revenue Account" due chiefly to the arrears of depreciation charges to the extent of about 1,70 expected to be adjusted in the year under report, having been adjusted in the previous year, and partly to the non-purchase of foreign stores for maintenance works as originally intended. There was an excess of 10 on account of deputation of local officers to Europe and America sanctioned in Government Order No. 764-68—6419-23, dated 28th August 1909 and of 22 due to the Channel Conservancy arrangement sanctioned in Government Order No. 108-12-6—1241-1259, dated 9th February 1910; but these have been counterbalanced by a decrease of about 40 caused by the transfer of surplus stores borne on maintenance works to the suspense head "Stores."

Under the head "Capital Outlay," the excess of 30 over the estimate was caused partly by the adjustment (by credit to deposits and debit to work) of 17 being the amount payable to the Indian Institute of Science on account of the acquisition of their power line as sanctioned in Public Works Secretary's No. C. P. S.—176, dated 6th August 1910, and partly to the transfer of Surplus Stores from maintenance works mentioned above. The large decrease of 1,45 appearing against *Civil and Military Station Section* represents the write-back from this section to the Bangalore City section of the moiety of the cost of Bangalore Transmission line, as under the new method of accounting sanctioned in G. O. No. 118-22—819-23, dated 1st February 1909, the latter should bear the whole cost.

The revised estimate framed by the Electrical Department did not take into account the large saving in the working expenses.

Sections M-V.—DEBT HEADS.

74. *M. Adjustments.*—The transactions under this head compare fairly well with the estimate and the revised and the adjustments on account of cess amounted to 9,59 as against 9,80, budget and 9,50, revised. This amount was alloted to the several funds as under :—

Local Fund General	1,64
District Funds	5,42
Village School Fund	2,53

75. *O. Permanent Debt.*—No transactions.

76. *P. Unfunded Debt.*—The net result of the transactions under this head was—95 as against the estimate of+5,25. The bulk of the transactions under this head are those connected with Savings Banks, and they resulted in a net decrease of 3,85 instead of an anticipated increase of 3,50.

The reasons for fluctuations under the head Savings Banks deposits during the year under report have been explained in my report on the working of Savings Banks in the State, *vide* report printed with Government Proceedings No. Fl. 5356-65—G. F. 312-10-2, dated 28th April 1911.

77. *Q. Deposits and Advances.*—This head comprises of numerous items, the estimates under which are more or less rough. The net result of the transactions under this head was—4,73 against the estimate of+10. This was chiefly the result of an overdraft of 5,01 in the Palace Deposit account which was partly counterbalanced by other variations in other directions.

78. *R. Advances and Loans.*—The estimate was framed for a net debit of 1,46 but the actuals showed a net credit of 1,08. The better recoveries under Loans to Municipalities, Land Improvement Loans, and Loans to Agricultural Banks and Land Improvement Loans and Takavi advances under the new rules, the sale of certain mill debentures held by the Government and lapses in the provisions made for Loans to Municipalities, Land Improvement Loans and Advances and Loans to Co-operative Societies have all contributed to this result.

79. *T. Remittances.*—The transactions under this head resulted in a net debit of 42 and this is due to some of the items of receipts for and payments by Public Works Department having as usual remained unadjusted at the close of the year. It is usual in the absence of special circumstances to the contrary to anticipate in the estimate that the remittance transactions always balance each other.

80. *U. His Majesty's Treasury.*—It was anticipated that the transactions in the State treasuries on account of the British Government would be the same on both the credit and debit sides. The figure—26 is the result of small variations which call for no remarks.

81. *V. Cash Balances.*—The net transactions of the year showed an increase of 15,73 and the variations which brought about this result were as under :—

Letter No. 12315, dated 1st June 1911, from the Revenue Commissioner in Mysore, forwarding the following report received from the Deputy Commissioner, Chitaldrug, on the Cattle Show held at Harihar from the 20th to the 24th March 1911 at the time of the Sangameswaraswami Jatra there :—

Letter No. 609, dated 22nd May 1911, from K. Chandy, Esq., B.A., Deputy Commissioner, Chitaldrug District, to Rajakaryapravina A. Rangaswami Iyengar, Esq., B.A., B.L., Revenue Commissioner in Mysore, Bangalore.

I have the honor to submit the following report on the Cattle Show at Harihar held in March 1911.

2. The inhabitants of Harihar Town, having requested that arrangements may be made for holding a Cattle Show at Harihar on the occasion of the Sangameswaraswami Jatra in March 1911, the Senior Assistant Commissioner, Davangere Sub-Division, recommended their proposal, and the subject was brought forward at the District Board meeting held on the 8th February 1911. As the members of the Board unanimously approved the idea, a recommendation was sent up to Government soliciting sanction to the holding of the Cattle Show and also for a grant of Rs. 150 from District Funds. The Government were, in their Order No. 7146-50—L. B. 241-10-4, dated 25th February 1911, pleased to sanction the above proposals.

3. *Prospectus.*—The prospectus, which was approved by Government and published in the *Mysore Gazette*, was widely distributed in and outside the Province (Appendices I and II).

4. *Committee of Management.*—A local Committee was formed for managing the affairs of the Exhibition with retired Assistant Commissioner Mr. Mahadeva Rao as President, and Mr. R. Balaji Rao as Secretary. A Committee of Judges with the Sub-Division Officer as President, was also formed for judging the prize-winners. The names of the members of the two Committees are given as Appendices III and IV. The Committee members and the Deputy Amildar Mr. Sundararajaiengar worked hard to make the fair and show a success, under the guidance of the Senior Assistant Commissioner.

I also visited Harihar prior to the show and gave the necessary suggestions.

A decent pendal was erected in front of the temple, which as well as buntings and flags kindly lent by the Mysore Municipality, added beauty to the show.

5. *Number of cattle exhibited.*—The Cattle Show was declared open on the 20th March 1911 and continued for four days. Till the evening of the 24th idem, 21,347 cattle from all parts of the Province and also from the neighbouring taluks of Harapanahalli in the Bellary District and Ranebennur in the Dharwar District of the British Territory, had collected. Besides these, about 6,500 cattle had been brought with the carts. The above figures are given from the census taken till the evening of the 24th. It may be mentioned here that, in spite of every precaution taken to keep a correct account of the number of cattle that came to the show, many arrived during nights when no census was taken, and further more than 2,000 cattle arrived on the 25th March. Thus the total number can safely be said to be over 30,000, while the number of cattle that collected last year on the occasion of the Cattle Show was 6,544. It will be seen from the above that the cattle collected this year was nearly five times that of last year.

6. *Number of cattle selected.*—An enclosure was made to admit cattle, and the owners were informed that if they wished to compete for prizes, they may take their cattle to the enclosure on payment of a fee of annas two for each big bullock and one anna for others. A sum of Rs. 21-6-0 was the income realized from this

source, and the number of cattle admitted to the enclosure and selected for prizes, was as follows:—

I.	Draught bullocks	26 pairs.
II.	Plough bullocks	42 „
III.	Single bullocks	6
IV.	Breeding bulls	10
V.	Bull calves under two years	5
VI.	Heifers under two years	2
VII.	Milch cows	7
VIII.	Cow buffaloes	6
IX.	Rams	3
X.	Bucks	2

7. *Classification of cattle according to breeds, size, age, etc.*—The following were the kinds of cattle that collected at the Harihar Show, out of the censused number of 21,347 :—

1.	Hallikar	367
2.	Amrut Mahal	22
3.	Country	4,020
4.	Hattidana	4,679
5.	Bettadadana	5,329
6.	Kantha	1,849
7.	Vaddaradana	1,148
8.	Amaravati breed	3,125
9.	Dupati	285
10.	Calves	346
11.	Cows	45
12.	Cow buffaloes	6
	Total	21,311

Besides the above, there were the following:—

1.	Rams	3
2.	Sheep	24
3.	Goats	8
4.	Deer	1
	Total	36

Only the best cattle entered the enclosure.

In addition to the above, there were 6,500 hatti and country bullocks which had been brought with carts.

The Inspector of Cattle Diseases and many others who had witnessed the Cattle Show at Subramanya Ghati in Dodballapur Taluk, Chunchankatte in Mysore Taluk and Rampur in Honnali Taluk, said that the finest Hallikar bulls were found in this jatra, and that this was one of the biggest shows held in Mysore.

8. *Number of prizes awarded.*—The prizes were distributed by me on the evening of the 24th March in the pendal erected for the purpose. Mr. Jade Subba Rao and Mr. Mahadeva Rao spoke in detail about the show. Before distributing the prizes, I spoke a few words explaining the origin of the show and its importance and usefulness.

The humble and loyal thanks of the meeting were expressed to His Highness the Maharaja who exhibited his practical interest in the fair by deputing his Musaheb Regimentdar Krishna Rao to attend the show and make purchases for the Palace (see para. 12 *infra*).

The names of prize winners are given as Appendix V.

As there were a number of good plough bullocks, it was considered desirable to have a ploughing competition and one was accordingly arranged. There were 12 competitors, and the first three whose names are noted in Appendix V got the prizes for having ploughed well the land set apart for the purpose within the fixed time, with country ploughs.

All the prizes for the cattle were awarded in the shape of gold and silver medals except a few money prizes. The number of medals awarded was 17, 6 of gold and 11 of silver.

It may not be out of place to mention here that the selling price of the bullocks varied from Rs. 200 to Rs. 600 a pair, and the quality and kind of cattle that collected this year was superior to that of last year. It is estimated that the total amount realised by the sale of cattle this year was nearly a lakh and a half.

9. *Place of Cattle Show and its suitability as regards water-supply and sanitary requirements.*—The place selected for holding the Cattle Show was the maidan

in front of the Sangameswaraswami temple on the bank of the Tungabhadra River. This site was very convenient in every respect, as there was ample accommodation for tethering the cattle in addition to water convenience close by. Harihar is very suitable and convenient to the traders in, and purchasers of, cattle on account of Railway communication.

10. *Pony Show.*—It was considered desirable to have a Pony Show also in this connection. Accordingly, a supplementary prospectus was issued, which was also published in the *Mysore Gazette* and circulated as far as possible. As there was not enough of time for giving wide publicity and as the ponies that collected at the show were not many, it was decided that out of the five medals of the total value of Rs. 45 set apart for awarding prizes, only two silver medals should be given, reserving the remaining three gold medals for next year.

Judging from the situation of Harihar as a convenient centre for the sale of cattle and Dharwar tattus, it is desirable to make the Cattle Fair and Show an annual function. Fees for cattle may be levied after a few years and not at once.

11. *Demonstrations.*—Dr. Coleman, Agricultural Chemist and Entomologist to the Government of Mysore, was pleased to send ploughs, chaff-cutter and winnower in charge of Messrs. H. Ramaiya and Santappa, Agricultural Inspectors. These were demonstrated during the days of the show, and the large number of raiyats who witnessed them appreciated the advantages of these improved machines. The winnower was purchased by a merchant of Davangere. I take this opportunity to thank Dr. Coleman on behalf of the Committee.

12. *Lectures.*—Arrangements had been made to deliver lectures in the pendal during the days of the Exhibition. Mr. H. Ramaiya, Agricultural Inspector, delivered lectures on "Preservation of manure," "Green manure" and "Sugar cane cultivation." Messrs. Santappa, Agricultural Inspector, and Narasimhaiengar, Inspector of Cattle Diseases in Mysore, delivered lectures on "Grasshopper pest and how to prevent its spread" and "Breeding of cattle" respectively. The lectures were largely attended by the raiyats who had assembled for the show.

Seeing that there was to be a Pony Show at Harihar, His Highness the Maharaja was graciously pleased to depute Mr. Regimentdar Krishna Rao to witness the show and make purchases of a few ponies, if available, but on account of late advertisement, there was not a sufficient collection of ponies. The people were, however, very greateful to His Highness for this act of kindness, and I hope that it will prove an incentive for a larger number of ponies being brought for sale next year.

Mr. Regimentdar Krishna Rao delivered an interesting lecture on "Breed of horses and their uses in agricultural operations."

13. *Visitors.*—It is not possible to estimate correctly the number of people that assembled but as there were over 30,000 cattle, it is safe to estimate the number of persons at between 60,000 and 80,000. The sight from the steps of Harihareswaraswami temple and from the Government bridge was a very imposing one.

14. *Shops, amusements, etc.*—There were 124 stalls selling various things. Besides these, there were dramas, merry-go-rounds and other amusements. It was decided to levy a small fee on these and the income realized was Rs. 58-11-0. During the days of the show, trade was very brisk.

15. *Total receipts, viz., from fees, private subscriptions, contributions.*—The details of receipts and expenditure are given below:—

RECEIPTS.

Item.	Amount. Rs.	a.	p.
1. Government Grant	150	0	0
2. Contribution	100	0	0
3. Realization from shops, dramas, etc.	58	11	0
4. Realization from fees for selected cattle admitted to the enclosure	21	6	0
5. By sale of manure	250	0	0
Total ...	580	1	0

EXPENDITURE.

Item.	Amount. Rs.	a.	p.
1. Cost incurred for constructing a pendal	19	10	6
2. Contingencies and miscellaneous	12	8	6
3. Medals and money prizes	198	12	0
Total ...	230	15	0
1. Deduct cost of three gold medals reserved for next year ...	35	0	0
Total Expenditure ...	195	15	0

It will be seen from the above that the expenditure was only a third of the income and there has been a net savings of Rs. 384-2-0, including the value of three Pony Show medals.

16. *Photo.*—I herewith send three photos taken on the occasion of the Cattle Show, two of which relate to the views of the Cattle Show and the third is a group photo, the cost of which has been paid for locally. The photographer being an amateur, the views are not as good as they might have been. The photo of the prize cattle was spoiled by overexposure.

17. *Police and sanitary arrangements.*—The police arrangements made by the Superintendent of Police, and the sanitary arrangements made by the Deputy Amildar, were satisfactory.

18. *Concluding remarks.*—In conclusion, I beg to state that the Cattle Fair and Show was a great success for which Deputy Amildar Mr. Sundararajaiengar and the local non-official Committee with its President Mr. Mahadeva Rao, deserve to be congratulated. I hope that similar success will attend the future fairs and that the Harihar Cattle Fair will establish itself as a leading one in the State.

No. 288-91—L. B. 241-10-8, DATED BANGALORE, 13TH JULY 1911.

1. ORDER THEREON.—Recorded with the observation that the approval of Government should have been obtained to levy fees on stalls and sites used for dramas, merry-go-rounds and other amusements. Government note with pleasure that the Cattle Show at Harihar was a success and that the good work done by the non-official gentlemen who managed the show largely contributed to the success.

2. It is reported that the receipts and the expenditure in connection with the show amounted to Rs. 580-1-0 and Rs. 230-15-0 respectively, but what is shown as a Government grant of Rs. 150 and included on the side of receipts cannot be reckoned as a contribution to the show, since, under Government Proceedings No. 7007-24—L. B. 189-09, dated 22nd February 1911, the entire cost of the show should be met from the District Funds and all contributions and realizations from fees, etc., should be credited to such funds on the side of receipts. Accordingly, the income of Rs. 430-1-0 shall be credited and the expenditure of Rs. 230-15-0 debited to the District Funds in the accounts for 1910-11.

3. The provision made in the District Fund budget for 1910-11, on account of cattle shows, being only Rs. 200, a re-appropriation of sanctioned grants should have been proposed, as directed in Government Order No. 7146-50—L. B. 241-10, dated 25th February 1911, for meeting the excess over the budget provision. As it is now too late to call for any such re-appropriation, the Comptroller is authorized to admit the excess expenditure.

4. The suggestion made in para 10 of the Deputy Commissioner's report, to make the show an annual event, should form the subject of a separate communication.

READ—

Letter No. 12518, dated 12th June 1911, from the Revenue Commissioner in Mysore, forwarding the following report submitted by the Deputy Commissioner of Tumkur on the Cattle Show held at Kyamenahalli, Koratagere Sub-Taluk, in February 1911 on the occasion of the car festival of Sri Anjaneyaswami.

Docket No 655, dated 1st—3rd May 1911, from the Deputy Commissioner, Tumkur District, to the Revenue Commissioner in Mysore.

With reference to Government Order No. 6776-8—L. B. 170-09, dated 4th February 1910, sanctioning the proposal to organize a Cattle Show at Kyamenahalli, Koratagere Sub-Taluk, on the occasion of the car festival of Sri Anjaneyaswami, has the honor to state that the proposed show was organized this year, for want of time to make preliminary arrangements last year, as already reported in this office letter No. 473, dated 8th February 1910.

2. The show was held in a roped enclosure on the 11th February last on the vacant sites near the temple building. The Jayamangli stream close by and other wells afforded good water convenience. The total number of cattle collected was about 22,000, out of which 173 competed for prizes. Ninety-nine money prizes together with certificates awarded among the marginally noted kinds of cattle amounted to Rs. 266.

1. Hallikar bulls.
2. Bettadadana.
3. Nadu or country cattle.
4. Breeding bulls.
5. Agricultural and other bullocks.

3. The Managing Committee consisted of the following members:—

Official.

1. Mr. C. Machiah (Chairman), Sub-Division Officer.
2. Mr. T. T. Ramachandra Rao, Deputy Amildar.
3. The Inspector of Cattle Diseases (absent).

Non-official.

1. Mr. V. Krishna Rao, retired Amildar.
2. ,, Sanjeevappa of Sompur.
3. ,, Javaraya Gowda of Towinkere.
4. ,, Matada Virappa.
5. ,, Abidalli Saheb.
6. ,, Yajaman Siddappa.
7. ,, Virannadevaru.
8. ,, Mallaiya of Hulikunte.

4. This Committee selected the following persons as Judges:—

1. Mr. Mahadi Hussain Saib.
2. ,, Chik Subbe Gowda.
3. ,, Bada Hussain Saib.
4. ,, Gurusiddaradhya.

5. The Assistant Veterinary Inspector attached to this district attended the show.

6. The Inspector-General of Police, who was requested to kindly make arrangements for photographing prize-winning cattle, replied that the photographer of the Police Training School was deputed to Mysore for a similar work and requested to make other arrangements. As the town of Tumkur had at that time been evacuated owing to plague, no local photographer was available. The matter had therefore to be dropped.

7. Special fee per head of cattle seeking admission into the enclosure was not levied with a view to popularize the show which was held for the first time in the sub-taluk.

8. Out of Rs. 300 sanctioned for expenses of the show and Re. 0-12-0 (sale proceeds of the rope) a sum of Rs. 285-9-0 was spent on account of the marginally noted items and the balance credited to Muzrai and District Funds in proportion to their contributions.

8. Market well supplied.

9. *Standing crops*, such as ragi, cholum, castor, sugar cane, paddy, cotton, sesamum, togari, haraka, sejje, avare tadagani, green gram, black gram and chillies are reported to be in good condition.

Crops sown.—Ragi, cholum and castor in the Chitaldrug and Hosdurga Taluks; ragi in the Challakere and Holalkere Taluks; haraka, sejje, samé and navane in the Challakere Taluk; togari and cholum in the Davangere Taluk and the Harihar Sub-Taluk; avare, cotton and chillies in the Davangere Taluk; black gram and green gram in the Hosdurga Taluk and castor in the Harihar Sub-Taluk.

Crops harvested.—Nil.

10. Prospects of the season are good; but rain is urgently needed for sowing operations. Food stuffs are available.

11. Public health is generally good.

12. Cattle are healthy, except in parts of the Challakere Taluk, where "Chappe roga" is prevailing among them. Water and fodder are available.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE,
Dated Bangalore, the 21st July 1911.

K. P. PUTTANNA CHETTY,
Revenue Commissioner.

Proceedings of the Government of His Highness the Maharaja of Mysore.

No. G. 488-535—G. M. 36-11-7, DATED BANGALORE, 21ST JULY 1911.

ORDER.—The Government of His Highness the Maharaja of Mysore resolve to amend the rules contained in Government Order No. G. 6729-76—G. M. 278-10-1, dated 19th May 1911, in the manner explained below:—

(*a*) Under head (5) in para 4, for the word "eight" read the word "nine."

(*b*) Para 9 will be modified so as to read as follows:—

"From the list of subjects the Conference will select questions which may be usefully taken up for study and discussion and appoint Committees to carry on its work during the following year. Such Committees may be composed of five official and non-official members of the Conference and such other gentlemen as may be selected by the President of the Conference, not exceeding four for each Committee, whether officials or non-officials, whether members of the Conference or not. District Committees composed of officials, members of the Representative Assembly and non-officials may also be appointed by the Conference, one in each district, under the supervision of Deputy Commissioners, who shall be their respective Presidents. These District Committees will develop work in the districts under the guidance of the Central Committees. Subject to confirmation by the President and the Chairman of the Committee concerned, each Central Committee and District Committee is authorized to appoint "Associates" up to the number of 50 for each, for one year at a time, to form a connecting link between the Committee and the individuals or agencies engaged in similar work."

(*c*) Para 10 will be modified so as to read as follows:—

"The appointments of Secretary to the Conference and Secretaries to the Committees appointed by the Conference will be filled by officers of Government. With them may be associated Honorary Secretaries to be selected from the non-official members."

2. In the list of subjects appended to the Government Order cited above, the following additions and alterations are made:—

Head (3) under "Agriculture" to be modified so as to read—

"(3) The encouragement of cotton, mulberry and other industrial crops."

(*d*) Under "Industries" add as head (7) "Trade and Commerce" and as head (8) "Feeder lines for railways," and omit the word "credit" in head (3). The major head "Industries" to be altered into "Industries and Commerce."

(*e*) Under head "General" add as head (7) "Extension of State Life Insurance to the general public."

C. S. BALASUNDARAM IYER,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—All Heads of Departments.
Deputy Commissioners of Districts.
The Comptroller to Government.

Subjoined is a reprint of the Government Order of 19th May modified as above and also a list, revised and brought up to date, of the official and non-official gentlemen appointed under para 4 of the said order as members of the Conference:—

ORDER.—HIS HIGHNESS THE MAHARAJA has had under his consideration for some time the desirability of associating men of enlightenment within the State, public-spirited citizens, prominent agriculturists, merchants, etc., with the officers of Government in deliberations connected with economic progress in Mysore.

2. The Representative Assembly goes a certain way in this direction, but it is obvious that a large body meeting and deliberating only once a year can do but little. Public interest in the numerous questions of the kind under consideration which claim attention, can only be kept alive by a constant interchange of views and discussions among those competent to deal with them. In His Highness' opinion, what is needed is a series of Conferences to stimulate the capacity for effort among the people and to suggest the adoption of practical measures by Government, where Government can render assistance.

3. It is therefore proposed that advantage should be taken of the occasion of the festivities connected with the Birthday of His Highness the Maharaja in June every year, when the Heads of Departments and Deputy Commissioners of Districts assemble in Mysore, for holding an annual Conference to discuss the more important questions that affect the material prosperity of the State. It will be the

duty of the Conference to work up, progressively, the various questions which they deal with, till they are ripe for practical action. There are many questions on which the public themselves have to take action or in which their co-operation is needed. The functions of the Conference will not overlap those of the Representative Assembly. The members of the Legislative Council, two of whom are nominated on the recommendation of the Assembly, will be members of the Conference.

4. The following officers and gentlemen will constitute the Conference :—

President—The Dewan of Mysore.
Vice-Presidents—The Members of Council.
Members—
(1) Selected Heads of Departments.
(2) Members of the Legislative Council.
(3) Selected retired officers of Government.
(4) Deputy Commissioners.
(5) Leading private gentlemen selected from the classes named in para 1 *supra*, not less than six nor more than nine in number.

The selection of members under (1), (3) and (5) will be by the Government and the names of the members selected will be published in the official Gazette. Persons thus nominated will be members of the Conference for a period of three years from the date of nomination, and at the expiry of such period will be eligible to be again nominated. Members of the Legislative Council will be members of the Conference as long as they continue to be on the Legislative Council.

5. The Conference will meet ordinarily in June every year, but for the consideration of any important questions, meetings may be convened at other times of the year by a special order of His Highness the Maharaja. The time and place of the meetings of the Conference will be notified to the members beforehand.

6. A list of subjects which may be dealt with by the Conference is appended to this Order. Any additions which may suggest themselves may also be made to this list from time to time by the Conference. It should be clearly understood that the Conference shall not discuss any questions which concern the prerogative of His Highness the Maharaja, the constitution of the State, its relations with the Government of India or the policy of the Supreme Government.

7. The Deputy Commissioners of Districts, who are members of the Conference, should consult the leading men of their districts in regard to the subjects suggested for discussion and come to the Conference posted with the views of such men, so that they may be able to represent public opinion as well as their own.

8. For the present the proceedings of the Conference will not be open to the public and the discussions should be treated as confidential. Such recommendations as have the support of two-thirds of the Conference may be submitted in the form of resolutions for the consideration of Government. Government may take such action as it deems fit on these resolutions.

9. From the list of subjects, the Conference will select questions which may be usefully taken up for study and discussion, and appoint Committees to carry on its work during the following year. Such Committees may be composed of five official and non-official members of the Conference and such other gentlemen as may be selected by the President of the Conference not exceeding four for each Committee, whether officials or non-officials, whether members of the Conference or not. District Committees composed of officials, members of the Representative Assembly and non-officials may also be appointed by the Conference one in each district under the supervision of Deputy Commissioners who shall be their respective Presidents. These District Committees will develop work in the districts under the guidance of the Central Committees. Subject to confirmation by the President and Chairman of the Committee concerned, each Central Committee and District Committee is authorized to appoint "Associates" up to the number of 50 for each for one year at a time to form a connecting link between the Committee and the individuals or agencies engaged in similar work.

10. The appointments of Secretary to the Conference and Secretaries to the Committees appointed by the Conference will be filled by officers of Government. With them may be associated Honorary Secretaries to be selected from the non-official members.

11. The Committees and Sub-Committees should meet once a month and oftener, if necessary. On every question considered by the Committees, correct information should first be collected in regard to its importance to the Province

and a note or monograph prepared embodying the same. The next step will be to compare conditions in Mysore with those in other countries or localities. The Committees may issue their monographs to the public and the press in order to stimulate public discussion. The cost of printing the monographs will be borne by Government. The Committees may consult any expert opinion both within and outside the State. It will be their duty to collect information of value from every quarter and make it available both to the Government and the public in an easily assimilable form. Ordinarily the Committees will report their opinions and recommendations to the Conference once a year, before the end of March, so as to be available to the Conference during the next Session.

12. The first Session of the Conference will commence on Thursday the 8th June 1911 and may be continued on two succeeding days. It is suggested that, in the first year, three Committees may be appointed by the Conference, and the subjects selected distributed among them. The Conference may also suggest any modifications that may be considered necessary in the rules above laid down, to ensure the smooth working of the scheme and to increase its usefulness, and also adopt such subsidiary rules as may be required.

Letter No. 9231, dated the 6th April 1911, from the Conservator of Forests in Mysore enquiring whether the rules issued under Notification No. 7709—Ft. 13-05-18, dated the 25th March 1909, are applicable to sandal trees growing on lands in Inam, Jodi and Kayamgutta villages and whether the bonus to be paid under these rules is to be given to the Inamdar, Jodidar and Kayamguttadar or to the actual holder of the land concerned.

No. R. 974-83—Ft. 139-10-2, DATED 4TH AUGUST 1911.

ORDER THEREON.—In Inam villages the Inamdar's right over lands held by kadim tenants is confined to receiving the rent due thereon as a superior holder, and in such cases he can have no claim to the bonus, which should be paid to the kadim tenant. In the case of other lands in the Inam village, the Inamdar will be entitled to receive the bonus.

10. Though prospects of the season are good, yet, it is reported, that rain is required in the Hassan, Channarayapatna, Arsikere and Hole-Narsipur Taluks.

11. Except for plague in parts of the Arsikere, Hassan, Belur and Channarayapatna Taluks and the Alur Sub-Taluk and small-pox in parts of the Arsikere Taluk, public health is generally good.

12. Cattle are generally healthy. Water and fodder are available.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed and harrowed for growing horse gram in parts of the Shimoga, Shikarpur and Sorab Taluks and transplanting of paddy is being carried on in parts of the Sagar, Nagar and Tirthahalli Taluks.

Standing crops.—Paddy and sugar cane throughout the district and green gram and sesamum in parts of the Honnali Taluk are reported to be in good condition. It is reported as in the last week, that the Agricultural Chemist's Assistant is working to get rid of the grasshopper pest in parts of the Channagiri and Honnali Taluks, that "Koleroga" has appeared in parts of the Sagar, Nagar and Tirthahalli Taluks and that wet crops in the Tirthahalli Taluk have been damaged a little by excessive rain.

Crops sown.—Cotton in parts of the Channagiri and Honnali Taluks, castor in parts of the Sorab Taluk and samè and navane in parts of the Shimoga Taluk.

10. Prospects of the season are generally good.

11. Except for plague in parts of the Shimoga, Channagiri, Honnali and Shikarpur Taluks, public health is generally good.

12. Cattle are healthy. Water and fodder are available.

KADUR.

8. Market well supplied.

9. *Agricultural operations.*—Transplanting of paddy is still being carried on in Chikmagalur, Koppa, Mudgere and Yedahalli.

Standing crops.—The following are reported to be in good condition :—

In Chikmagalur—Paddy, ragi, avare, togari, gingelly; black gram, green gram, cholum, castor, sugar cane, coriander, garlic, onions, potato and coffee.
In Kadur—Paddy, ragi, avare, black gram, green gram, coriander, baragu, tadagani, gingelly, cholum and castor.
In Tarikere—Paddy, ragi, cholum, avare, togari, gingelly, coriander, baragu, sugar cane, black gram, green gram and navane.
In Koppa—Paddy, sugar cane and areca.
In Mudgere—Paddy, ragi, cardamom, coffee and areca.
In Yedahalli—Paddy and sugar cane.
In Sringeri—Paddy, areca and sugar cane.
It is reported that more rain is required for the standing crops in the Kadur Taluk.

Crops sown.—Nil.

Crops harvested.—In Chikmagalur—Gid ragi, coriander, potato, garlic and onions.
In Kadur—Baragu and coriander.

10. Prospects of the season are good. Supply of food stuffs is insufficient.

11. Except for plague in certain villages in the Chikmagalur, Kadur and Tarikere Taluks and in Yedahalli town, public health is generally good.

12. Except for "Chappe Roga" still prevailing in a few villages of the Chikmagalur Taluk, cattle are generally healthy. Water and fodder are available.

CHITALDRUG.

8. Market well supplied.

9. *Standing crops,* such as jola, cotton, ragi, paddy, sesamum, togari, castor, haraka, sajje, green gram and black gram, are reported to be in good condition.

Crops sown.—Ragi in the Chitaldrug, Challakere and Davangere Taluks; navane in the Chitaldrug and Davangere Taluks and the Harihar Sub-Taluk; cotton in the Chitaldrug Taluk and the Harihar Sub-Taluk; paddy, chillies and horse gram in the Chitaldrug Taluk; and jola, castor and samé in the Davangere Taluk.

Crops harvested.—Nil.

10. Prospects of the season are good, but rain is urgently required for the growth of young plants and for sowing operations. Food stuffs are available.

11. Public health is generally good.

12. Cattle are healthy. Water and fodder are available.

Agricultural operations.—Weeding in ragi fields.

State of standing crops.—Generally fair, but rain is urgently wanted.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.

9. *Agricultural operations.*—Weeding in wet lands in parts of the Anekal, Devanhalli, Kankanhalli and Nelamangala Taluks and transplanting in parts of the Kankanhalli Taluk are being carried on.

Standing crops.—Sugar cane, paddy and potatoes are said to be in fair condition, but ragi, avare and other dry minor crops are withering for want of rain except in parts of the Channapatna, Kankanhalli and Magadi Taluks.

Damage to crops by insects.—Ears of ragi are said to be affected with "Bachay" pest in the Bannerghatta hobli, Anekal Taluk.

Crops sown.—Horse gram in parts of the Anekal and Kankanhalli Taluks.

Estimated outturn of harvests.—Same in parts of the Anekal Taluk, potatoes and til in parts of Devanhalli Taluk, yield from 8 to 12 annas and from 4 to 12 annas, respectively.

10. *Prospects of the season.*—Dry crops are said to be withering for want of rain, which is very badly wanted in almost all the taluks. Food stuffs are sufficiently available. Labour is available to the cooly classes.

11. Plague is prevalent in parts of all the taluks, except the Closepet Sub-Taluk.

12. Cattle are reported to be healthy in all the taluks, except Magadi, in parts of which "Chappe roga" is said to be prevailing. Water and fodder are available.

KOLAR.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being prepared for paddy cultivation under *kapile* wells in the Goribidnur Taluk.

Standing crops.—All the standing crops, except ragi, which is withering for want of rain, are reported to be in good condition.

Crops sown.—Nil.

Crops harvested and their yield.—Til in the Kolar Taluk, yield 8 annas.

10. Prospects of the season are good, but want of rain is being keenly felt. Food stuffs are available. Labour is available to the cooly classes.

11. Except for plague in Duggasandra hobli, Mulbagal Taluk, and parts of Sidlaghatta and Kolar Taluks, public health is generally good.

12. Except for "Chappe Roga" in parts of the Mulbagal Taluk, the condition of agricultural stock is good.

TUMKUR.

8. Market well supplied.

9. *Standing crops.*—It is reported that crops are withering in the Tumkur, Maddagiri, Chiknayakanhalli, Sira and Gubbi Taluks and the Koratagere Sub-Taluk and also in parts of the Pavagada and Kunigal Taluks. And their condition is fair in the Tiptur Taluk and the Turuvekere Sub-Taluk.

Crops sown.—Horse gram in the Tumkur, Chiknayakanhalli, Sira, Gubbi, Tiptur and Kunigal Taluk; same in the Chiknayakanhalli and Sira Taluks; paddy in the Pavagada Taluk and ragi and avare in the Turuvekere Sub-Taluk.

Crops harvested.—Black gram, green gram and til in the Chiknayakanhalli and Tiptur Taluks; sugar cane and paddy in the Gubbi and Kunigal Taluks and the Turuvekere Sub-Taluk; baragu in the Chiknayakanhalli Taluk; nat ragi in the Pavagada Taluk; and til in the Turuvekere Sub-Taluk.

10. Prospects of the season are fair. Rain is badly wanted in all the Taluks and Sub-Taluks. Food stuffs are available.

11. Except for plague prevailing in parts of the Tumkur, Chiknayakanhalli, Gubbi, and Kunigal Taluks and parts of the Turuvekere Sub-Taluk, public health is good.

12. Cattle are suffering from "Chappe roga" in parts of the Tumkur, Sira and Kunigal Taluks and parts of the Turuvekere Sub-Taluk. Water and fodder are available throughout the district. But scarcity of water is felt in Itakadibbanahalli, Maddagiri Taluk.

MYSORE.

8. Market fairly well supplied.

9. *Agricultural operations.*—Lands are being manured in parts of the Nagamangala Taluk.

Standing crops are reported to be in good condition. But it is stated that the Amildars of the Mysore, Seringapatam, Hunsur, Heggaddevankote, Nanjangud and Nagamangala Taluks report that want of rain is felt for the standing crops and that the Amildars of the Chamrajnagar, Gundlupet, T.-Narsipur and Krishnarajpete Taluks report that the standing crops are withering for want of rain.

Crops sown.—Horse gram in parts of the Yedatore and Malvalli Taluks; paddy in parts of the Malvalli, Mandya and Nagamanga Taluks; and ragi in parts of the Nagamangala Taluk.

Crops harvested.—Cholum in parts of the Mysore, Seringapatam, Hunsur, Gundlupet, Nanjangud, T.-Narsipur and Nagamangala Taluks; til in parts of the Mysore, Hunsur and Heggaddevankote Taluks; and ragi in parts of the Hunsur and Heggaddevankote Taluks.

Outturn of crops.—Cholum in parts of the Nagamangala Taluk, yield 8 annas.

10. Prospects of the season are good. Food stuffs are available.

11. Except for plague in parts of the Mysore, Chamrajnagar, Seringapatam, Yedatore, Gundlupet, Nanjangud, T.-Narsipur, Malvalli and Nagamangala Taluks and the French Rocks Sub-Taluk, public health is generally good.

12. Cattle are reported to be healthy. Water and fodder are available.

HASSAN.

8. Market well supplied.

9. *Agricultural operations.*—Raiyats are engaged in agricultural operations.

Standing crops are reported to be in good condition:—

Crops harvested.—Gid ragi in the Hassan and Hole-Narsipur Taluks; kar paddy in parts of the Belur Taluk; kar paddy and sugar cane in the Channarayapatna Taluk; til, black gram and green gram and coriander in the Arsikere Taluk; and gid ragi in the Alur Sub-Taluk are being harvested.

10. Prospects of the season are good. But more rain is reported to be required in parts of the Hassan, Channarayapatna, Arsikere and Hole-Narsipur Taluks. It is stated that the Amildar of the Arsikere Taluk has reported that for want of rain, crops are fading in parts of the Arsikere Taluk.

11. Except for plague in parts of the Hassan, Arsikere and Channarayapatna Taluks and the Alur Sub-Taluk, public health is generally good.

12. Cattle are generally healthy. Water and fodder are available.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Lands are being ploughed and harrowed. Sowing of horse gram is going on in parts of the Shimoga, Sagar and Sorab Taluks and transplanting of paddy is nearing completion in parts of the Sagar and Nagar Taluks.

Standing crops.—Sugar cane and paddy throughout the district; ragi, jola, green gram and sesamum in parts of the Honnali Taluk and chillies in parts of the Honnali and Sorab Taluks are reported to be in good condition. It is reported that "Koleroga" is subsiding a little in parts of the Nagar Taluk.

10. Prospects of the season are good, but rain is wanted in the Channagiri, Honnali and Sagar Taluks and the Kumsi Sub-Taluk. Food stuffs are available.

11. Except for plague in parts of the Shimoga, Channagiri and Honnali Taluks and the Kumsi Sub-Taluk, public health is generally good.

12. Cattle are healthy. Water and fodder are available.

KADUR.

8. Market well supplied.

9. *Agricultural operations.*—Transplanting of paddy is still being carried on in parts of Koppa and Yedahalli.

Standing crops.—It is stated that the crops in Kadur and Tarikere and also in the maidan parts of the Chikmagalur Taluk are reported to be withering for want of rain.

Crops sown.—Sugar cane is being planted in parts of Chikmagalur and horse gram and hingar coriander are being sown in parts of Kadur and Tarikere.

Crops harvested and their yield:—

In Chikmagalur—Gid ragi, onions, garlic, potato, coriander and black gram, yield 10 annas each; and in Kadur coriander and gingelly.

10. Prospects of the season are fair. And want of rain is badly felt in the Kadur, Tarikere and Chikmagalur Taluks. Supply of food stuffs is sufficient.

11. Except for plague in certain villages of Chikmagalur, Kadur and Tarikere and also in the town of Yedahalli, public health is generally good.

12. Cattle are generally healthy. Water and fodder are available.

CHITALDRUG.

8. Market well supplied.

9. *Standing crops,* such as paddy, ragi, jola, chillies, cotton, sesamum, castor, togari, green gram, black gram, haraka, sajje, navane, avare, horse gram and samé are reported to be withering for want of rain.

Crops sown.—Horse gram and avare in the Chitaldrug Taluk.

Crops harvested and their yield.—Gid ragi in the Challakere Taluk, yield 8 annas; and sesamum in the Hosdurga Taluk, yield 4 annas.

10. Prospects of the season are good, but rain is urgently required for the growth of young plants and for sowing operations. Food stuffs are available.

11. Public health is generally good.

12. Cattle are healthy. Water and fodder are available.

Ragi ...	12·93	15·47	
Rangoon rice, 2nd sort ...		9·20	

Agricultural operations.—Weeding in ragi fields.

State of standing crops.—Withering for want of rain. Rain urgently wanted.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.

9. *Agricultural operations.*—Weeding in parts of the Nelamangala, Kankanhalli and Devanhalli Taluks and transplanting in parts of the Kankanhalli Taluk are going on. Lands in parts of the Anekal Taluk are being prepared for the cultivation of horse gram.

Standing crops.—Both dry and wet crops in parts of the Kankanhalli, Channapatna and Anekal Taluks are generally in good condition. Dry crops in other taluks are reported to be withering for want of rain.

Crops sown.—Horse gram in parts of the Kankanhalli and Anekal Taluks; and black gram and green gram in parts of the Kankanhalli Taluk.

Estimated outturn of harvests.—Vaisakhi paddy in parts of the Hoskote Taluk, yield 8 annas; and potatoes in parts of the Devanhalli Taluk, yield from 8 to 12 annas.

10. *Prospects of the season.*—Rain is badly wanted in parts of all the taluks, except Kankanhalli and Anekal. Food stuffs are sufficiently available. Labour is available to the cooly classes.

11. Plague is prevalent in parts of all the taluks, except the Closepet Sub-Taluk.

12. Cattle are reported to be healthy, except in the village of Peenya, Bangalore Taluk, where "Chappe roga" is said to have broken out. Water and fodder are available.

KOLAR.

8. Market well supplied.

9. *Agricultural operations.*—Nil.

State of standing crops.—Paddy and sugar cane under large tanks are in good condition, but in other parts, they are withering for want of water in the tanks. Ragi is also reported to be withering for want of rain.

Crops sown.—Horse gram was sown in parts of the Kolar, Mulbagal, Bagepalli, Goribidnur and Srinivaspur Taluks.

Crops harvested and their yield.—Gidda ragi in parts of the Mulbagal Taluk, yield 4 annas; and same in the Gudibanda Sub-Taluk, yield 8 annas.

10. Prospects of the season are good. Rainfall has been reported to be insufficient all over the district. Labour is available to the cooly classes.

11. Except for plague in Vemgal, Kolar Taluk, and in some villages of the Sidlaghatta Taluk, public health is generally good.

12. Except for "Chappe roga" still prevailing in the Vakkaleri and Vemgal Hoblis of the Kolar Taluk, Duggasandra Hobli of the Mulbagal Taluk and Thondebhavi and Manchanaghatta Hoblis of the Goribidnur Taluk, cattle are generally healthy.

TUMKUR.

8. Market well supplied.

9. *State of standing crops.*—It is reported that standing crops are withering for want of rain, except in the Gubbi, Tiptur and Pavagada Taluks, and parts of the Chiknayakanhalli and Sira Taluks, where they are "holding on" on account of the recent showers.

Crops sown.—Horse gram in parts of the Chiknayakanhalli, Sira and Tiptur Taluks and the Turuvekere Sub-Taluk, and nat ragi and nat paddy in parts of Sira.

Crops harvested.—Paddy in the Gubbi Taluk and Turuvekere Sub-Taluk and sugar cane in the Kunigal Taluk and the Turuvekere Sub-Taluk.

10. Prospects of the season are not quite encouraging. Want of rain is keenly felt all over the district. Food stuffs are available, but prices are rising.

11. Except for plague in parts of the Tumkur, Chiknayakanhalli, Gubbi, and Tiptur Taluks and the Koratagere and Turuvekere Sub-Taluks, and fever in parts of the Kunigal Taluk, public health generally good.

12. It is reported that cattle are suffering from "Chappe roga" in parts of the Tumkur, Sira, Pavagada and Kunigal Taluks. Water and fodder are available for the present. But in Itikadibbanahalli hobli, Maddagiri Taluk, water scarcity is somewhat felt; and in parts of the Sira Taluk, fodder is scarce, as also water for cattle grazing in the jungles.

MYSORE.

8. Market fairly well supplied.

9. *Agricultural operations.*—Lands are being ploughed in parts of the Nagamangala Taluk.

State of standing crops is reported to be good in parts of the Chamrajnagar, Gundlupet, Nanjangud, T.-Narsipur and Malvalli Taluks; fair in parts of the Mysore, Heggaddevankote and Nagamangala Taluks; and withering in parts of the Krishnarajpete Taluk. The Amildars of all the taluks report that want of rain is felt for the standing crops.

Crops sown.—Horse gram and black gram in parts of the Chamrajnagar and Gundlupet Taluks; horse gram and green gram in parts of the Mysore Taluk; horse gram in parts of the Seringapatam, Hunsur, Malvalli and Krishnarajpete Taluks; halasandi in parts of the Chamrajnagar Taluk; and paddy in parts of the Mandya Taluk.

Crops harvested.—Cholam in parts of the Mysore, Hunsur, Gundlupet and Nanjangud Taluks; and ragi and til in parts of the Hunsur and Heggaddevankote Taluks.

10. Prospects of the season are good. Food stuffs are available.

11. Except for plague in parts of the Mysore, Chamrajnagar, Seringapatam, Yedatore, Gundlupet, Nanjangud, T.-Narsipur and Malvalli Taluks, public health is generally good.

12. Cattle are reported to be healthy. Water and fodder are available.

HASSAN.

8. Market well supplied.

9. *Agricultural operations.*—Raiyats are engaged in agricultural operations.

State of standing crops.—The following are reported to be in good condition:—

In the Hassan Taluk—Ragi, paddy, sugar cane, horse gram, avare and togari.
In the Manjarabad Taluk—Barawadi paddy and ragi.
In the Arkalgud Taluk—Ragi and paddy.
In the Belur Taluk—Sugar cane, paddy and ragi.
In the Channarayapatna Taluk—Ragi, paddy, sugar cane, avare, togari, chillies, haraka and samé.
In the Arsikere Taluk—Ragi, avare, castor, togari and sugar cane.
In the Hole-Narsipur Taluk—Togari, avare, tobacco, chillies, castor, paddy, sugar cane and hutchellu.
In the Alur Sub-Taluk—Paddy, ragi and sugar cane.

Crops sown.—Dod-ragi and horse gram in the Hole-Narsipur Taluk are being sown.

Crops harvested.—Gid ragi in the Hassan, Arkalgud, Belur and Hole-Narsipur Taluks and the Alur Sub-Taluk, and sugar cane in the Channarayapatna Taluk are being harvested.

10. Prospects of the season are generally good. But it is reported that more rain is required for the standing crops in parts of the Hassan, Manjarabad, Arkalgud, Belur and Arsikere Taluks and the Alur Sub-Taluk.

11. Except for plague in parts of the Hassan, Arsikere and Channarayapatna Taluks, and the Alur Sub-Taluk, public health is generally good.

12. Cattle are generally healthy. Water and fodder are available.

SHIMOGA.

8. Market well supplied.

9. *Agricultural operations.*—Weeding operations are going on in the Sagar Taluk and transplanting of paddy has been completed in the Tirthahalli Taluk and is nearing completion in the Sagar and Nagar Taluks.

Standing crops.—The following are reported to be in good condition :—
Ragi, jola, horse gram, green gram, black gram and chillies in the Shimoga Taluk; ragi and jola in Channagiri; ragi in Shikarpur; ragi, castor, chillies and horse gram in Sorab; and paddy and sugar cane in all parts of the district; arecanut is also reported to be in good condition in the malnad parts of the district. But the crops in parts of the Honnali and Channagiri Taluks need rain and "Kole roga" is reported to be prevailing to some extent in portions of the Sorab, Sagar and Tirthahalli Taluks.

Crops sown.—Horse gram and cotton are being sown in parts of the Honnali Taluk and horse gram has been sown in the Shikarpur Taluk.

Crops harvested.—Green gram and sesamum are being harvested in parts of the Honnali Taluk.

10. Prospects of the season are good. But want of rain is felt in the maidan taluks of the district. Crops are reported to have been damaged to some extent by grasshoppers in parts of the Channagiri, Honnali and Shikarpur Taluks. It is also reported that paddy and sugar cane crops at Marur in the Sagar Taluk are being damaged by wild elephants. Food stuffs are available.

11. Except for plague reported to be prevailing in parts of the Shimoga, Channagiri, Honnali and Shikarpur Taluks, public health is generally good.

12. Cattle are healthy. Water and fodder are available.

KADUR.

8. Market well supplied.

9. *Agricultural operations.*—Transplanting of paddy is nearing completion in the Koppa Taluk.

State of standing crops.—
In Chikmagalur—Paddy, ragi, coffee, avare, sugar cane, togari, gingelly, castor, jola and chillies.
In Kadur—Paddy, ragi, avare, sugar cane, togari, tadagani, navane, wheat, castor, horse gram, jola, hingar coriander and chillies.
In Koppa—Paddy, sugar cane, cardamom and areca.
In Mudgere—Paddy, ragi, coffee, areca and cardamom.
In Yedahalli—Paddy, sugar cane, coffee and areca.
In Sringeri—Paddy, areca and sugar cane.
All the above are reported to be in fair condition. More rain is urgently needed for the dry crops in the maidan taluks of the district. It is reported that, owing to insufficiency of rain, dry crops have been damaged by insects in parts of the Chikmagalur Taluk.

Crops sown.—Horse gram in parts of Kadur.

Crops harvested and their yield.—
In Chikmagalur—Gingelly, yield from 8 to 10 annas.
In Kadur—Black gram, green gram and gingelly, yield from 6 to 8 annas each.
In Koppa and Mudgere—Cardamom on a small scale.

10. Prospects of the season are fair. More rain is urgently required especially in the Chikmagalur, Kadur and Tarikere Taluks. Supply of food stuffs is sufficient.

11. Except for plague in certain villages of the Chikmagalur and Kadur Taluks, public health is generally good.

12. Except for "Chappe roga," still prevailing in a few villages of the Chikmagalur Taluk, cattle are reported to be healthy. Water and fodder are available.

N.B.—Report from Tarikere not received.

CHITALDRUG.

8. Market well supplied.

9. *Standing crops*, such as paddy, ragi, chillies, cotton, sesamum, castor, haraka, togari, sajje, navane, same, sugar cane, avare, tadagani, green gram, and black gram, are reported to be in fair condition owing to the rainfall during the week.

Crops sown.—Cotton and navane in the Chitaldrug Taluk and horse gram in the Challakere and Molakalmuru Taluks.

Crops harvested and their yield.—Gid-ragi in the Challakere Taluk, yield from 8 to 10 annas; and sesamum and jola in the Hiriyur Taluk, yield 6 annas.

10. Prospects of the season are fair. Rain is needed for the growth of plants and for sowing operations. Food stuffs are available.

11. Public health is generally good.

12. Cattle are healthy. Water and fodder are available.

COCHIN STATE—1087.

Prospectus.

It is proposed to hold an Exhibition of Agricultural and Industrial Products and Cattle Show in the Promenade (Hannyngton Mantapam) opposite to the Public offices at Tirchur. The exhibition will commence on Monday, the 29th January 1912, and will be kept open till the 5th February 1912.

2. *Object of the exhibition.*—The primary object of the exhibition is to bring together agricultural and industrial products, machinery, etc., the use of which it is desirable that the raiyat and artisan should understand. The cattle show is intended to give to the raiyats an idea of the several species of cattle in and out of the State and thus to promote improved methods of breeding, etc.

3. Lectures will be delivered by competent persons in Malayalam on subjects connected with Industry, Agriculture, Improved Implements, Cattle-breeding, etc. Demonstrations will also be arranged. There will also be competitions on the exhibition grounds in ploughing, weaving, etc.

4. Exhibits are generally divided into (1) samples and (2) exhibits for sale.

The several groups and classes of exhibits which will be admitted for the exhibition are given in the Appendix. Articles for sale will also be admitted.

5. Arrangements are made to promote competition and to induce raiyats, etc., to exhibit the best products available by awarding prizes, to the value of Rs. 1,250.

The Appendix gives the amount set apart for prizes under each group of exhibits.

The number and the value of the prizes to be awarded for each class of exhibits will be decided by a Committee of Judges with reference to the quality, etc., of the exhibits received.

6. Exhibits, etc., which are the *bona fide* agricultural and industrial products of the State will be given special prizes as shown in the Appendix. All exhibits will compete for the general prizes

7. *Plan of exhibition grounds and buildings.*—The exhibition grounds and buildings will be divided into several stalls. Separate stalls will be provided for samples and exhibits for sale. Special arrangements will be made for the cattle show yards.

Outside the cattle show yards will be held a cattle fair in which sales can be effected.

8. No fee will be charged on exhibits of any kind, or for the space allotted for exhibits. Those who desire to have special facilities for sales of articles or demonstrations are requested to address the Agricultural Superintendent, Trichur.

9. *Admission fee for visitors.*—An admission fee of one anna per head will be levied, each time a person enters the exhibition grounds. Children under ten years of age and *bona fide* students bearing passes will be exempted.

10. The Government invite exhibits from all parts of the State as well as from outside. They hope that the Agricultural and Industrial Associations and other public bodies will help them with exhibits and suggestions.

11. The Government would thankfully accept donations for special prizes, medals, etc., from individual raiyats or Associations, interested in any special branch of Agriculture or Industry.

12. *Applications from exhibitors.*—Intending exhibitors should apply to the Agricultural Superintendent of the State, Trichur, before the 15th of December 1911. In this application, they must give full particulars of their exhibits and the group, etc., under which they fall. Information whether covered or open space is required, should also be given.

13. Any exhibits not falling under the groups, etc., as per Appendix will also be admitted at the discretion of the Diwan Peishkar.

14. Meetings of the leading raiyats of the various taluks will be convened as early as possible to give them a clear idea of the object and scope of the exhibition, so that they may

avail themselves of the opportunity afforded for their improvement, and they may co-operate intelligently with the Government to make the exhibition a success.

15. All applications should be addressed to the Agricultural Superintendent and must be superscribed "*Application for admission of exhibits to the Cochin Agricultural and Industrial Exhibition and Cattle Show, 1087.*" Applications will be registered by that officer. As the accommodation for the exhibits will be limited, application received after the prescribed date may not be considered. Forms of application will be available in the Taluk Offices.

16. *Delivery of exhibits.*—Registered applicants should send their exhibits so as to reach the exhibition grounds at least five days before the exhibition with a list in duplicate giving the description of the exhibits according to the Appendix. All packages containing the exhibits must bear labels specifying the name and number of exhibits. They must contain a list in duplicate showing the name or description of the articles, price, place of production or manufacture, name of exhibitor, etc. In respect of agricultural exhibits the following information should be furnished:—

(1) Local name of grain.
(2) The season of sowing.
(3) Quantity of seed per acre.
(4) Manure used
(5) Time required for maturing of the crop.
(6) Yield per acre.
(7) Other interesting details.

Printed labels will be distributed by the Tahsildars and the Agricultural Superintendent. Exhibits for sale only should be marked "*For Sale.*" Ordinarily, the exhibitors or their authorised agents should accompany their exhibits. Exhibits which could be sent in Railway goods or parcels should be sent in packages, the freight and transport charges being always borne by exhibitors.

17. The Government will not be responsible for any risk or damage in cases where exhibits are not accompanied by owners.

18. The receipt of exhibits will be acknowledged by the duplicate list being signed by the Agricultural Superintendent and returned to the exhibitor.

19. *Passes for admission.*—No exhibits, exhibitors or visitors will be admitted to the exhibition grounds without passes signed by the Diwan Peishkar, which will be issued outside the exhibition grounds. Free passes will be given to exhibitors who accompany their exhibits.

20. As far as possible, accommodation will be provided for articles intended for sale. The Committee will allow those who wish to send articles on a large scale to have temporary booths put up at their own cost.

21. The exhibitors should fix or remove their exhibits on their responsibility and should bear the expenses of the same. The Government will not be responsible for any loss or damage caused to the exhibits in the exhibition grounds. But the Government will be ever ready to help the exhibitors whenever necessary, and responsible officials will be deputed to superintend the receipt into and removal from the exhibition grounds, of the exhibits.

22. Exhibits may be sold on exhibition grounds but shall not be removed till after the exhibition is over. Sales will be notified by a card affixed to the exhibit.

23. Noxious or dangerous exhibits will not be admitted. Perishable exhibits may be exhibited and removed on one and the same day.

24. Prizes will be offered only if the exhibits satisfy the quality required by the Judges to be appointed by the Government.

25. Prize winners will be furnished with certificates also in addition to prizes.

26. *Cattle Show.*—Separate arrangements will be made to accommodate different kinds of cattle. These will be arranged in a convenient place and selections made from them for the show.

27. Only cattle admitted to the show yards will be provided with fodder free by Government for the days of the show and for one day previous.

28. Every animal admitted to the show yards should be accompanied by a sufficient number of men to keep it under proper control.

29. Only cattle considered suitable will be allowed to compete in the cattle show for prizes.

30. No animal which has won one prize will be allowed to compete for any other prize.

31. Working cattle may, at the option of the Judges, be subjected to a practical test as to their power of draught. They must be the *bona fide* property of the exhibitor.

32. *Cattle Fair.*—Outside the show yards will be held a fair, to which healthy cattle only will be admitted.

33. All persons who become exhibitors shall be held to signify their consent and acceptance to the above conditions and to such other conditions which the Government may hereafter prescribe. The Committee have power to make rules for the conduct of the exhibition and their decision is final.

34. The power to alter the prospectus as convenience may require is vested in the Diwan.

Office of the Diwan of Cochin,
Revenue Department,

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words *kinds* and *varities* may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct *kinds* of flowers. Marechal Niel, Crimson Rambler, La France, etc. are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition buildings and any exhibitor acting contrary is liable to have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the curren show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows, the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees 10+15 respectively will be deducted to defray cost of a minature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 27th January 1912 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 28th, 9-30 A.M., after which they may be sold.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words *kinds* and *varities* may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct *kinds* of flowers. Marechal Niel, Crimson Rambler, La France, etc., are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition buildings and any exhibitor acting contrary is liable to have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the current show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows, the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees 10+15 respectively will be deducted to defray cost of a minature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 27th January 1912 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 28th, 9-30 A.M., after which they may be sold.

School children will be admitted on Sunday between 8 A.M. and 12 noon.

GENERAL CONDITIONS.

1. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, at least four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Entry forms are supplied on application to the Superintendent and exhibitors are requested to use these.

2. The large foliage groups should be ready arranged two days before the Show.

3. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

4. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

5. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

6. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

7. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

8. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

9. Where one plant of each kind or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

NOTE.—For the purpose of the exhibition the words *kinds* and *varieties* may be illustrated as under:—Apples, oranges, figs, grapes, etc., are distinct *kinds* of fruits. Ribston Pippin, Blenheim Orange, Golden Reinette, etc., are distinct *varieties* of apples. Roses, Chrysanthemums, Dahlias, etc., are distinct *kinds* of flowers. Marechal Niel, Crimson Rambler, La France, etc., are distinct *varieties* of roses. Cabbage, Beans, Beet, Carrot, etc., are distinct *kinds* of vegetables. Sugarloaf, Early Drumhead, Enfield Market, etc., are distinct *varieties* of cabbages.

10. Two or more persons may not compete for prizes separately with plants, etc., from the same garden.

11. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

12. All exhibits sent for competition must be *bonâ fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name can compete for prizes but not for medals.

13. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P.M., on the day of the Show shall be summarily ejected.

14. No one can be a Judge in any class in which he may be an exhibitor.

15. Similarly, while judging is going on, no exhibitor is permitted to be in the Exhibition buildings and any exhibitor acting contrary is liable to have his exhibits disqualified.

16. The names of exhibitors can only be attached to exhibits when the judging has been completed.

The following Rules for awarding cups and medals at the Horticultural Shows are hereby notified to the public:—

1. His Highness the Maharaja has graciously presented two cups for competition at the Flower Shows. The large cup will be competed for in classes I, II and III and shall be awarded to the Exhibitor who has got the highest aggregate in prizes won in the above classes during the current show.

2. The money value of the prizes will be taken in calculating the aggregate.

3. A gold medal will, for purposes of the calculation, count 50% over the first prize, a silver medal equal to the first prize, and a bronze medal and "Highly commended" equal to the lowest prize in the respective group.

4. The small cup will be awarded to the young lady who wins the first prize for the best florally decorated Bicycle at the current show.

5. Both cups will be held by the winners for the next six months under satisfactory arrangement for their safe custody.

6. Ten days before the following show the cups must be returned to the Superintendent, Lal-Bagh, for being again put up for competition at the Show.

7. Should a competitor win the cup at any two successive shows, the cup will be his property for good.

8. Out of the money prizes won with the cups, a sum of rupees 10+15 respectively will be deducted to defray cost of a minature facsimile cup to be given as a souvenir to the last winner, except, of course, when the cup is won outright.

9. Gold, Silver and Bronze medals will be available for all classes and will be awarded at both the Summer and Winter Shows.

10. The following exhibitors will be qualified for the award of a medal:—

(*a*) The exhibitor of the best all-round exhibit in the appropriate class or classes.

(*b*) The exhibitor of an exhibit of more than ordinary excellence in any group.

(*c*) The exhibitor of any specially meritorious novelty.

11. Medals where awarded will be in place of the money prizes shown in the prospectus against the respective items.

12. No exhibitor who has been awarded a medal in any group will be qualified to receive another medal in that group during the two calendar years succeeding that in which he has received the medal.

13. No exhibitor will be qualified to receive a medal who is not the *bonâ fide* cultivator of his exhibit or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor who has merely purchased fruit or vegetable exhibited will be eligible.

14. It will be open to the Judges to withhold any or all the medals in any show on the ground of deficiency of merit in the exhibits.

The Flower Show opens on Saturday the 27th January 1912 at 3-30 P.M.

The Floral Parade takes place at 5-30 P.M.

Vegetables will, if possible, be exhibited till Sunday the 28th, 9-30 A.M., after which they may be sold.

S. V. RAMASWAMI IYENGAR,
For *Offg. Sanitary Commissioner*
with the Government of Mysore.

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE

DASARA REPRESENTATIVE ASSEMBLY

6th OCTOBER 1911

GENTLEMEN,

It gives me great pleasure to welcome you to another session of the Representative Assembly, and to lay before you, by command of His Highness the Maharaja, an account of the administration of the different departments of the State during the past official year and of the measures under contemplation for the present year.

FINANCE.

2. I shall first take up the subject of the finances of the State. The financial statement and budget estimates for the year 1911-12 were published with an issue of the Mysore Gazette Extraordinary under date the 6th September, and I have no doubt you have all studied it. As usual the subject of finance will be considered under three divisions, *viz.*, the closed accounts of 1909-10, the revised estimates of 1910-11 and the budget estimates of 1911-12.

Accounts of 1909-1

3. Taking up first the accounts of 1909-10, we see that the budget estimates of that year were framed on the basis of an year of average financial conditions. The estimates for that year provided for a deficit of 1·58 lakhs on the ordinary account and a surplus of 2·13 lakhs under the Cauvery Power account. As the actuals stand, the ordinary account shows a surplus of 14·02 lakhs and the Cauvery Power account a surplus of 6·99, *i.e.*, a surplus of 21·01 lakhs on both the accounts taken together. This surplus was secured after appropriating 3·33 lakhs for famine reserve and sinking fund contributions and setting apart 6·93 lakhs towards the depreciation fund which was started during the previous year in connection with the

Cauvery Power Works. The fluctuations in the actuals have been fully explained in the appropriation report for 1909-10 published by the Comptroller in the Mysore Gazette dated 6th July 1911.

Revised Estimates for 1910-11.

4. According to the revised estimates the revenue realized for the year 1910-11 is expected to amount to 246·29 lakhs, *viz.*, 230·03 in the ordinary account and 16·26 under the Cauvery Power Scheme. Similarly the total expenditure is expected to amount to 220·52 lakhs, *viz.*, 211·80 under the ordinary account and 8·72 (including interest and sinking fund charges) under the Cauvery Power Scheme. This leaves a surplus of 25·77 lakhs after appropriating 2 lakhs for the Famine Reserve Fund, 1·33 lakhs for the Sinking Fund in connection with the State loan and 2·85 lakhs for the Depreciation Fund of the Cauvery-Power-Scheme.

Budget for 1911-12.

5. The budget for 1911-12 has been framed on the basis of fairly favourable seasonal conditions and agricultural prospects. Though the rainfall during the last few weeks has not been as propitious as hoped for, there has not been absolute or continuous drought over any considerable area of the State, and in view of the bountiful harvests of the last two years and the resources of the people generally, a condition of pronounced scarcity need not be apprehended in the State during the current year. The total revenue is estimated at 235·80 lakhs, *viz.*, 220·30 lakhs in the ordinary account and 15·50 under the Cauvery Power Scheme account. The total expenditure and appropriations come to 229·28 lakhs on the ordinary account and 9·81* on the Cauvery Power Scheme side, that is, to a total of 239·09 lakhs. There is thus a deficit of 3·29 in the budget estimates of 1911-12.

6. The land revenue has been taken at 102 lakhs against collections exceeding 105 lakhs in each of the two previous years. Other heads of revenue have been taken at the ordinary standard.

7. Among the ordinary heads of expenditure, enhanced grants have been provided under Education, Medical and Public Works. The extra amount allotted to the last department is 5 lakhs, a grant of 30 lakhs having been sanctioned.

---

* This is made up as follows:—

Total of items 35 and 36 of Statement A ...	7·68
Sinking Fund (included in item 29 of Statement A) ...	1·33
Interest on loan (included in item 11 of Statement A)...	·80
Total ...	9·81

8. Amongst special items of expenditure included in the budget estimates for 1911-12, the most important is a provision of seven lakhs for the participation of His Highness the Maharaja, in a style befitting his position in the imperial function of the Coronation Durbar at Delhi. The estimate has been framed with all possible regard to economy; and arrangements have been made for proper control and prompt and effective audit of expenditure.

9. Another special item of expenditure is the grant of one lakh for the work of the Economic Conference. This is intended to meet the expenditure which may be incurred by the Committees appointed by the Conference on account of establishment, travelling allowance, purchase of books and journals, conducting experiments, payment for expert opinion and other items and also the general expenses of the Conference.

10. The position that with the revenues of a year of average prosperity we are left with a deficit which, though not large is yet appreciable, is thus entirely due to a coincidence—the necessity for some extraordinary items of expenditure having occurred at about the same time that, in the best interests of the people, additional grants to some of the departments of the State became necessary for special improvement or in the course of ordinary development. There would have been no difficulty in balancing the budget or even in securing a fair surplus, if some part of the additional expenditure had been spread over a number of years. But the Government of His Highness the Maharaja consider that most of the objects for which additional grants have been given are so urgent or important that to postpone them would be to lose much valuable time. And they have therefore felt justified in budgetting for a small deficit in the special circumstances of the year. This need cause no anxiety or concern.

The General Financial Position.

11. The general financial position continues to be satisfactory, as can be seen from the Statement B placed in your hands, which shows the cash assets and liabilities of the State as they stood on the 1st July 1911.

The Account Department.

12. The scheme of local audit which had been under consideration for some time past was sanctioned and a local audit department organised as a branch of the Comptroller's office.

STATE LIFE INSURANCE.

13. The State Life Insurance Fund continued to be in a satisfactory condition. Excluding policies paid or

otherwise lapsed, there remained on the books at the end of the year 13,905 policies held by 7,562 persons, assuring a bonus of Rs. 67,05,884 for a monthly premium of Rs. 23,034. During the year a special impetus was given to the registration of nominations under Rule 23 of the Insurance Rules and, as a result, 3,300 insured persons have registered their nominees. A scheme to enable officials to secure monthly pensions to their surviving relations was sanctioned in March 1911. Another important measure in the matter of insurance may be mentioned. Hitherto the bonus that could be secured by an official was that admissible for a monthly premium of ten per cent of his pay, subject to a maximum monthly payment of Rs. 50. Officials are now allowed to insure for larger amounts by paying more than ten per cent of their pay, if they wish to do so, but without exceeding the premium limit of Rs. 50 a month.

LEGISLATION.

14. The Legislative Council held three meetings during the year. Twenty-one bills were considered including nine which were pending from the previous year. These nine as well as three of the new bills were passed into law. The remaining nine bills were in various stages of progress.

15. The Council refused to grant permission to the introduction before it of the Bill, which had been prepared by a Committee appointed in 1905, for the removal of disabilities arising from change of religion or deprivation of caste in Mysore.

16. The following were the Bills that were passed :—

(1) The Poisons Bill, (2) The Treasure Trove Bill, (3) The Tank Panchayet Bill, (4) The Bill to recognize the representative character of the Administrator-General of Madras, (5) The Code of Civil Procedure Bill, (6) The Limitation Bill, (7) The Insolvency Bill, (8) The Guardians and Wards Bill, (9) The Small Cause Courts Bill, (10) The Census Bill, (11) The Bill to amend the Government Savings Banks Act as in force in Mysore and (12) The Public Conveyance Bill.

17. Among bills that have since been taken up may be mentioned, a Bill to amend the Mysore Land Revenue Code in some respects, so as to give effect to the representations that are being made at this Assembly about giving inamdars greater facilities than exist at present for the recovery of rent from their tenants.

18. Rules and Notifications under enactments in force were issued on a variety of subjects, such as Co-operative Societies, Court Fees, Excise, Local Boards, the Census and Insolvency. **Rules under Regulations**

19. As you are aware, a General Census of the population was taken on the night of the 10th March 1911 in the State simultaneously with the other parts of India, and the provisional totals were published on the 17th March. The final totals since made up show a population of 5,806,193 persons for the State, including the Civil and Military Station of Bangalore. Compared with the population in 1901 there is an increase of 4·82 per cent, and it is a somewhat significant fact that, while the population shows an increase in all the maidan districts of the State, there has been in the malnad districts of Kadur and Shimoga a decline of 5·91 and 2·92 per cent respectively. In the Bangalore City and the Kolar Gold Fields, there has been a remarkable increase of population, which has gone up by 27·68 and 26·04 per cent respectively. **CENSUS.**

20. The year under review was, like the previous year, a prosperous one. The early showers of May and June 1910 were fair. The rainfall during the subsequent months (July to November) was timely and general, as well as sufficient, and even abundant. The average for the State was 48·29 inches which was 10·11 inches more than that of the previous year and 11·34 inches more than the average for 40 years (1870-1909). As a result, the outturn of crops was distinctly good, and the prices of food grains fell to some extent, rice of the second sort and ragi being sold at 9·19 and 18·56 seers per rupee, as against 8·14 and 13·51 seers during the previous year and 9·45 and 16·80 seers in 1905-06. **LAND REVENUE DEPARTMENT.** **Seasonal Conditions.**

21. The Revenue and Agricultural Gazette is now running through the fifth year of its existence. It has a circulation of 550 copies, excluding the 550 copies sent free to district, sub-division and taluk offices and to shekdars. The number of patels and shanbhogs subscribing for the journal increased from 170 to 440. At the request of the Honorary Secretary of the Kadur District Agricultural Association, one hundred copies of the journal have been ordered to be supplied to the Association, at the concession rate of 8 annas per annum, for distribution among members of the Association. During the year two supplements, one on "School Gardens" and the other on "Dry Paddy Cultivation," were issued. The continuance of the publication of the **The Revenue and Agricultural Gazette.**

journal for a further period of three years from November 1911 has recently been sanctioned. The Agricultural Committee of the Mysore Economic Conference has resolved to make use of this journal as a medium for its publications on agricultural topics.

Minor Tanks Restoration.

22. Four hundred and fifty-nine minor tanks were dealt with during the year, and the expenditure incurred by Government in this behalf amounted to Rs. 68,090, against an allotment of one lakh of rupees.

The distribution of these figures by districts, is as follows :—

District	No. of tanks dealt with	Amount spent Rs.
Bangalore ...	... 47	9,193
Kolar ...	... 153	18,537
Tumkur ...	... 81	15,237
Mysore ...	... 45	3,456
Hassan ...	... 60	9,889
Shimoga ...	... 37	6,538
Kadur ...	... 25	3,042
Chitaldrug ...	... 11	2,198
Total	... 459	68,090

The Kolar and Tumkur districts again head the list.

The restoration of 164 tanks was completed before the close of the year. The progress was not as satisfactory as in the previous year, and this is reported to be due to several tanks having received a good supply of water towards the close of the official year which prevented the completion of the works taken on hand.

Cattle Shows.

23. Cattle shows were held during the year in all the districts except Kolar. There were eight such shows and they were well attended. A pony show at Harihar and an Agricultural and Industrial Exhibition on a small scale at Channagiri were also held in connection with the cattle shows at those places. An Industrial and Agricultural Exhibition was organised at Chitaldrug in conjunction with an Educational Exhibition on the 17th April 1911, and was a great success.

Civil Veterinary Department.

24. There were during the year eight Veterinary Hospitals and Dispensaries, one at the headquarters of each district, with a Veterinary Assistant in charge. Two more Veterinary Assistants were appointed, in November 1910 temporarily for one year, to be chiefly employed in itineration work in localities infected with cattle diseases, to afford advice and help to the ryots. There was a

noticeable increase in the total number of cases treated which was 13,440 as against 9,901 in the previous year.

25. The number of cattle inoculated against rinderpest was only 551 against 8,138 in the previous year. The decrease was due partly to the absence of violent outbreaks of cattle disease, and partly to the supply of sera from the Imperial Bacteriologist having been small. The itineration of the Veterinary Assistants in their several districts was satisfactory and modern methods of cattle treatment are becoming popular among the ryots.

Seed Grains and Agricultural Implements.

26. Out of the grant sanctioned for the purpose, several varieties of seed grains and agricultural implements were purchased and distributed locally and the following items of interest may be mentioned. The "*Kolinji*," or Wild-Indigo plant was tried as a green manure by certain agricultural stations in the Madras Presidency and found to be very useful to paddy cultivation. Some seed was therefore obtained and supplied to the Deputy Commissioners of Kolar, Kadur and Chitaldrug and also to the Inamdar of Sarvamanya Krishnarajpur Agrahar, T.-Narsipur Taluk, for trial. Barbados sugarcane cuttings were purchased from the Samalkota Agricultural Farm and supplied to the Agricultural Lecturer, Normal School, Mysore, for trial on the Experimental Farm. Virginia, Spanish, Japanese and Mauritius varieties of groundnuts were supplied to the Deputy Commissioner, Chitaldrug, on behalf of some enterprising ryots in the district. Thirty maunds of turmeric seeds were purchased from the Agricultural Farm, Nandyal, and supplied to an enterprising landholder of Shimoga who was desirous of trying a new variety. Broach cotton seed was distributed among certain leading ryots in the Chitaldrug district. A quantity of Cambodia cotton seed supplied by the Manager, Agricultural Station, Koilpatti, was sent to the Agricultural Lecturer, Normal School, Mysore, for experiment.

27. A warping machine at a cost of Rs. 50 was purchased from the Director of Industries, Madras, and lent to the proprietor of the Sri Krishna Weaving Factory, Mysore, at his request for trial and demonstration. A Pusa double continuous spinning machine was purchased from Messrs. Turner, Hoare & Co., Engineers, Bombay, and given to the Government Industrial School, Channapatna, to popularize the use of this machine in spinning silk thread out of silk waste. A winnower, sent by the Friends' Mission Industrial works, Hoshangabad, for

purposes of demonstration during the Dasara Exhibition of 1910 was eventually purchased, and having been found to be a useful machine, has been lent to the Government Agricultural Farm, Mysore, for trial and demonstration.

The Agricultural Department.

28. The experiments conducted at the Hebbal Farm yielded interesting results on various matters of importance to the ryots. With regard to ragi it has been found that the out-turn is largely increased if the soil is ploughed a long time in advance of the sowing season. To allow for earlier ploughing it is necessary to go over the ground with a disc harrow with the result that the rain soaks in much more readily and ploughing can be done after a fall of rain as low as 60 cents, while under ordinary circumstances the ryot requires a fall of about double that amount to allow him to plough. Certain green manures such as cow-pea and *avare* seem to improve the crop of ragi; and if the results come up to expectations in the case of the crop (Kar ragi) which will be harvested in November, arrangements will be made for the demonstration of the use of such manures. The results obtained up to the present by experiments on paddy cultivation will be published in the form of a bulletin which is practically ready. With regard to sugar cane the seasonal and rotation experiments have been continued. The imported Mauritius and Java varieties have been growing very luxuriantly. The results of the extensive experiments on sugar-making carried out during the year on Mr. Krishnaiengar's estate at Ooraghalli will be issued shortly in the form of a bulletin for general information. The eleven varieties of maize introduced from America in 1909 are reported to have done remarkably well. The best have been selected for growth on a larger scale with a view to distributing seed which will be undertaken in the present year. Three varieties of dry land lucerne obtained from the United States Department of Agriculture were sown during the summer of 1910 and have yielded a small quantity of seed. This will be used for further sowings and it is hoped that in this way a very profitable fodder crop may be introduced on dry lands.

29. The business done by the implement depôt has expanded to about double the proportions of that of the previous year. About one hundred ploughs were sold against forty-five in 1909-10, and many of these sales were made in parts where improved ploughs had never been known before. In almost all cases the use of the ploughs was actually demonstrated to the purchasers.

Other implements sold were winnowers, fodder-cutters, chain-pumps, threshing machines, sugar-cane mills and boiling-pans. The depôt is serving a useful purpose as a medium between the manufacturer and the buyer and also as a useful check on the hasty introduction of unsuitable implements of bad design or make. The Chemical Laboratory continued to carry on interesting experiments and analyses in connection with green-manures, sugar-cane, soils, cattle foods, etc. A bulletin on the subject of green manures is expected to be published shortly.

Mycology.

30. There was a greatly increased demand for the treatment of *koleroga* of supari by spraying operations and "spraying" was done in 91 gardens as against 45 in the previous year. Owing to the staff being mostly employed on this work much progress could not be made with regard to the "Anabe roga," but the work will be pushed on during the coming autumn and winter and the department hopes to publish a bulletin on the subject before the close of the official year. The ring-disease of potatoes and "smut" on jola were other diseases to which attention was paid during the year, but no progress could be made with regard to the spike-disease of sandal. The entomological investigations during the year resulted in the issue of useful illustrated bulletins on the rice and the jola grasshopper pests. Extensive experiments have also been carried on in respect of other pests such as the *kambli hula* and ground beetles, and the results are expected to be soon published.

31. It is, I think, desirable for me to state here that in dealing with the eradication of insect and other pests the Government cannot undertake the expense involved in operating over any large areas belonging to private landowners. It is for the people themselves to carry out such operations on the lines which the Entomologist may suggest after experiment and experience.

Co-operative Societies.

32. The year was one of good progress in regard to the co-operative movement in the State. The number of societies increased from seventy to one hundred and sixteen, but five societies ceased working during the year and their registration had to be cancelled. There were thus one hundred and eleven societies at the close of the year, with a total membership of 8,909, and a paid up share capital of Rs. 2,40,652. The number of members at the end of June 1910 was 6,301 and the paid-up share capital Rs. 1,58,693.

33. The Kolar, Shimoga, Kadur and Chitaldrug districts have not shown much progress. Out of forty-six societies newly started during the year, thirty-six were for the benefit of the agriculturists in rural parts, seven for officials and others in taluk headquarters, one for petty traders and artizans in the Mysore City, one for the Dayaré community among the Mahomedans in Channapatna and one for the benefit of the weavers in Grama in the Hassan taluk. The system of 'unlimited liability' has gained considerable ground this year. Out of the forty-six societies newly started, thirty-nine were on this basis and one old limited liability society was converted into one on unlimited liability. The increase in the number of unlimited liability societies was due partly to the ready help given by the Bangalore Central Co-operative Bank, Limited, in financing such societies, and was in itself an impetus to the Central Bank to do its business on a larger scale than in the last year. This year the Bank lent to ten societies to the extent of Rs. 28,605 and received back Rs. 1,500. It had at the end of June 1911 a paid-up share capital of Rs. 14,010 and fixed deposits aggregating Rs. 20,080, including a deposit of Rs. 10,000 graciously given by His Highness the Maharaja in token of his interest and confidence in the Bank. Out of Rs. 15,000 from the State Fund allotted for financing new societies, a loan of Rs. 250 was given to the Gottagere Anyonya Sahaya Sangha, Limited, in the Bangalore taluk. The recoveries during the year amounted to Rs. 350 from three societies. Now that the Central Bank is freely financing all societies on cheap commercial lines, there has been little necessity to advance loans from the State Fund.

34. The great increase in the number of societies and the volume of business done by them prove the popularity of the movement. There is every likelihood of its further extension in the near future under the impetus of the Economic Conference.

35. The Honorary Organizers Messrs. Badami Krishna Rao, T. Venkataramaiya and H. R. Srinivasa Rao, have been doing their work with energy and enthusiasm. Mr. C. D. Ramaswamiah, though he has resigned, continues to take a keen interest in the co-operative movement.

Agricultural Banks.

36. Of the 59 Agricultural Banks started in the State from time to time since the year 1895, only 10 banks scattered over the districts of Mysore, Tumkur,

Kolar and Shimoga were in working order at the beginning of the year 1910-11. During the year, it was found expedient to order the winding up of the bank at Ariyur in the Tumkur taluk on account of its having fallen into arrears of Government dues. The bank has since paid up all its dues to Government and has closed its business. The bank at Chamrajnagar which had been ordered to be wound up in July 1906 showed a desire to revive its transactions and paid all the arrears of instalments, in consideration of which the Government allowed the bank to continue as a working institution. The number of working banks was ten—the same as at the end of the previous year. Only three banks—Hongenhalli (Malur taluk), Haldodderi (Sira taluk) and Palhalli (Seringapatam taluk)—did some business worth the name, the rest having done no appreciable work. The bank at Nanjangud after discharging the Government loan in full continued for some time to transact business with its own reserve of Rs. 4,563. In May last, however, the members resolved to wind up the bank and utilize the reserve for giving encouragement to Vedic studies. The members have been advised to collect the reserve in cash and then apply for the approval of Government to utilize the reserve for promoting Vedic learning.

37. With a view to resuscitate the Agricultural Banks, the Government decided in December last to bring them, if possible, under the Co-operative Societies Regulation and 14 banks accordingly signified their willingness to convert themselves into Co-operative Societies. Their suitability for the conversion as well as the terms and conditions on which the conversion should be allowed in order to ensure sound working are matters requiring careful examination in each individual case, and these are now engaging the attention of the Registrar of Co-operative Societies.

38. During the year under review, the total repayments from all the banks—both working and wound up—excepting the Coffee Banks, amounted to Rs. 59,794 and Rs. 9,032 towards principal and interest respectively. The respective figures for the previous year were Rs. 49,764 and Rs. 15,753. Coercive measures were resorted to only in extreme cases.

Joint Stock Companies.

39. Two new companies were registered during the year and four were wound up. The total number working at the end of the year was 78 as against 80 at the commencement.

Revenue Survey and Settlement.

40. During the year four Inam villages were surveyed and three villages were classed. Re-survey operations were completed in 535 villages belonging to the Kunigal, Magadi, Nelamangala and Maddagiri taluks and the old Harnahalli and Honnavalli taluks. The total area resurveyed was 476,392 acres or 744 square miles. Re-classification of water-supply to wet and garden lands was completed in 314 villages of the Belur taluk, 164 villages of the Tarikere taluk, and 132 villages of the old Banavar taluk. In all the re-classification extended to 99,049 acres comprised in 28,668 survey numbers situated in 610 villages. Proposals submitted for the revision of the settlement of the Honnali taluk were sanctioned by Government, and the rates will be announced next cold weather. Proposals for the revision of the settlement of the old Anantapur taluk and the Shimoga taluk are under the consideration of Government. The revised settlement will in all probability be introduced into these three taluks before the close of the ensuing cold season.

Inam Department.

41. The preparation of final quit-rent registers and the issue of title deeds formed, as usual, the main work of the Inam Department.

Registration.

42. The number of documents registered was 86,877 and the revenue realised was Rs. 1,63,626, being about the same as in the previous year.

Stamps.

43. There was a slight increase in the revenue from stamps, a sum of Rs. 8,25,950 having been realised as against Rs. 8,16,632 * in the previous year.

EXCISE.

44. In the administration of the Excise Department several measures of reform were introduced. The respective responsibilities of the Revenue and Excise officers in the matter of the collection of Excise revenue were defined. Rules for the transport of liquors and intoxicating drugs from one portion to another of British territory through Mysore territory and *vice versa*, were prescribed. The duty on ganja was raised from Rs. 5 to Rs. 7-8-0 per seer, the licensee being allowed to sell at a minimum rate of two annas per tola instead of at a fixed

* The figures relating to receipt and expenditure in this and the succeeding paragraphs are the figures taken from departmental reports, and cannot always agree exactly with the figures furnished by the Comptroller in Statement A. The Comptroller's accounts are compiled from the actual transactions of receipt and disbursement at the treasury, whereas the departmental accounts are generally compiled from figures obtained at an earlier stage. The statistical comparsions are however like with like.

rate, and the licensees of opium shops were permitted to fix their own selling price.

45. The gross receipts during the year amounted to Rs. 43,69,216 against Rs. 44,99,277 in the previous year showing a decrease of Rs. 1,30,061 due to diminished consumption under arrack and ganja and a fall in the number of trees licensed. The fall in the rentals of arrack and toddy shops also contributed to this decrease.

46. The number of arrack and toddy shops decreased from 824 and 3,355 to 781 and 3,281 in the year under review. The number of ganja shops increased by 5, but shops for the sale of opium decreased by 2, and foreign liquor shops by one.

FORESTS.

47. Two blocks, comprising an area of 23 square miles, were newly notified as State Forests under Section 17 of the Forest Regulation. Twelve blocks with an aggregate area of 100 square miles were notified as reserved lands under Section 4 of the Regulation. About 91 miles of forest demarcation lines were newly cut and 2,300 miles of old lines were re-cleared and widened to the standard width. An aggregate area of 2,328 square miles of forests was placed under fire protection, of which 2,161 square miles or 92·8 per cent were successfully protected. About 401,000 cubic feet of timber of various kinds were collected and sold departmentally and about 285,000 cubic feet were extracted and removed direct from the forests by purchasers and consumers. The total realizations from the sale of timber amounted to Rs. 4,15,000 against Rs. 4,20,400 in the previous year. The total quantity of sandalwood sold was 2,715 tons which yielded a revenue of Rs. 11,61,000 against Rs. 9,25,737 in the previous year.

48. The total revenue under forest proper was Rs. 20,85,000 against Rs. 17,59,000 in the previous year, and the expenditure amounted to Rs. 6,74,000 against Rs. 6,74,800 of the previous year. The net realization was, therefore, Rs. 14,11,000 against Rs. 10,84,200 of the previous year.

49. The Devarayadurga State Forest in the Tumkur district, was added to the list of Game Preserves as a tentative measure. The total expenditure under Game Preserves amounted to Rs. 9,230.

GEOLOGICAL AND MINING.

50. The past year was an important one in the matter of the gold mining industry in Mysore, the long-pending

question of the renewal of the mining leases of certain blocks on the Kolar Gold Fields under the management of Messrs. John Taylor & Sons, London, having been finally disposed of by the issue of fresh leases for a further term of 30 years from the 22nd March 1910. The advantage to the Government by the issue of these fresh leases is that they are now entitled to 2½ per cent of all declared dividends in addition to the royalty heretofore received of 5 per cent on the output.

51. Another important event of the year is that the revised rules referred to in the last year's report, for the grant of prospecting licenses and mining leases in Mysore were issued on the 8th October, 1910. The principal changes introduced by the revised rules are that prospecting licenses and mining leases are hereafter to be granted for specified minerals instead of for all minerals in general as previously, that royalties on minerals shall be fixed from time to time by notification in the official Gazette as experience of the working of each mineral is acquired, and that they shall also be liable to alteration from time to time.

The number of leases and licenses for mining and prospecting issued or renewed during the year was 58 as against 50 in the previous year.

GOLD.

52. The number of gold-producing mines at work was five, *viz.*,—the Mysore, Champion Reef, Ooregum, Nundydroog and Balaghat Mines. All these mines were paying dividends, with the exception of Balaghat, the prospects of which remain unfortunately far from encouraging.

53. The returns from the Mysore, Champion Reef and Nundydroog Mines continue to be satisfactory. The Ooregum returns have not been so good during the past twelve months, but it is expected that they will again attain their former high level if present indications in the developments are any criterion.

54. Outside the Kolar district both mining and prospecting operations, as far as gold is concerned, seem to have come to a stand-still. This refers more especially to the work that was being carried out by the New Shimoga Gold Field, Limited, on the Honnegudda and Siddarhalli blocks in the Shimoga and Kadur districts, where operations have been suspended owing to lack of funds.

Underground Water Resources.

55. In connection with the distress complained of in various parts of Mysore in consequence of the insufficiency

of water for drinking and other domestic purposes during the drier portions of every year and the general need for the improvement of water-supply in villages, the information collected by the Geological Department was published in the form of notes by Dr. W. F. Smeeth, State Geologist. These notes also contain deductions drawn by him and his recommendations in the matter, and will, it is hoped, induce the District Officers to take a keen and enlightened interest in the problems involved and to supplement the information already obtained with a view to arrive at a more complete understanding of the case. Towards the end of the year an extensive tour was undertaken by Mr. E. W. Wetherell, Officiating State Geologist, in the taluks of Tumkur, Sira, Chiknayakanhalli, Tiptur and Gubbi and about 100 villages were visited by him in order to collect information in regard to the present yield of water in the existing wells and also to suggest possible means of obtaining sufficient quantities of water required by the villages. Suggestions were also made in several cases in respect of the location of wells where the required quantities of water might be expected to be obtained. The information collected and the suggestions made will shortly be published for the information of the District Officers and the public.

Public Works.

56. The total expenditure on Public Works from all sources, including Local Funds, amounted to about Rs. 36 lakhs during the year. Of this amount, Rs. 7¾ lakhs were spent on irrigation works and Rs. 28¼ lakhs on civil works and military buildings.

57. The area actually irrigated under the Marikanave Reservoir in the Chitaldrug district during the year was about 5,000 acres against 10,951 acres assessed. In my last address, I stated that investigations and surveys were in progress to improve the conditions of irrigation under this reservoir. Definite proposals have been matured for the purpose and, among the improvements proposed, are the construction of a high level canal costing about 8½ lakhs, and the introduction of the 'Block System' of irrigation under the existing canals. The object of the latter proposal is to develop the irrigation of valuable crops like sugar cane, to arrest the injury caused to the land by water-logging and salt efflorescence, and to prevent the spread of malaria among the population.

58. The slip in the earthen dam of the Ramasagara tank in the Kolar district has been repaired and the

channels restored. The tank is expected to fill during the present rainy season to the level of the gaps left in the weirs. As the strength of the bund is tested, the water level will be raised gradually by filling the gaps with masonry and raising the level of overflow. Water will be available during the current irrigation season for the lands under the low level channels.

59. A project for a large reservoir on the Cauvery at Kannambadi prepared for the purpose of providing storage needed for power supply and irrigation is under consideration.

60. The extraordinary floods in the Cauvery which occurred recently between the 19th and 22nd July 1911 have caused some damage to anikats along the river. The flood of 19th July is reported to be the highest known within living memory. It rose to a height of 8 feet at the Krishnarajkatte anikat or 2¼ feet higher than the flood which caused a breach in that anikat in May 1909. This anikat has not suffered any damage, but minor injuries to other anikats, *viz.*, Kannambadi, Kalhalli, Virajanadi, Ramaswami and Madhavamantri are reported and they are receiving attention. The water over-topped the Wellesley Bridge at Seringapatam to a height of one foot above the parapet walls, damaging a portion of the walls and eroding the south approach. Happily, the bridge itself stood intact and the traffic was not interrupted for more than three days.

61. The principal new buildings which were in progress during the year were the new Palace and the Chamarajendra Technical Institute at Mysore, the Minto Ophthalmic Hospital, the new High School and the Physics Laboratory at the Central College at Bangalore; the Sandalkoti at Shimoga and the extension of the High School at Tumkur. In order to provide accommodation for the carriages and horses of the fifth division of the Imperial Service Transport Corps, proposals for constructing blocks of carriage and pony sheds in the old Silledar Lines at Bangalore at a cost of Rs. 19,675 were sanctioned during the year and work was started.

62. Under communications, the construction and improvement of certain malnad roads in the Shimoga and Hassan districts were in progress; also the extension of the Punjur-Chamrajnagar Forest road in the Mysore district. Work on the large bridge at Honnali on the Tungabhadra river was started during the year and is in progress.

63. Among miscellaneous public improvements may be mentioned the opening of the new water-supply for the use of the townspeople of Shimoga, the preparation of a revised project for the drainage of the Mysore City, and the construction of sundry roads and drains in the extensions of the Bangalore City. Investigations and surveys for the drainage of Bangalore, Shimoga, Davangere, Harihar and Sringeri were in hand.

Electrical Works.

64. In the Electrical Department, the Third Installation works and the extension of the interior power and lighting in the Bangalore City, Civil and Military Station of Bangalore and Mysore City were in progress during the year. The capital outlay during the year amounted to Rs. 50,634. The receipts of the entire Cauvery Power Scheme amounted to Rs. 16,43,255 and the working expenses proper to Rs. 6,18,190. The net profit of the year after allowing for interest charges at 4 per cent aggregated Rs. 6,94,899 or 8·39 per cent on the total capital outlay up to date, *viz.*, Rs. 82,79,470.

Railways.

65. The working expenses on all the State lines amounted to 62·68 per cent of the gross receipts as against 57·79 during 1909-10. The inclusion of the hire of rolling stock for the Branch lines mainly accounts for the increase. The total net earnings amounted to Rs. 11,29,000 or 4·54 per cent on the entire capital outlay of Rs. 248,28,475. The interest on the English loan of Rs. 163,82,801 amounted to Rs. 7,20,000. After deducting this as well as the stipulated share of surplus profits (Rs. 56,450) payable to the Company, the net revenue to the State was Rs. 3,52,550 or 4·17 per cent on the balance of capital, *viz.*, Rs. 84,45,674 expended from the general revenues of the State. A portion of the net receipts amounting to Rs. 2,07,224 was expended as capital outlay on railways in operation, thus reducing the net revenue of the year to Rs. 1,45,326.

66. The plans and estimates for the Hassan-Mysore Section of the proposed Arsikere-Mysore line were received from the Madras and Southern Mahratta Railway Company. The question of the construction of the line from Arsikere to Mysore was also examined by an expert, *viz.*, Mr. James R. Bell, formerly Consulting Engineer to the Government of India. These estimates as well as Mr. Bell's reports are at present under consideration. The re-survey for the line up to the southern frontier in the direction of Erode was in progress by the agency of the South Indian Railway Company. The construction of

light railways is also engaging attention. The Bangalore-Chikballapur Light Railway Company report some progress in collecting the capital needed by them. The Kolar District Board has come forward to construct the short length of line needed to connect Kolar with Bowringpet, by raising a debenture loan, and Government have given a provisional guarantee of 4 per cent on the capital required for the undertaking.

Judicial.

67. The only matters requiring mention with regard to the Judicial Department are that owing to congestion of work in the Chikballapur Munsiff's Court, an Additional Munsiff's Court was established at that station for a period of one year, and that the Central Nazarath system was modified with effect from the 1st July 1911. The Nazarath establishments at Bangalore and Mysore are now under the control of the Principal and Additional Munsiffs of those stations and that at Shimoga is under the Munsiff of that place. The process rules have also been re-cast. There was increase in civil litigation in all the divisions, the percentage being 7·26. There was a slight decrease of 3·09 percent in the number of offences dealt with by the Courts. Early in the current year a District Court for the Bangalore Division was re-established with a view to avoid congestion of work in the Chief Court.

Police.

68. The regular police force was maintained at the sanctioned strength, *viz.*, 851 officers and 5,949 men, and the cost of the department was approximately Rs. 9,08,000 as against Rs. 9,44,000 in the previous year. The excess in the latter year was due to the temporary grant of grain compensation allowance on account of distress in that year. The Village Police continued to work satisfactorily.

69. The number of reported cases of cognizable crime fell from 6,158 to 5,742. The percentage of property recovered to that lost also showed a slight improvement from 40·4 to 41·4. There were no serious dacoities or highway robberies by organized criminal gangs, and the public peace was satisfactorily maintained during the year. The department continued to be efficiently administered.

Military.

70. The standard of discipline and efficiency of the military forces of the State continued to be maintained as usual, and the administration of the department was satisfactory. The scheme of re-organizing the Transport Pony Corps into a Bullock Train is in fair progress.

71. The Medical Department continued to do useful work. With one newly-opened Local Fund Dispensary, there were at the end of the year 148 hospitals and dispensaries in the State. In these institutions 1,035,000 patients were treated, of whom 12,460 were in-patients. Satisfactory work was also carried on in the special hospitals of the State such as the Lunatic Asylum, Leper Asylum, Maternity Hospitals and the Eye Infirmary. **MEDICAL.**

72. Proposals for the improvement of the pay and status of Hospital Assistants and for an increase in their number have recently been sanctioned. This class of medical men will hereafter be designated Sub-Assistant Surgeons and their minimum pay will be raised from Rs. 25 to 30. The maximum will, as before, be Rs. 60, but the increments will be earned once in five years instead of in seven years as before. The number of these officers will be increased so as to allow of a reserve of 11 after providing for the full sanctioned number of charges.

73. There was an increase in the number of births registered during the year, the birth rate being 18·25 per mille of population against 16·63 in the preceding year. The death-rate was also higher, the ratio being 19·92 against 18·70. Small-pox and cholera, which prevailed widely and claimed victims in large numbers in 1909-10, accounted, however, for a much smaller number of deaths during the past year. It is to be regretted that fevers still continued to be the cause of an increasing number of deaths, and plague also prevailed widely. As compared with 1909-10, there was an increase of 7,500 plague attacks and 5,100 deaths in the State, as a whole. It is difficult to account for this comparatively heavy incidence of plague during 1910-11; nor from a review of the figures from the commencement of the epidemic up to date, can one detect a periodicity of recurrence in their rise and fall annually. The usual preventive measures were adopted in all the affected places, particular attention being given to prompt evacuation and inoculation. Inoculation was carried on on an extensive scale in the Bangalore City, Kolar Gold Fields, Channapatna and Harihar. Special Medical Officers were deputed for the purpose and the system of payment of rewards to the inoculated among the cooly classes to compensate them for loss of wages was in force. Instructions were issued to the District Medical Officers to train their medical staff in inoculation methods and to direct them immediately on the requisition of either the Deputy Commissioner or the District **Public Health.**

Sanitary Officer to carry out inoculation at their stations. It is satisfactory to note that many gentlemen out of pure public spirit and disinterestedness helped to make inoculation popular among the masses during the outbreak of plague. It may not be out of place to mention here, in view to remove any misapprehension the public may entertain as to efficacy of inoculation as a plague preventive measure, that statistics collected by a house-to-house enquiry by officers specially deputed for the purpose conclusively prove the benefits of the measure. The results obtained at Harihar in this respect are instructive. Among the uninoculated population of 1,783 persons, there were 283 attacks and 203 deaths, the percentage of deaths to attacks being 71·73, and to population 11·39. On the other hand, among the inoculated population of 2,138, there were only 92 attacks and 18 deaths, the similar percentages being 19·57, and ·84.

74. The total number of vaccinations done in the State during the year was 62,261 against 102,438 in the year previous. The decrease was due to the prevalence of plague and in part to the failure of an adequate supply of lymph for some days owing to a difficulty in getting the required number of calves. The system of compulsory vaccination was continued in the Mysore and Bangalore Cities and on the Kolar Gold Fields and in certain other Municipalities in the State. The experimental measure referred to last year of appointing Hospital Assistants as public vaccinators has not been carried out owing to the paucity of qualified Hospital Assistants.

Government Gardens.

75. The general improvement of the Government Gardens has progressed satisfactorily. A number of useful American timber trees, the guayule rubber of Mexico, a new species of mulberry and other economic plants have been introduced and appear to prove successful. Some 50 kinds of Eucalyptus are also stated to be thriving and a large number of plants are ready for distribution. The seed depôt is being further developed and during the year has been chiefly concerned with the distribution of vegetable, horticultural and botanical seeds. The Sunnakal Tank Experiment station has been fully planned and a start has been made with the laying out of the plots, roads and distribution channels. A programme of work is under the consideration of Government. Meanwhile, the cultivation of the plants intended for the Farm such as yams, cassavas, fodder and paper grasses, new fruits and vegetables, etc., is continued in the Lal-Bagh.

The Government Museum.

76. The museum maintained its popularity, having been visited by 273,293 persons, an increase of 6,143 over the average of the past five years. Ninety-three coins were acquired for the numismatic branch, and a catalogue of the European coins was compiled. The library containing many technical and scientific works was largely used by the public.

Meteorological Department.

77. Meteorological observations continued to be carried on in the observatories of the State systematically and in a satisfactory manner.

The Government Press and Stationery Departments.

78. There was a general increase in the outturn of work in all branches in the Central Press on account of the Census Department. For the same reason the expenditure increased from Rs. 92,000 to Rs. 1,23,000, chiefly under purchase of materials. Substantial work was turned out in the Branch Press at Mysore also, which was provided with an electric motor, electric lights and telephone service. In the Stationery Department, the usual purchases of English made-papers and stationery and Indian papers and articles were made at a cost of Rs. 25,000 and Rs. 65,000 respectively.

District Funds.

79. The income under all heads of District Funds during the year 1910-11 was approximately Rs. 8,29,801, and including the opening balance of Rs. 3,66,155 the total receipts amounted to Rs. 11,95,956. The total expenditure was Rs. 7,53,720 of which Rs. 4,60,140 were spent on public works, Rs. 79,222 on sanitation, Rs. 93,054* on medical aid and the remainder on miscellaneous items. The closing balance at the end of the year was Rs. 4,42,236.

80. Sanction was accorded during the year to the formation of seven new unions, thus raising the total number to 173.

Local Funds General.

81. The income under Local Funds General amounted to Rs. 1,84,256 and including the opening balance of Rs. 1,59,782, the total receipts amounted to Rs. 3,44,038 of which Rs. 1,82,637 were spent on the following items:—

	Rs.
Public Works ...	89,205
Industrial Schools ...	56,679
Engineering School ...	7,921
Indigenous Hospital ...	3,493
Pasteur Institute, Coonoor ...	502
Mysore Industrial Exhibition ...	6,392 †
Other items ...	18,445
Total ...	1,82,627

* 63,276 Medical relief; 2,022 Vaidyasalas, etc.; 27,756 Veterinary Hospitals. Total 93,054.

† This is the expenditure on the Exhibition from Local Funds General. The total expenditure on the Exhibition was Rs. 11,621-8-0.

There remained to the credit of the funds at the end of the year Rs. 1,61,401.

MUNICIPAL BOARDS.

82. Five more towns (Melkote, Sidlaghatta, Mulbagal, Chikballapur and Channapatna) were ordered to be constituted into permanent Municipalities under the Mysore Municipal Regulation, thus raising the number of Municipalities to thirty.

83. The Bangalore City Hackney Carriage Regulation I of 1887 was repealed by the Mysore Public Conveyance Regulation, and the latter was made applicable to the Bangalore City.

84. With effect from the 1st September 1910, sub-section (2) of Section 142 of the Mysore Municipal Regulation, authorizing the seizure and destruction of adulterated articles of food or drink under the orders of a Magistrate, was declared to be applicable to the Mysore City Municipality with reference to ghee and six other articles, as in the case of the Bangalore City Municipality.

85. All the powers under sub-section (2) of Section 144 for the prevention of dangerous diseases, which were conferred on the two City Municipal Councils last year, were conferred also on the Shimoga Town Municipal Council during the year. Bye-laws relating to bakeries, sweetmeat shops, native hotels and the manufacture and preparation of aërated waters, submitted by the two City Municipal Councils, as also the Vaccination Bye-laws for the Mysore City Municipality and for twelve other Municipalities were sanctioned.

86. The Shimoga Town Water-works were opened at the close of August 1910. For the further improvement of the sanitation of this town the formation of the Durgigudi Extension consisting of bungalow and house sites was sanctioned. In order to encourage building in this extension certain privileges were granted to the purchasers of sites, the chief of them being the grant of timber at concession rates for two years ending with June 1913.

87. The receipts under Municipal Funds during the year amounted to Rs. 9,42,670 and the expenditure therefrom to Rs. 8,81,006.

Mysore City Improvement.

88. The Board of Trustees for the improvement of the Mysore City was reconstituted during the year. The number of properties acquired in the Fort up to the end of June 1911, including 121 acquired during the year, was 316 costing Rs. 5,28,399, leaving only 49 properties,

to be acquired out of 365 notified. Plans and estimates prepared by the Board for a complete system of underground sewerage with outfall works for the whole town costing 14½ lakhs of rupees are under the consideration of the Central Sanitary Board. Suitable sites for the construction of model school buildings have been reserved in the various mohallas of the City. Plans and estimates for these buildings are being prepared by the Board in consultation with the Mysore City Municipal Council. Out of Rs. 3,00,000 at its disposal, the Board spent Rs. 2,30,367 in paying compensation for properties acquired and Rs. 7,105 on other minor works.

Muzrai.

89. Eighty-two Muzrai institutions were repaired at a cost of Rs. 30,722 during the year, the surplus funds of the institutions concerned and the State contributing Rs. 26,202 and Rs. 4,250 respectively. A sum of Rs. 48,500 was invested with the Government by private individuals at favourable rates of interest on behalf of benevolent, charitable and educational institutions. The total amount of such deposits at the end of the year was Rs. 1,99,500.

Education.

90. The year was one of satisfactory progress in education. The number of public institutions increased from 2,416 to 2,459, and that of pupils from 113,785 to 115,079. Private institutions, however, decreased from 1,876 to 1,807 and the number of pupils in them from 23,944 to 22,904. The figures for this latter class of institutions are always fluctuating. The total number of public and private institutions was thus 4,266 with an attendance of 137,983 pupils against 4,292 institutions with an attendance of 137,729 pupils in the previous year. Out of the total number of pupils under instruction, 115,179 were boys and 22,804 were girls, against 115,843 boys and 21,886 girls in 1909-10. The percentage of boys at school to the total male population of school-age decreased slightly from 28·06 to 27·9 while the percentage of girls at school to the female population of school-age slightly increased from 5·4 to 5·6. The percentage of boys and girls under instruction to the total population of school-age was 16·9 against 16·8 in the previous year.

Re-organisation of Colleges.

91. Further advance was made in the equipment of the two First Grade Colleges for the B.A. Pass Course in accordance with the New University Regulations. The Maharaja's College was affiliated to the Madras University in Group VI (Sanskrit and Kannada) for the B. A. Pass

Course and suitable arrangements were made for the teaching of this group in the college. A Museum of History and Economics has been started for the benefit of the college students and a number of historical maps has been purchased. The building of the new Physics Laboratory of the Central College was completed and the accommodation and equipment provided for it are considered satisfactory. Plans and estimates for the new Chemistry building were prepared in consultation with the Professor of Chemistry who was appointed last year and the work will be soon taken in hand. For want of accommodation the affiliation of the Central College in Branch II B. (Chemistry) had to be postponed. Provision was made for the B. A. Pass Course in Natural Science with Geology as the principal subject and Zoology as the subsidiary subject. Liberal grants have been made to both the colleges for equipment.

Religious and Moral Instruction.

92. The programme of religious and moral instruction as laid down in the curriculum has been systematically followed in the colleges and schools of the State. It is intended to give up the half-hour religious and moral lessons in colleges and adopt instead weekly lectures by Professors and Pandits. In the High schools and the higher classes of Anglo-Vernacular and Taluk Vernacular schools the teaching was based on the *Sanatana Dharma* text-books and the books on morals prescribed in the curriculum. In the lower classes of Anglo-Vernacular and Taluk Vernacular schools the teachers imparted instruction by the narration of simple stories containing moral precepts, with the help of wall pictures supplied to them. In Village Elementary schools the teaching was confined to the recitation of a short prayer in Kannada both at the commencement and the close of the day's work, followed by verses relating to daily conduct contained in the *Dharmabodhini* and other books.

Manual and Kindergarten Instruction.

93. Manual instruction made satisfactory progress during the year. The instruction given to pupils was of two kinds, *viz.*, wood sloyd or sloyd proper, and paper sloyd or card-board work and paper-folding, in both of which the teachers evinced considerable interest. The pupils also derived substantial benefit. Most of the boys of the second year course were able to handle the tools with considerable facility and a corresponding degree of skill and speed. The finished models and drawings were in several cases very satisfactory in point of neatness,

accuracy and correct judgment. It is reported that in a few cases sloyd training has aroused latent aptitude for drawing and an interest in practical work enabling the boys to employ their leisure hours in a useful way by attending to petty repairs at home. It is also said to have awakened in several boys an increased interest in school subjects such as practical science, mathematics and geography. A sloyd conference was held in Mysore in October 1910 and several important matters relating to sloyd were discussed. During the last summer vacation normal classes were held for the training of about 200 teachers in card-board work and paper-folding in nine places in the different districts of the State.

Educational Museum.

94. The exhibits presented by the Board of Education in England were classified and suitably arranged in the Museum. The number of visitors during the year was 371, of whom 84 were professors and teachers of the colleges and high schools, 63 were students and the rest were officials and private gentlemen. Some selected exhibits were sent on requisition to the Exhibitions held at Allahabad, Guntur, Tanjore and Chitaldrug, and were pronounced to be highly interesting and instructive.

Female Education.

95. The progress in female education continues to be satisfactory. The number of institutions for girls increased from 286 to 294, the number being made up of one English College, one Oriental College, 2 High Schools, 9 Anglo-Vernacular or English Middle Schools, 66 Vernacular Middle Schools, 211 Primary Schools, 2 Normal Schools, one Industrial School and one Private School of the elementary grade. One Brahmin girl passed the Intermediate Examination and one the Matriculation Examination from the Maharani's College, Mysore. Altogether 103 girls passed the English and Kannada Lower Secondary Examinations from all the girls' schools in the State against 73 in the previous year. In the Teachers' Certificate Examinations, 8 girls passed the Lower Secondary grade and 4 the Primary grade. Fifteen girls also passed the examination for proficiency in sewing against 6 in the previous year. To ensure the supply of trained school mistresses, an Upper Secondary Training class was opened in the Maharani's College for training as teachers such of the school girls as could not successfully continue their studies in English.

Technical and Industrial Education.

96. The number of industrial and weaving schools decreased from 21 to 20, but their attendance rose slightly

from 1,230 to 1,234. All the schools under the management of Government and most of those under private management did satisfactory work. A scheme for working the pottery branch of the Mysore Industrial School as a separate department has been sanctioned, and provision has been made for the installation of electric power to work the pug-mill in the school.

Oriental Library.

97. During the year under review 583 manuscript works and 243 printed volumes were added to the stock of the Oriental Library. Of the manuscripts, 555 relate to Sanskrit Literature and 28 are Kannada Works. Among the rare Sanskrit manuscripts secured for the Library may be mentioned the one which contains the text of an ancient work named *Ayurveda* with a gloss thereon by Yogananda.

THE ECONOMIC CONFERENCE.

98. You are aware, Gentlemen, that in May last, with the idea of associating non-official gentlemen with the officers of Government in deliberations connected with economic progress in Mysore, His Highness the Maharaja ordered the formation of the Mysore Economic Conference. The Representative Assembly goes a certain way in this direction but it was considered that a large body meeting and deliberating only once a year could do but little, and that public interest in the numerous questions relating to economic progress could only be kept alive by a constant interchange of views and discussions among those competent to deal with them. The Conference was accordingly constituted with official and non-official members and a number of subjects were suggested for its consideration. It was laid down that it would be the duty of the Conference to work up, progressively, the various questions which it deals with till they are ripe for practical action. The first session of the Conference was held at Mysore during the Birthday week on the 10th June 1911 and two succeeding days, and His Highness was so gracious as to inaugurate the Conference personally with a speech in which he referred to the present economic inefficiency and suggested remedies. I may quote one sentence from the speech which relates to this Assembly. His Highness said: "The functions of this Conference will not overlap those of the Representative Assembly, the future of which will ever continue to be an object of earnest solicitude on the part of myself and my Government."

99. At the June session the Conference appointed three committees, namely, the Agricultural Committee with Mr. K. P. Puttanna Chetty as Chairman, the

Education Committee with Mr. H. V. Nanjundayya as Chairman, and the Committee for Industries and Commerce with Mr. M. Visvesvaraya as Chairman, and assigned to these three committees the consideration of the different subjects specified in the programme.

100. As already mentioned, a sum of one lakh of rupees was sanctioned by the Government for the expenses of the Conference and its committees. In almost all the districts District Committees have been formed, and both the Central Committees and the District Committees have been authorised to appoint 'Associates' up to a limit of fifty to form a connecting link between the committees and individuals or agencies engaged in similar work.

101. The Committees have set to work vigorously. They have settled preliminaries and started a number of investigations and have also reported progress to the Conference at its second session held on the 30th September.

Conclusion

102. I shall conclude by referring to the great historic event which is to take place at Delhi in December next, to which all eyes are now intently turned, *viz.*, the Imperial Durbar in connection with the coronation of His Most Gracious Majesty King George V, Emperor of India. It is needless for me to dilate on the extraordinary significance of this great event, "the first personal visit of a King-Emperor and his Consort to his Indian Empire in order to announce to his Indian subjects the solemnity of his Coronation." It is the intention of His Highness the Maharaja to be present at the great ceremonial with the principal Sirdars and Officers of the State and a few non-official representatives. He has also been pleased to direct that this auspicious event should be locally celebrated in the State in a suitable manner, and he feels confident that all classes of his subjects will join in the celebration to testify to their undoubted loyalty and devotion to the person and throne of the King-Emperor.

T. ANANDA ROW,
Dewan of Mysore.
